

Vita Liberata spray tan is completely non-toxic, 80% organic, and contains a luxurious moisture treatment. With a choice of three stunning shades, Hawaii, Ecuador and Brazil, your skin will be plumped, hydrated & glowing.

To enjoy the best tan result:

PRE-TREATMENT

Shower and exfoliate on the day of your tan and avoid moisturising shower lotions or gels.

Hair removal (waxing/shaving) should be done no closer than 24 hours prior to tanning session.

Do not wear makeup, deodorant or oily skin products to the appointment and avoid moisturising for 24 hours prior to your tan.

Wear or bring loose, dark clothing.

Disposable underwear will be provided but if you prefer to wear something else, bring dark coloured swimwear or underwear.

POST-TREATMENT

Wear loose, dark clothing to avoid transfer onto clothing. In warm weather, avoid wearing a bra. Keep skin covered to prevent transfer onto fabrics when sitting.

Do not put hands in water or get the skin wet - this will affect the development of the tan.

Do not touch the skin with your hands as the bronzer will transfer to palms.

Do not wax/shave for 24 hours following treatment as this removes layers of skin and will remove the tan too.

Avoid exercise or activity that might cause sweating during the first 4 - 8 hours after the tan is applied.

Tan develops within 4 - 8 hours but to allow maximum DHA development, wait a certain amount of time before showering:

- Pale/Hard to tan skin: 8 - 12 hours
- Medium/Sallow skin: 6 - 8 hours

Moisturise twice daily following the spray tan. Only use a product that does not contain essential oils as these oils create a faster fade.

A follow up spray tan can be applied between 5 - 10 days after the appointment as required.

To enhance and prolong your tan, we recommend using Moisture Boost Body Treatment twice daily following application.

TOP TIPS

Up your water intake and eat green leafy vegetable including kale, spinach and rocket, which are high in lysine, to prepare your skin for the best spray tan result.

Hormones, stress, exhaustion and any herbal or prescribed medication may affect your tan, so be aware of this when booking a spray tan appointment.

Avoid using body lotions or shower creams containing essential oils or moisturisers in the 24hrs prior to your spray tan appointment. This will act as a barrier to the tan and reduce its effectiveness.
