

Your journey starts right here, right now.

ORBERA™ Managed Weight Loss System has been tested and proven to be effective. It can help you break through weight loss barriers and coach you toward healthy habits that will help you keep the weight off in the long run. Find everything you need to know about ORBERA™, living with ORBERA™ and success afterward.

Simple Design

ORBERA™ is a gastric balloon, which is a simple, yet powerful non-surgical weight loss solution. To begin, the deflated balloon is placed in your stomach and then filled with saline until the approximate size of a grapefruit. The presence of the balloon enforces portion control. After having the balloon for 6 months and receiving coaching from experts, ORBERA™ is removed while you continue to maintain a healthy lifestyle...and that's it!

Portion Control

ORBERA™ not only enforces portion control by making you feel full, but to be successful you will also have to make healthy lifestyle choices. For 12 months, a team of experts will help you reach your weight loss goals by retraining your appetite, advising on healthy nutritional choices, controlling portion sizes, and developing an exercise routine. Adopting and maintaining these healthy habits will ensure that you succeed with ORBERA™.

3x the Weight Loss of Diet & Exercise Alone

ORBERA™ is a two-part program that combines the placement of a weight loss balloon and a customized diet and exercise plan to effectively manage weight loss. After six months with this two-part program, people lost an average 3.1x the weight patients lost with diet and exercise alone. Thousands of people worldwide have safely used ORBERA™ to lose weight and sustain a healthy lifestyle.

**Real People.
Real-World
Results.**

Angela wanted to be able to wear the stylish clothes she sells in her boutique instead of the loose, baggy ones she usually wore. ORBERA™ helped her lose 48 lbs., taught her about lifestyle choices, and made her want to jump out of bed in the morning. She now highly recommends ORBERA™ as a fantastic start to the weight loss journey.
