**Overview of Position**
A Junior Developer contributes to the success of Atlas Systems by working in a team environment to create, enhance, extend, and support our products. As part of our development team you will have an immediate impact on our product design, development, and customer experience.

**Development/Testing**
- Under direct supervision, develops solutions based on provided specifications and user requirements
- Encodes, tests, debugs, and documents solutions as specified
- Collaborates with other members of the development team

**Product Support**
- Assist service staff to diagnose and resolve issues with Atlas products

**Occasional Tasks**
- Other duties as assigned

**Work Experience Requirements**
- Experience with the C# programming language and the Microsoft .NET Framework
- Preference given for:
  - Experience working in a library environment
  - Experience working in an collaborative team environment
  - Proficiency with other languages (specifically Delphi, Java, JavaScript, and LUA)
  - Database design experience, especially with Microsoft SQL Server
  - Experience with web-related technologies (HTML, CSS, etc.)
  - Experience with XML-related technologies (XML, XSLT, XML Schema, etc.)

**Education Requirements**
College degree with experience in computer programming and development or equivalent work experience

**Special Job Requirements**
Position may require occasional overnight travel
