

Edge360 was founded by leaders in the intelligence, defense and geospatial communities with the goal of creating Safer Cities through

VISUALIZED INTELLIGENCE

▶▶▶ Edge360's product suite delivers the right information to the right people at the right time resulting in a real-time situational awareness that is based on all information and assets available to the client. This awareness translates into better decisions made at all levels of the organization and more effective collaboration within and between agencies in response to incidents or trends. Edge360 has grown to be the leader in the Safe Cities and Homeland Security marketplaces and provides the full array of solutions necessary to secure our nation's cities.

PSIM EXPERIENCE

- Certified CNL IPSecurityCenter™ Partner
- Tactical Surveillance Solutions
- Supporting both federal/civilian missions
- Proven deployment to Safe Cities
- Operational & Maintenance Plans
- Experience in Command Center Ops
- Certified Trainers
- Edge Technology Driver Development

CORE CAPABILITIES

Strong, highly qualified resources

- Strategic manufacturer partnerships
- Skilled, talented employees
- Recognized domain expertise

Solutions not just technologies

- Product integration
- Onsite support
- Courseware development & training
- Relevant practice areas
- Track record of innovation

Leadership recognized authorities in

- Critical Infrastructure Protection
- Tactical Security Solutions
- Cyber-Security
- Geospatial Intelligence
- Overt and Covert Tactical Surveillance
- Operations Training and Support
- Executive/Dignitary Protection Operations
- Protective Intelligence
- GIS & Mapping Applications

CREATING SAFER & SECURE CITIES

PHYSICAL SECURITY INFORMATION MNGT (PSIM)

Agencies have numerous, disparate public safety and operational systems that were not designed to interact with each other. Edge360 implements PSIM solutions that integrate old and new systems, advanced analytics, physical security technologies and emergency management systems into one centrally accessed command and control environment to identify, manage and eliminate threats.

OPEN SOURCE INTELLIGENCE (OSINT)

The convergence of social media and situational awareness is necessary in order to mitigate criminal threats, predict and manage flash mobs, and access the most pressing information in the event of a hazard or crisis. Edge360's OSINT solution aggregates, analyzes, maps and contextualizes open source intelligence and social media feeds to enable searching, alerting and visualization of emerging threats.

ENTERPRISE SEARCH SOLUTIONS

Agencies have numerous criminal justice, records, incident and asset databases containing a wide range of information. Commonly, these databases are not connected to each other and don't enable users to easily search and recover the information they need. Edge360's Enterprise Data Fusion solution, Slingshot™, allows users to search any connected database, file system and document

repository to turn vast amounts of seemingly unrelated data into unprecedented intelligence.

GEOSPATIAL & DATA VISUALIZATION (GEOVIZ)

Agencies need context to organize and add meaning to collections of information. Geospatial Data Visualization (GeoViz) allows Analysts, Operators and Key Decision Makers the ability to easily digest and understand complex sets of data and situations. A picture is worth a thousand words.
