Our female-focused list began as an idea that I intended to run for a few months before moving on to another theme. I wanted to utilize this focus as an opportunity to educate myself, our staff and our guests as to what strong female voices in the wine industry are working on and producing all around the world. What started as a 'theme' is now evolving into a more extensive and developed study into the female influence in the wines we love to enjoy. Some of these ladies are winemakers or proprietors, while others are movers and shakers in our community. Some are all of these things.

Our inspiration comes from the excitement and beauty found in the wines that we are sharing with you from all over the world and the women who represent them.

Cheers!

Jennifer Wagoner, Sommelier
