SPLIT DIAMOND BULLS
All bulls PAP & i50K Tested!

Selling 150 Yearling Bulls
Dear Cattlemen and Friends,

It is a great honor welcoming you to our 27th Annual Angus Bull Sale. It is amazing, how during the last 27 years how our Angus bulls have evolved. Through genetics, multitudes of data, and the dedication of sticking to a program of easy calving, thick, moderate framed, easy fleshing cattle that will work really well in a variety of environments.

Only our top females, using performance records and nursing ratios of 103 and higher are placed in our A.I. program, along with our replacement heifers and two year old cows. We transfer over 200 embryos into the balance of our registered cows. These recipient cows receive the embryos from the mating of our elite donor females and bred to industry leading sires.

Our goal is to provide our customers with progressive genetics that are best suited for our environment. Our commitment to reaching these goals includes ongoing investment in new technologies. We have embraced the genomic revolution by i50K testing each and every bull in the sale offering. We have gone a step further by testing every replacement heifer the last 3 years, any new cows that we bring into the herd and all new herd sires. By doing this we are guaranteeing parentage verification and adding more accuracy by creating Genomic Enhanced EPDs (GEPD's). Please read the information pages on Zoetis and the products they provide to give you more value for your end product.

Last year we added some feeder calf marketing programs and I am happy to report they were a success. We have developed partnerships with two reputable cattle buyers to purchase our customers calves. The first is a value added program through Linz Heritage Angus and Meats by Linz for genomically verified feeder calves, this is the reason we have invested so much into the Zoetis i50K testing. They were able to purchase about 1000 head of calves that met there program in the fall of 2017. The second is with KROSE Cattle Company who have been buying and selling feeder calves, replacement heifers, bred heifers and cows for the last 25 years. They were able to purchase 600 calves in the fall of 2017. There will be representatives from both companies here sale day and you can find more information on page 5. So please take the time to meet with them, we want to increase those numbers for 2018.

The bulls completed a 120 day performance test with a 3.2 lb. average daily gain to have a moderated growth rate, so that they can be turned out and work for you. They have been rigorously screened and tested to bring you bulls that we are proud of. They have been semen tested, scrotal measured. All bulls have also been PAP tested for HMD. (Please see Page 3 for more info) These bulls have received a complete fall and spring vaccination program including 2 shots for foot rot. We don't stop there, we also provide a first year breeding guarantee and a sight unseen purchase guarantee for all those who choose to bid over the phone or online using cattleusa.com (Instructions on Page 3) We are still offering a VOLUME DISCOUNT 3-5 bulls purchased is a 5% discount and 6 or more bulls is a 10% discount. As always, if you haul your bulls home sale day you receive a $100 discount per bull.

We are sincerely grateful for your interest in our Angus breeding program and hope to see you at the sale, whether you come to “shoot the bull” or buy a bull, we’ll be happy to see you. We welcome you to view the bulls at the ranch until they are sent to Beaverhead Livestock Auction on Tuesday Feb 27th and will be available for viewing. Sale time is at 1pm MST Thursday, March 1st.

We want your business, but most of all we want your friendship, your success is our success!

Our main success comes from the great help and extended family of our employees.
Nacho and Amy Rodriguez, Chad and Ruth Roelfs, John and Pam Drogitus, Bob Lack, Sharmen Scafani.
We thank each and every one of them, without them we would be stuck in the cold.

With warm regards,
Steve, Linda, Hans, Diana and Crew

Ask for the Split Diamond Ranch Bull Sale Rates

DELIVERY
Free delivery of your bull purchases up to 250 miles from the sale site; beyond at cost.

VOLUME DISCOUNT
3 - 5 bulls 5% discount, 6+ bulls 10% discount. $100 rebate per bull for hauling your purchases home on sale day.

RETAINED INTEREST
Split Diamond Ranch retains a 1/3 revenue share on all bulls sold in the sale. Purchaser has 100% possession and salvage value. Unless otherwise stated.

PAP TESTING
All bulls PAP tested. See page #3 for more details.

HERD HEALTH
Split Diamond Bulls are on a complete health program from birth until sale day. At birth they receive Inforce 3, Alpha 7 C&D, Type A Clostridial. At branding they receive Bovishield Gold 5+ One Shot, Ultrachoice 7, Dectomax Injectable, and Multimin 90. At weaning time they receive One Shot Ultra 7, Resvac – Viral + Somnus, SolidBac, Multimin 90, and Ivermectin Pour On. December they received their Fusoguard (foot rot) and Wart Vaccine with a booster to follow. February they received Ultrachoice 8 and Bovishield Gold FPS VL. Complete fertility Screening performed by DR. Bob Heningson of Jefferson Vet Clinic.

ALL Split Diamond Bulls have the BVD ELISA Test (ear notch) to identify PI Cattle. All Bulls tested Negative.

All bulls have been trich tested and are ready for transport on sale day anywhere in the US.

PERFORMANCE DATA
All bulls were performance tested. Complete, accurate performance and carcass EPDs, ultrasound data and projected sale day weight are provided on every bull selling.

TERMS
Terms of the sale are cash, unless prior arrangements have been made with Steve Buckner.

FIRST BREEDING SEASON INSURANCE
All bulls will be covered 50% by Split Diamond Ranch if they are injured during their first breeding season. Breeding is defined as the 90-day period following the first turnout of the bulls. 50% of the value of the injured bull, minus one-half salvage value, will be given as credit in a future sale or toward a replacement bull if one is available. Salvage value, if any, will be split equally between Split Diamond Ranch and the buyer. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2018.

Announcements from the auction block take precedence over any printed material.

- 1 -
Dear Cattlemen,

This is an exciting time in the beef industry to select bulls that are specifically designed to do a job that can be determined by the scientific and cowboy data at our hands. New technology has changed the face of the industry and Split Diamond Ranch is at the forefront supplying their customers the genetics and the customer service they need to compete.

Split Diamond bulls have the basics in order to work in rugged, real world conditions in Montana and western range country. This herd embodies the fleshing ability, udder quality, calving ease, roughage conversion, rebreeding ability and functional soundness aspects that are demanded in their cowherd. They have also spared no expense in acquiring herd bulls that express those qualities as well as carcass and growth attributes and then measured the results with every technology available. If you have any questions about these bulls don’t hesitate to call me.

Sincerely,
Gary Wall, GW / ORlgen / Genetics Unlimited
406-208-8536

You must get pre-approved 24hrs minimum before the start of our Split Diamond Ranch Bull Sale March 1st, 2018 • Beaverhead Livestock Auction, Dillon MT • Sale Starts 1PM MST

Follow Process Below to begin account set up and approval at www.cattleusa.com.

To set up an account is a simple two minute process.
1. Look for the log-in area on the upper left portion of the screen.
2. Find the blue button labeled “Register to View”, click on it.
3. Fill in the form with your name, email, state, username, and password.
4. Press the proceed button at the bottom of the page.

Any time you come back to CattleUSA just enter your username and password to log-in and watch auctions.

Each auction approves its own buyers, no buyers are approved by CattleUSA. This is done for your privacy and security. Your buyers information is kept private and is only released to the auctions you choose. In order get obtain approval to buy at an auction you will need to submit your contact information to each auction you wish to buy from.

1) Log in to CattleUSA.
2) Push the Submit button next the auction you wish to be approved at. The first time you do this, a form will pop-up for you to fill out your contact information. Fill out your information then push the button at the bottom of the form to continue.
3) You have now sent your information to that auction. The auction will now be able to find you in their database and approve you to buy. If you would like to be approved at other auctions push the submit button next to each auction you wish to be approved at. Your information will be forwarded to those auctions only.

Auctions do not have access to your information until you send it to them.

For any approval questions and login please contact Judy Tash
Beaverhead Livestock Auction, Dillon MT 406-683-2002
PAP Testing

We feel it is important for our high altitude customers to have an indication to which genetics should perform for their altitude. We know that testing at 5000 ft. elevation is not the most ideal protocol for this test in that we may not be able to identify every animal experiencing a high PAP. We have decided to do the PAP test at our home ranch in an attempt to get as much information we can concerning a PAP score to our customers increasing the odds in the selection of a bull suitable for high altitude use. Scores of less than 41 have a greater than 70% accuracy of remaining low and are a good risk for use in high elevation. Scores 42 – 46 should be considered moderate risk and difficult to predict high altitude use. Scores 47 and greater tested at the elevation of our ranch should not be used at high elevations. All these bull should be retested once they have moved to their new home if high elevation is of concern to your operation.

All our replacement heifers and sale bulls were grazed at 6000 ft. or higher for the summer. We brought the bull’s home in September to be weaned and developed them for the sale.

We have waited to perform the test until the majority of the bulls are over 12 months of age, evidence points to testing bulls at an older age (at or equal to 12 months of age) will increase our accuracy levels of the PAP test. We should see accuracy levels in the 65% to 70% range even though the altitude at testing time is not at 6000 ft. or higher.

All the values will be available sale day and will be posted on our website www.splitdiamond.com for viewing before the sale. As with a lot of tests this is not a concrete marker for High Altitude Sickness however we feel it is an important tool for recognizing problem genetics before they start.

We have enlisted the expertise and guidance of DR. Ben Abbey from Beaverhead Vet Clinic who is one of 7 Nationally Recognized Vets to perform this test to be reported to the Angus Association. He has recently completed a continuing education program for the PAP testing protocol.

If you have any questions, Call Dr. Abbey at: Office 406-683-9397 or Cell 406-660-1412

**HERE IS OUR GUARANTEE:** If you buy a bull that has a PAP score of 44 or less. Take the bull home to your elevation and keep him at that elevation the required amount of time for a re-test. We will pay the cost of the re-test. Then retest the bull, if he does not give a satisfactory score at your altitude by a certified PAP testing vet we will refund you the purchase price and take the bull back. You can buy with confidence from Split Diamond Ranch that all our bulls are guaranteed.

Better Bull Buying - GE-EPDs & Percent Ranks Powered by HD50K

GE-EPDs powered by HD 50K for Angus, cont.

Table 1. GE-EPDs powered by HD 50K for Angus — Impact on EPDs, accuracy values, associated progeny equivalents and interpretation of percent ranks.
### Expected Progeny Difference (EPD)

*Expected Progeny Difference (EPD)*, is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an “I”, and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

### Production & Maternal EPDs

- **Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which an sire's calves will be born when he is bred to first-calf heifers.

- **Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

- **Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

- **Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

- **Maternal Milk EPD (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

### Weaned Calf Value ($W$)

*Weaned Calf Value ($W$):* an index expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. $W$ includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

### Feedlot Value ($F$)

*Feedlot Value ($F$):* an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning performance compared to progeny of other sires.

### Grid Value ($G$)

*Grid Value ($G$):* an index expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

### Beef Value ($B$)

*Beef Value ($B$):* an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires. The $B$ value combines the contributions of $F$ and $G$.

### Carcass EPDs

- **Carcass Weight EPD (CW)**, is a predictor of transmitting ability for hot carcass weight.

- **Marbling fat EPD (Marb)**, is a predictor of the difference in a sire's progeny for percent intramuscular fat in the ribeye muscle compared to other sires.

- **Ribeye Area EPD (RE)**, is a predictor of the difference in square inches of ultrasound ribeye area of a sire's progeny compared to the progeny of other sires.

- **Fat Thickness EPD (FAT)**, expressed in inches, is a predictor of the difference in ultrasound fat thickness at the 12th rib of a sire's progeny compared to the progeny of other sires. It includes the weighted average of 60% of the rib fat measurement and 40% of the rump fat measurement.

- **Carcass EPDS**
  - SW: 50.77
  - SF: 46.10
  - SG: 30.18
  - SB: 101.27

- **Owned with Sitz Angus Ranch, TC Ranch and Genex**
- **Was the $66,500 record selling bull at TC Ranch in 2011**
- **Combines the antagonistic traits of Superior Calving Ease, Carcass and Scrotal**
- **Vance will add length and his calves are clean fronted, athletic and thick topped**
- **Daughters are very well balanced with great udder structure and maternally strong**
- **Vance has been a reliable calving ease bull that has ever been used at Split Diamond Ranch and Sitz Angus. He completed his 8th breeding season this year starting the 15th of April till the end of August since he was a yearling bull. Very fault free and easy going.**

  - Individual Production WR 109, YR 104
  - Dams Production 4 WR 97, 4 WR 109, 4 YR 108, 1 IMF 135, 1 REA 104
  - Maternal Brother sold for $5,250 in the 2016 bull sale to Sky Top Ranch
  - TC Vance has stood the test of time continually putting out progeny that excel since he was brought into the Split Diamond herd in 2012. He adds length, clean front and daughters that are very well balanced with great udder structure and maternally strong.
  - Low PAP and big time carcass genetics
