ACGI Baffle Systems consist of wood members with a depth greater than 3 1/2" and mounted to notched wood backers. Wood members can be made from solid wood or wood veneer over either MDF, particle board, or fire-rated foam. Baffle panels suspend with HD T-Grid or attach to walls with screws through the backer. Various wood member thicknesses and spacing can be specified to meet project requirements while the size and the number of baffles can vary depending on design criteria. In addition to our two standard profiles, custom profiles can be manufactured to a specific design.

**Baffle Series 1** (WB1) have four square sides.

**Baffle Series 2** (WB2) baffles have a radiused bottom face.

SPECIES + STAINS
For this product ACGI can source any commercially available solid wood, veneer or thermally-fused laminate and apply any standard, color-matched or custom finish. Contact us for details.

FIRE RATING
Solid wood finishes and both veneer finishes and cores can be provided with a Class A fire rating [ASTM-E84].

DELIVERY, STORAGE & HANDLING
Material must be stored and installed only in secured ambient environment (humidity range 25%–55%, temperature not to exceed 86°F). All windows, doors and wet-work must be complete before installation. Handle carefully to avoid damaging.

WARRANTY
All materials supplied by ACGI are guaranteed against manufacturing defects for one year. Wood stains and colorings can vary over time due to job site conditions and are therefore excluded from this warranty. The contractor shall warrant for one year all work from final acceptance of completed work.

*For wood member depths less than 3¼", please see our line of Grille products.
