itsystems
Twine Online

Twine Online is your new Office 365 intranet. Twine stands for interweaving important information into an easy-to-use Office 365 digital workplace. Twine is transparent, easy-to-use, interconnected and extensible to your needs. It delivers an intuitive navigation for intranet pages, news, documents, organization and collaboration. Twine is multilingual, social and responsive. It builds on the Microsoft Graph providing powerful content, workspace and people dashboards. Twine integrates with Delve, OneDrive, Groups, the Planner, O365 Video and Microsoft Teams. Twine can be used as a ready-to-go intranet, but also as a base for a complex and large scale enterprise Office 365 social intranet.

OUR PROJECT APPROACH

Project kick-off — Prototyp — Agile Development — Go-Live — Support

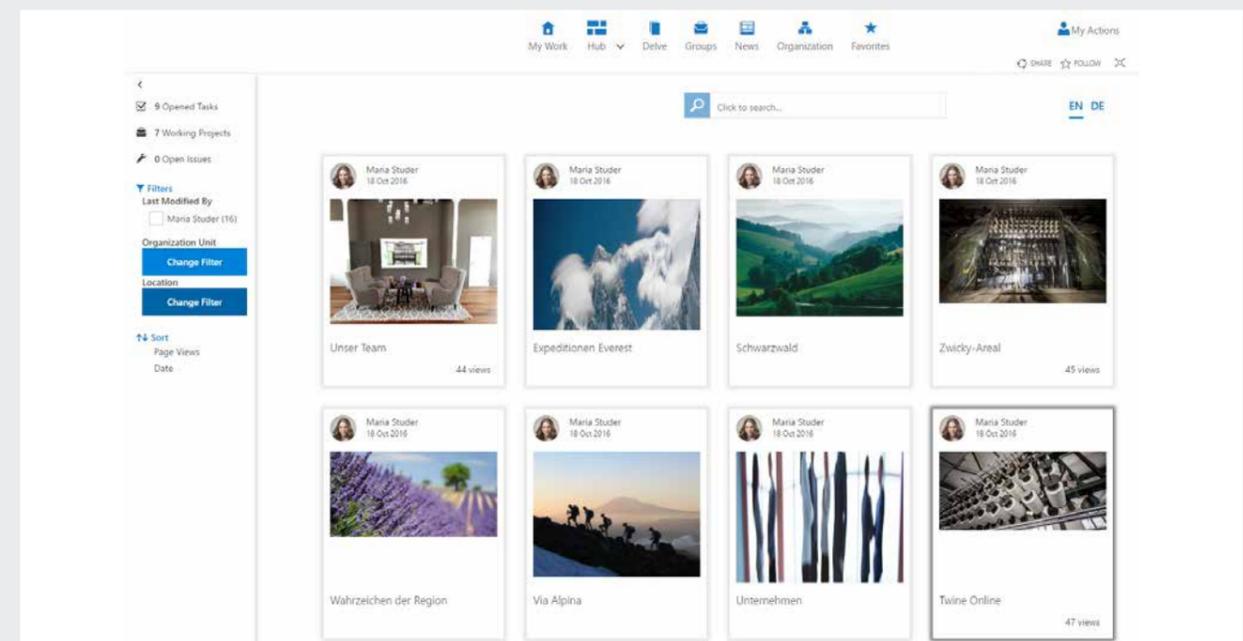

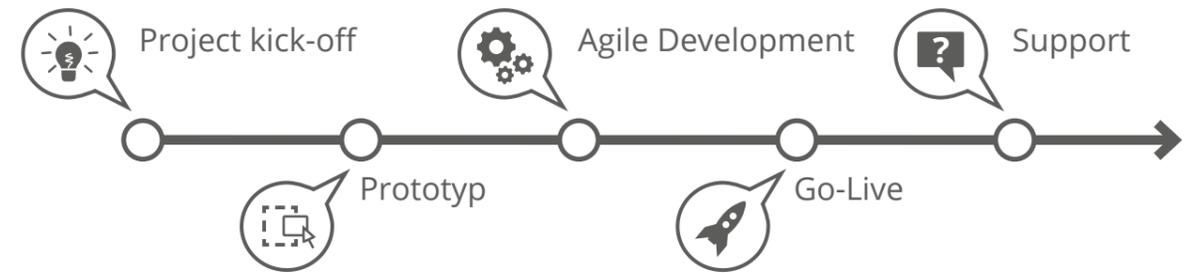

BENEFITS

FOR READERS

Transparent

Twine provides an intuitive navigation interface optimized for simplicity. It uses a fly-out and card navigation and facets for drill-down.

Interweaved

Twine builds on the Microsoft Graph and interweaves content from One-Drive, Groups, Teams, the Planner, Office Video and itsystems Condense News APP.

Search

Twine provide content and people search. Preconfigured and extensible facets for filtering and find-on-type for quick content access.

Favorites

Twine allows to tag pages, news and documents as favorites and have them aggregated at a central location.

FOR CONTENT MANAGERS

Templates

Twine comes with attractive templates for the lading page, pages and news. Templates are extensible to your corporate identity.

Streams

Twine allows to attach content streams to pages. In seconds, documents, pages, pictures, links and videos are attached to a given page.

枠A Multilingual

Twine is multilingual. Provide intranet content in several languages such as English, German, French, Italian and Spanish.

Responsive Interface

Twine provides and is optimized for a responsive interface for desktop, tablet and mobile. Information is available regardless of location or device.

DIGITAL WORKPLACE

Platform

Office 365 · OneDrive

IA

Twine provides a comprehensive provisioning framework allowing to build an information architecture based on your corporations' blueprint.

Extensible

Twine can be used as is, but also be used as the core of your custom Office 365 intranet. With extensibility in mind, it's the perfect kick-start for your enterprise social intranet.

Manageability

Twine heals it-self. It adds predictability to your cloud intranet by adopting to Office 365 changes. This safeguards your Office 365 cloud intranet investment.
