SPLIT DIAMOND BULLS <-> ALWAYS A LASTING VALUE

2016 - Celebrating Our 25th Annual Bull Sale

All bulls PAP & i50K Tested!

Selling 160 Yearling Bulls

2016 - Celebrating Our 25th Annual Bull Sale

SPLIT DIAMOND RANCH

Thursday
March 3, 2016 • 1:00 PM MST
Beaverhead Livestock Auction • Dillon, Montana
Dear Cattlemen and Friends,

It is a great honor welcoming you to our 25th Anniversary Angus Bull Sale. We feel this is by far the most uniform, easy fleshing, well rounded set of bulls we have raised to date. It is amazing, how during the last 25 years our Angus bulls have evolved, through genetics, multitudes of data, and the dedication of sticking to a program of easy calving, thick, moderate framed, easy fleshing cattle that will work really well in a variety of environments.

Only our top females, using performance records and nursing ratios of 103 and higher are placed in our A.I. program, along with our replacement heifers and two year old cows. We transfer over 200 embryos into the balance of our registered cows. These recipient cows receive the embryos from the mating of our elite donor females and bred to industry leading sires.

Our goal is to provide our customers with progressive genetics that are best suited for our environment. Our commitment to reaching these goals includes ongoing investment in new technologies. We have embraced the genomic revolution by I50K testing each and every bull in the sale offering. We have gone a step further by testing every replacement heifer the last 2 years, any new cows that we bring into the herd and all new herd sires. By doing this we are guaranteeing parentage verification and adding more accuracy by creating Genomic Enhanced EPDs (GEPD’s). Please read the information pages on Zoetis and the products they provide to give you more value for your end product.

The bulls completed a 120 day performance test with a 3.3 lb. average daily gain to have a moderated growth rate, so that they can be turned out and work for you. They have been rigorously screened and tested to bring you bulls that we are proud of. They have been semen tested, scrotal measured. All bulls have also been PAP tested for HMD. (Please see Page 7 for more info) These bulls have received a complete fall and spring vaccination program including 2 shots for foot rot. We don’t stop there, we also provide a first year breeding guarantee and a sight unseen purchase guarantee for all those who choose to bid over the phone or online using Frontier Stockyards, Bill Pelton Marketing and at cattleusa.com. We are still offering a VOLUME Discount 3-5 bulls purchased is a 5% discount and 6 or more bulls is a 10% discount. As always, if you haul your bulls home sale day you receive a $100 discount per bull.

We are sincerely grateful for your interest in our Angus breeding program and hope to see you at the sale, whether you come to “shoot the bull” or buy a bull, we’ll be happy to see you. We welcome you to view the bulls at the ranch until they are sent to Beaverhead Livestock Auction on Tuesday March 1th and will be available for viewing. Sale time is at 1pm MST Thursday, March 3rd.

We want your business, but most of all we want your friendship, your success is our success!

With warm regards,
Steve, Linda, Hans, Diana and Crew
25th Annual Value Added Angus Bull Sale
Thursday, March 3, 2016
Lunch at 11:30 am • Sale at 1:00 pm MST
Beaverhead Livestock Auction • Dillon, Montana

SALE LOCATION
Beaverhead Livestock Auction, located south of Dillon, MT on the frontage Road east of Interstate 15

SCHEDULE
Bull Viewing — Tuesday, March 1st - Thursday, March 3rd at the sale site.
Complimentary Lunch — 11:30 AM MST Thursday, March 3, 2016
Provided by Jerry McDonald of Blacktail Station
Angus Bull Auction — 1:00 PM MST Thursday, March 3, 2016

Ask for the Split Diamond Ranch Bull Sale Rates

DEVELOPMENT
Free delivery of your bull purchases up to 250 miles from the sale site; beyond at cost.

VOLUME DISCOUNT
3 - 5 bulls 5% discount, 6+ bulls 10% discount. $100 rebate per bull for hauling your purchases home on sale day.

RETAINED INTEREST
Split Diamond Ranch retains a 1/3 revenue share on all bulls sold in the sale. Purchaser has 100% possession and salvage value. Unless otherwise stated.

PAP TESTING
All bulls PAP tested. See page #7 for more details.

HERD HEALTH
Split Diamond Bulls are on a complete health program from birth until sale day. At birth they receive Inforce 3, Alpha 7 C&D, Type A Clostridial. At Branding the receive Bovishield Gold 5+One Shot, Ultrachoice 7, Dectomax Injectable, and Multimin 90. At weaning time they receive One Shot Ultra 7, Resvac – Viral + Somnus, SolidBac, Multimin 90, and Ivermectin Pour On. December the they received their Fusio Guard (foot rot) and Wart Vaccine with a booster to follow. February they received Ultrasac 8 and Bovishield Gold FP5 VL. Complete fertility Screening performed by DR. Bob Heningson of Jefferson Vet Clinic.

ALL Split Diamond Bulls have the BVD ELISA Test (ear notch) to identify PI Cattle. All Bulls tested Negative.

All bulls have been trich tested and are ready for transport on sale day anywhere in the US.

PERFORMANCE DATA
All bulls were performance tested. Complete, accurate performance and carcass EPDs, ultrasound data and projected sale day weight are provided on every bull selling.

TERMS
Terms of the sale are cash, unless prior arrangements have been made with Steve Buckner.

FIRST BREEDING SEASON INSURANCE
All bulls will be covered 50% by Split Diamond Ranch if they are injured during their first breeding season. Breeding is defined as the 90-day period following the first turnout of the bulls.

50% of the value of the injured bull, minus one-half salvage value, will be given as credit in a future sale or toward a replacement bull if one is available. Salvage value, if any, will be split equally between Split Diamond Ranch and the buyer. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2016.

Announcements from the auction block take precedence over any printed material.
Dear Cattlemen,

This is an exciting time in the beef industry to select bulls that are specifically designed to do a job that can be determined by the scientific data that we have at our hands. By utilizing the traditional performance and production data along with the 150K genomic information all the EPD predictions, the accuracy of our genetic decisions and selection is at an all-time high. New technology has changed the face of the beef industry and Split Diamond Ranch is at the forefront of the Angus breed supplying their customers the genetics and customer service they need to compete.

This program is on the right track to mass produce performance genetics with calving ease, muscle, maternal, PAP information and docility. Utilize the full disclosure of the information in this catalog to select the right bulls that fit your needs. Buy with confidence from a program that offers sensible feed management of their bulls and they will breed with predictability to the job they were selected for.

Sincerely,

Gary Wall, GW / ORIgen / Genetics Unlimited
406-208-8536

EPDs are current as of 2/4/15.
Updated EPDs can be viewed at www.angus.org
Internet Bidding Instructions

Sale Broadcast Live via Frontier Stockyards

1-877-343-9047
info@frontierstockyards.com
John Morford, office manager

www.frontierstockyards.com

This sale will be broadcast live over the internet via Frontier Stockyards. You will be able to see and hear the sale live and keep up with the bidding via a scrolling bid screen. For buyers that are unable to attend the sale, you will have the option of bidding online or you can place a bid using the telephone bidlines. If you wish to bid on a lot via the telephone bidlines, you are encouraged to call a couple of lots in advance.

In order to place bids on the Internet or over the phone, you must pre-register and obtain a bidder number and a password.

All buyers must register – registrations do not carry over from sale to sale or year to year. To register, visit www.frontierstockyards.com and click on the link for this sale.

A sale order will be posted in advance of the sale and an online catalog with videos will be available at www.frontierstockyards.com

We encourage you to register early to avoid any problems and make sure you are set up to view the sale.

Visit Frontier Stockyards for all the details! www.frontierstockyards.com

Traditional Marketing Methods Using 21st Century Technology!

You must get pre-approved 24hrs minimum before the start of our Split Diamond Ranch Bull Sale March 3rd, 2016 • Beaverhead Livestock Auction, Dillon MT • Sale Starts 1PM MST

Follow Process Below to begin account set up and approval at www.cattleusa.com.

To set up an account is a simple two minute process.

1. Look for the log-in area on the upper left portion of the screen.
2. Find the blue button labeled “Register to View”, click on it.
3. Fill in the form with your name, email, state, username, and password.
4. Press the proceed button at the bottom of the page.

Any time you come back to CattleUSA just enter your username and password to log-in and watch auctions.

Each auction approves its own buyers, no buyers are approved by CattleUSA. This is done for your privacy and security. Your buyers information is kept private and is only released to the auctions you choose. In order get obtain approval to buy at an auction you will need to submit your contact information to each auction you wish to buy from.

1) Log in to CattleUSA.
2) Push the Submit button next the auction you wish to be approved at. The first time you do this, a form will pop-up for you to fill out your contact information. Fill out your information then push the button at the bottom of the form to continue.
3) You have now sent your information to that auction. The auction will now be able to find you in their database and approve you to buy. If you would like to be approved at other auctions push the submit button next to each auction you wish to be approved at. Your information will be forwarded to those auctions only.

Auctions do not have access to your information until you send it to them.

For any approval questions and login please contact Judy Tash
Beaverhead Livestock Auction, Dillon MT 406-683-2002
We feel it is important for our high altitude customers to have an indication to which genetics should perform for their altitude. We know that testing at 5000 ft. elevation is not the most ideal protocol for this test in that we may not be able to identify every animal experiencing a high PAP. We have decided to do the PAP test at our home ranch in an attempt to get as much information we can concerning a PAP score to our customers increasing the odds in the selection of a bull suitable for high altitude use. Scores of less than 41 have a greater than 70% accuracy of remaining low and are a good risk for use in high elevation. Scores 42 – 46 should be considered moderate risk and difficult to predict high altitude use. Scores 47 and greater tested at the elevation of our ranch should not be used at high elevations. All these bull should be retested once they have moved to their new home if high elevation is of concern to your operation.

All our replacement heifers and sale bulls were grazed at 6000 ft. or higher for the summer. We brought the bull’s home in September to be weaned and developed them for the sale.

We have waited to perform the test until the majority of the bulls are over 12 months of age, evidence points to testing bulls at an older age (at or equal to 12 months of age) will increase our accuracy levels of the PAP test. We should see accuracy levels in the 65% to 70% range even though the altitude at testing time is not at 6000 ft. or higher.

All the values will be available sale day and will be posted on our website www.splitdiamond.com for viewing before the sale. As with a lot of tests this is not a concrete marker for High Altitude Sickness however we feel it is an important tool for recognizing problem genetics before they start.

We have enlisted the expertise and guidance of DR. Ben Abbey from Beaverhead Vet Clinic who is one of 7 Nationally Recognized Vets to perform this test to be reported to the Angus Association. He has recently completed a continuing education program for the PAP testing protocol.

If you have any questions, Call Dr. Abbey at: Office 406-683-9397 or Cell 406-660-1412

**HERE IS OUR GUARANTEE:** If you buy a bull that has a PAP score of 44 or less. Take the bull home to your elevation and keep him at that elevation the required amount of time for a re-test. We will pay the cost of the re-test. Then retest the bull, if he does not give a satisfactory score at your altitude by a certified PAP testing vet we will refund you the purchase price and take the bull back. You can buy with confidence from Split Diamond Ranch that all our bulls are guaranteed.

---

**ANGUS Genetics Inc. Providing Genomic-Enhanced EPDs**

**Driving the science of better breeding**

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs). EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

- Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs
- Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)
- The ability to make more rapid progress for traits that are important to you, due to:
  - more accurate selection
  - easier identification of genetic outliers
  - the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 8-20 calves, depending on the trait. That’s valuable insight, offered regularly through the breed’s weekly national cattle evaluation at www.angus.org.

**How do you know if EPDs are genomic-enhanced?**

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo or those of partnering labs Zoetis (HD50K, i50K) or GeneSeek (GGP-HD, GGP-LD).
Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an “I”, and may or may not include the animal’s own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Production & Maternal EPDs

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which an sire’s calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire’s ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire’s ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire’s ability to transmit yearling growth to his progeny compared to that of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire’s genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf’s weaning weight attributed to milk and mothering ability.

SValues

SValues are multi-trait selection indexes expressed in dollars per head, to assist commercial beef producers by adding simplicity to genetic selection decisions. A $Value has meaning only when used in comparison to the $Value of another animal. For example, just as with EPDs, variation in $Values between animals indicates average expected differences in the relative value of progeny if random mating is assumed and the calves are exposed to the same environment.

Weaned Calf Value ($W): an index expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. $W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Feedlot Value ($F): an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning performance compared to progeny of other sires.

Grid Value ($G): an index expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Beef Value ($B): an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires. The $B value combines the contributions of $F and $G.

Carcass EPDs

Carcass Weight EPD (CW), is a predictor of transmitting ability for hot carcass weight.

Marbling fat EPD (Marb), is a predictor of the difference in a sire’s progeny for percent intramuscular fat in the ribeye muscle compared to other sires.

Ribeye Area EPD (RE), is a predictor of the difference in square inches of ultrasound ribeye area of a sire’s progeny compared to the progeny of other sires.

Fat Thickness EPD (FAT), expressed in inches, is a predictor of the difference in ultrasound fat thickness at the 12th rib of a sire’s progeny compared to the progeny of other sires. It includes the weighted average of 60% of the rib fat measurement and 40% of the rump fat measurement.

The Solution for Commercial Angus Heifer Selection

GeneMax® Advantage™ is a genomic test created from a collaboration between Angus Genetics Inc., (AGI) Certified Angus Beef® (CAB) and Zoetis. The offering is for use in commercial Angus replacement females (75% or greater) to help you make better informed selection, mating and marketing decisions.

TESTING KIT MATERIALS

GeneMax Advantage delivers three economic index scores that allow for easier, more dependable decision-making:

THREE ECONOMIC INDEX SCORES
- **Cow Advantage** – Predicts differences in profitability from heifer development, pregnancy and calving, to the sale of weaned progeny
- **Feeder Advantage** – Predicts differences in net return of feeder calf progeny due to growth, feed efficiency and CAB carcass merit
- **Total Advantage** – Predicts differences in profitability from genetic merit across all economically relevant traits captured in the Cow and Feeder Advantage index scores

SMART OUTLIER REPORTING
- **Cow Cost from Size and Milk** – Identify highest cost from extremes in size and milk (Bottom 5%)
- **Docility** – Identify genetic potential for less desirable temperament (Bottom 5%)
- **Marbling** – Identify low and high marbling (Top and Bottom 25%)
- **Tenderness** – Identify unfavorable tenderness outliers (Bottom 5%)

SIRE MATCH
- GeneMax Advantage matches tested females to registered and transferred HD 50K-tested sires. Sire identification empowers better mating decisions and management of inbreeding. Angus bull buyers are encouraged to select bulls based on GE-EPDs powered by HD 50K.

IMPLEMENTING GENEMAX ADVANTAGE

GeneMax Advantage information enables more timely and efficient breeding decisions for increased productivity and net return:
- Select based on Cow, Feeder and Total Advantage index scores
- Eliminate outliers for feed cost and docility
- Mate to complement GeneMax Advantage index scores and outliers
- Minimize inbreeding

ORDERING TESTS

Order forms for Zoetis HD 50K, GeneMax Advantage and GeneMax® Focus™ can be found at www.angus.org/agi and all samples must be submitted to:

**Angus Genetics Inc. (AGI)**
3201 Frederick Ave. • Saint Joseph, MO 64506
Phone: 816-383-5100 • www.angus.org/AGI

Blood cards or Allflex® tissue samples may be used for GeneMax Advantage. AGI is the exclusive distributor of HD 50K for Angus, GeneMax Focus and GeneMax Advantage.
New Herd Sires to Look for in 2017

**Sitz Advantage 8693**

Reg. 17502631

Advantage was the 2nd High selling bull in the 2014 Sitz fall sale at $42,000.
He is extremely long, with a thick top and great hind quarter.
His calves have come easy and quickly with great vigor.
Combines two great maternal sire of Connealy Final Product and Mytty Infocus.

For Semen Call 406-581-0612
**R B ACTIVE DUTY 010**

- **Owned with Genex 1612 is a massive beef bull with added length and depth of body that have crushed the scale with extra pounds.**
- **Active Duty has the power, stature, eye appeal and thickness with the kind of capacity demanded by cowmen today. His progeny have been topping production sales around the country.**
- **Ranks in the top 2% for WW, 4% for DOC, 5% for WW, 10% for RADG, 15% for SW**
- **Sons sell as lots 1, 2, 37, 42, 73, 74, 75, 76, 159**

**BT BORDER PATROL 1612**

- **Owned with Genex 1612 is a massive beef bull with added length and depth of body that will keep frame size in check, and add performance to his offspring.**
- **He is very docile and stands on a wide base with excellent foot shape.**
- **His sire, HF Tiger 5T, is the outcross sensation that was named the 2009 World Angus Forum Champion Bull, as well as the 2010 NWSS Reserve Senior Division Champion.**
- **His calves have developed very well with great hind quarter thickness, depth of rib, overall length, that have crushed the scale with extra pounds.**
- **Ranks in the Top 1% for WW, YW and $F, 3% for $W, 4% for RADG, 5% for Docility, 10% for HP**
- **Scrotal EPD +1.33**

**PA FORTITUDE 2500**

- **Owned with Malek Angus Ranch, Highwood MT, Bo Stovek Philip SD and Genex.**
- **Was the $75,000 high selling Protege son of 2012 and the history of Peterson Angus.**
- **Fortitude will add thickness, muscle, performance, calving-ease and growth.**
- **This bull is unique in the fact that he will add marbling and ribeye while reducing external fat.**
- **Individual performance: BR 103, WR 117, YR 119, IMF RT 106, REA RT 105**
- **Ranks in the Top 2% for SB, 4% for $F, 5% for BW, 10% for CED, YW, RADG, CW, FAT, SW, 15% for CEM, MARB and DOC 15% for CEM, 20% for SW**
- **Study the data on these sons very rare to put so many measurable traits in the top 20% or higher in the breed on one sire.**
- **Scrotal EPD +1.41**

**TC VANCE 011**

- **Owned with Sitz Angus Ranch, TC Ranch and Genex.**
- **Was the $66,500 record selling bull at TC Ranch in 2011.**
- **Combines the antagonistic traits of Superior Calving Ease, Carcass and Scrotal**
- **Vance will add length and his calves are clean fronted, athletic and thick topped**
- **Daughters are very well balanced with great udder structure and maternally strong**
- **Individual performance: BR 103, WR 117, YR 119, IMF RT 106, REA RT 105**
- **Ranks in the Top 2% for SW, 15% for REA, 5% for BW, 10% for CED, YW, RADG, CW, FAT, SW, 15% for CEM, MARB and DOC 15% for CEM, 20% for SW**
- **Sons sell as lots 6, 7, 28, 29, 30, 47-51, 64, 65, 93-96, 121, 130, 131**

**Why So Much Emphasis on Bulls?**

- **Bulls have the greatest economic impact on any breeding program, thus bull selection is one of the most important decisions and investments that a cowman makes during the course of the year. A bull sires 20-40 calves each year while a cow produces half or less this many offspring in her lifetime. For the most part, herd improvement comes from bulls.**

- **It’s been estimated that 80% of herd improvement is directly attributed to bull selection.**

**• Recommended for heifers**

- **Individual Performance WR 102, YR 97**

- **Identified as the 5th lowest BW EPD in the sale offering.**

- **Calving ease, carcass, high $B genetics here.**

**Why So Much Emphasis on Bulls?**

- **Bulls have the greatest economic impact on any breeding program, thus bull selection is one of the most important decisions and investments that a cowman makes during the course of the year. A bull sires 20-40 calves each year while a cow produces half or less this many offspring in her lifetime.**

- **For the most part, herd improvement comes from bulls.**

- **It’s been estimated that 80% of herd improvement is directly attributed to bull selection.**

**• Recommended for heifers**

- **Individual Performance WR 102, YR 97**

- **Dams Production 1 WR 101, 1 YR 95 (first calf heifer)**

- **Stems from the same cow family as lots 57, 58, 68**

- **Strong $B genetics here in an attractive package.**

- Recommended for larger framed heifers
- Individual Performance WR ET, YR ET
- Pathfinder Dams Production 5 BWR 96, 5 WR 107, 4 YR 105
- Good PAP 509 son with a 40
- Flush brothers sell as lots 70 and 71

• Recommended for heifers
• Individual Performance WR ET, YR ET
• Pathfinder Dams Production 5 BWR 96, 5 WR 107, 4 YR 105
• Good PAP 509 son with a 40
• Flush brothers sell as lots 70 and 71
