President's Report

The 3 way interclub with Aspley and Caboolture is on 24th August. In the past we have requested you bring a plate but this year the club is providing the supper and there is no meeting fee.

Outings – Please cancel the polo at Puddleduck Farm at the moment. They do not have a definite date for this year.

12th August – Portrait workshop at the Henzel St Botanical gardens from 9am – 12. This is open to everyone. Window light workshop at my place at 166 King St Clontarf. This will be in 3 sessions 9-9.45, 10-10.45, and 11-12. I only can have 4 people at a time so please put your name down if you would like to come. This is for the newer members. Please bring a salad to share and a chair. The club will supply sausages.

26th August is the Hunt and shoot meeting at 8.30am at the Henzel St Gardens. For the new people – you receive 10 subjects to photograph in 3 hours. You give your best photo of each subject to Jeanette on 14th September. Meet back at the gardens for a free sausage sizzle. Bring a plate to share and a chair.

22nd September – Bus trip to Carnival of Flowers. \$35 per person and partners are welcome.

Happy photography

Rae Stanaway

*Welcome to all members of the **Peninsula Camera Club Inc.** and a special welcome to any visitors. We hope you enjoy the meetings and develop a love and passion for photography. One of the aims of our club is to encourage, foster, develop and advance skills and promote the enjoyment of photography. If we can help you in any way or you have any questions, would like to know more about the club or would like a membership form please feel free to ask any member of the club.*

Thanks to all members who help out at the meetings from setting up the chairs & tables, laying out the prints and just being willing and able.

PLEASE Always make welcome New members & Visitors.

FOR NEW MEMBERS Always remember to go to the PCC website and download the latest versions of the PCC Constitution-ByLaws and the HANDBOOK ... and Read Them !

Set Subject Guidelines - 2012

Remember that these subjects should always form the **MAIN** part of your set subject Images.

Glass: Glass was first created around 3000BC and now used more than ever so there should be some good diversity in subject matter this month.

Old & New Together: This one should not present any real problems, a quick walk around the city shows many examples.

Science & Technology: Remember to combine both science and the technology aspect in your presentation.

**** READ THIS and TAKE NOTE ****

Monthly competitions are held in the following sections:

Colour Prints, Mono Prints, Altered Reality-Creative Prints, and Projected Digital Images (PDI). All Sections **except** Altered Reality-Creative Prints are GRADED. Members may submit a maximum of 4 images in each section, (**except** Altered Reality-Creative Prints which is a max of 2 images) where set subjects exist, a member may designate 1 or 2 of the images as set subjects.

Printing : Prints entered may be home or commercially printed. All work prior to printing must have been completed by the image author. Prints **must not** be altered by any 3rd party printer.

Sizes : All Prints must meet the minimum and maximum size requirements to be accepted into competition.

Min size, 8" x 10"; Max including mount 16" x 20". Panoramic prints may be entered, they must be a minimum of 10" along it's longest size.

PRINT Entries : Prints must show **Entry CODE** containing Entry Grade-type, Title, Category and Member number ONLY, Code is labelled ONLY on back of the print.

PDI Entries : MUST be 1024 (maximum-H) and 768 (maximum-V) pixels) =XGA Jpeg (*.jpg) files of minimum compression & maximum file size = Q12 standard , sRGB tagged. Image Files must be named as stipulated by the Digital Co-ordinator. Entries to be submitted on a key-tagged USB NB: Refer to changes in By-laws for grades.

Graded End-of-Year entries ... should be NAMED as NORMAL.

Ungraded End-of-Year Nature entries have prefix PCCNat....

Ungraded End-of-Year Outings entries have prefix PCCOut....

Any image gaining a **Merit or Honour** is NOT eligible for entry into further monthly competitions in ANY section. Images gaining **two Acceptances (A)** in any single calendar competition year shall not be eligible for further entry in that same calendar year in any Section but may be **re-entered into competition in a different Section** in the subsequent calendar year ONLY. This Re-entered Image may be altered in a minor way in Composition and Technical content allowing for the change of Section, and must be specifically named with the same Title as the original, suffixed with the term (REV) meaning revised Image.

UNDERSTANDING EXPOSURE:

Achieving the correct exposure is a lot like collecting rain in a bucket. While the rate of rainfall is uncontrollable, three factors remain under your control: the bucket's width, the duration you leave it in the rain, and the quantity of rain you want to collect. You just need to ensure you don't collect too little ("underexposed"), but that you also don't collect too much ("overexposed"). The key is that there are many different combinations of width, time and quantity that will achieve this. For example, for the same quantity of water, you can get away with less time in the rain if you pick a bucket that's really wide. Alternatively, for the same duration left in the rain, a really narrow bucket can be used as long as you plan on getting by with less water. In photography, the exposure settings of aperture, shutter speed and ISO speed are analogous to the width, time and quantity discussed above. Furthermore, just as the rate of rainfall was beyond your control above, so too is natural light for a photographer.

Each setting controls exposure differently:

Aperture: controls the area over which light can enter your camera.

Shutter speed: controls the duration of the exposure.

ISO speed: controls the sensitivity of your camera's sensor to a given amount of light.

One can therefore use many combinations of the above three settings to achieve the same exposure. The key, however, is knowing which trade-offs to make, since each setting also influences other image properties. For example, aperture affects depth of field, shutter speed affects motion blur and ISO speed affects image noise.
