Irvine Wealth Planning Strategies, LLC

10 East Market Street

Corning, NY 14830

Form ADV Part 2A – Firm Brochure

(607)438-2761

Dated October 1, 2016

This Brochure provides information about the qualifications and business practices of Irvine Wealth Planning Strategies, LLC, "IWPS". If you have any questions about the contents of this Brochure, please contact us at (607) 438-2761. The information in this Brochure has not been approved or verified by the United States Securities and Exchange Commission or by any state securities authority.

Irvine Wealth Planning Strategies, LLC is registered as an Investment Adviser located within the State of New York. The information in this Disclosure Brochure has not been approved or verified by the U.S. Securities and Exchange Commission ("SEC") or by any state securities authority. Registration of an Investment Adviser does not imply any level of skill or training. Additional information about IWPS is available on the SEC's website at www.adviserinfo.sec.gov which can be found using the firm's identification number 284120.

Item 2: Material Changes

Form ADV 2 is divided into two parts: *Part 2A (the "Disclosure Brochure")* and *Part 2B (the "Brochure Supplement")*. The Disclosure Brochure provides information about a variety of topics relating to an Advisor's business practices and conflicts of interest. The Brochure Supplement provides information about advisory personnel of Pinnacle.

Irvine Wealth Planning Strategies believes that communication and transparency are the foundation of its relationship with Clients and will continually strive to provide its Clients with complete and accurate information at all times. We encourage all current and prospective Clients to read this Disclosure Brochure and discuss any questions you may have with us; and of course, we always welcome your feedback.

Material Changes

The following changes have been made to this version of the Disclosure Brochure:

- The Advisor's physical and mailing address was changed to 10 East Market Street, Corning, New York 14830
- The Advisor's primary phone number was changed to 607-438-2761
- Section 5: The Advisor has amended the fee structure for its overall advisory services. Please see item 5 for additional information.

Future Changes

From time to time, we may amend this Disclosure Brochure to reflect changes in our business practices, changes in regulations and routine annual updates as required by the securities regulators. This complete Disclosure Brochure or a Summary of Material Changes shall be provided to each Client annually and if a material change occurs in the business practices of Irvine Wealth Planning Strategies.

At any time, you may view the current Disclosure Brochure on-line at the SEC's Investment Adviser Public Disclosure website at www.adviserinfo.sec.gov by searching for our firm name or by our CRD number (284120).

You may also request a copy of this Disclosure Brochure at any time, by contacting us at (607) 438-2761.

Description of Advisory Firm

Irvine Wealth Planning Strategies, LLC (IWPS) is registered as a registered Investment Adviser located in the State of New York. We were founded on May 6, 2016. Amy Irvine is the principal owner of IWPS. Because IWPS is a new entity, its Assets Under Management are not yet reported. This Disclosure Brochure provides information regarding the qualifications, business practices, and the advisory services provided.

Types of Advisory Services

Comprehensive Financial Planning

This service involves working one-on-one with a planner over an extended period of time. By paying a monthly or quarterly retainer, clients get continuous access to a planner who will work with them to design their plan. The planner will monitor the plan, recommend any changes and ensure the plan is up to date.

Upon desiring a comprehensive plan, a client will be taken through establishing their goals and values around money. They will be required to provide information to help complete the following areas of analysis: net worth, cash flow, insurance, credit scores/reports, employee benefit, retirement planning, insurance, investments, college planning and estate planning. Once the client's information is reviewed, their plan will be built and analyzed, and then the findings, analysis and potential changes to their current situation will be reviewed with the client. Clients subscribing to this service will receive a written or an electronic report, providing the client with a detailed financial plan designed to achieve his or her stated financial goals and objectives. If a follow up meeting is required, we will meet at the client's convenience. The plan and the client's financial situation and goals will be monitored throughout the year and follow-up phone calls and emails will be made to the client to confirm that any agreed upon action steps have been carried out. On an annual basis there will be a full review of this plan to ensure its accuracy and ongoing appropriateness. Any needed updates will be implemented at that time.

Portfolio Management Services (IWPS manages accounts)

In conjunction with financial planning, we also offer portfolio management of individually tailored investment portfolios. Our firm provides continuous advice to a client regarding the investment of

client funds based on the individual needs of the client. Through personal discussions in which goals and objectives based on a client's particular circumstances are established, we develop a client's personal investment policy or an investment plan with an asset allocation target and create and manage a portfolio based on that policy and allocation target. During our data-gathering process, we determine the client's individual objectives, time horizons, risk tolerance, and liquidity needs. We may also review and discuss a client's prior investment history, as well as family composition and background.

Account supervision is guided by the stated objectives of the client (i.e., maximum capital appreciation, growth, income, or growth and income), as well as tax considerations. Clients may impose reasonable restrictions on investing in certain securities, types of securities, or industry sectors. Fees pertaining to this service are outlined in Item 5 of this brochure.

IWPS will then construct a portfolio, consisting of institutional and no-load mutual funds and/or exchange-traded funds ("ETFs"), individual stocks, individual bonds, options and other types of investments, as appropriate, to help achieve the Client's investment goals. The Advisor may retain certain types of investments based on a client's legacy portfolio construction.

IWPS will not provide securities custodial or other administrative services. At no time will IWPS accept or maintain custody of a Client's funds or securities, except for authorized deduction of the Advisor's fees. All Client assets will be managed within their designated brokerage account or pension account, pursuant to the Client investment advisory agreement.

Investment Management Services (Outside Firm manages accounts)

In conjunction with financial planning, we offer investment management services by referring clients, where appropriate, to third-party money managers ("Outside Managers") for portfolio management services. We assist clients in selecting an appropriate allocation model, completing the Outside Manager's investor profile questionnaire, interacting with the Outside Manager and reviewing the Outside Manager. Our review process and analysis of outside managers is further discussed in Item 8 of this Form ADV Part 2A. Client may impose reasonable restrictions on their account. Additionally, we will meet with the client on a periodic basis to discuss changes in their personal or financial situation, suitability, and any new or revised restrictions to be applied to the account. ***IWPS is not compensated for portfolio management for accounts managed by outside firms.***

Project-Based Consulting Fee

IWPS may provide, to the extent requested by the client, non-discretionary project-based consulting services on a negotiable, stand-alone separate fee basis. Consulting services are typically offered to non-portfolio management clients who do not require ongoing investment counsel, but seek advice in one or more specific areas of their life (including investment and non-investment related matters). To accommodate those individuals, IWPS is able to provide Project-Based Consulting Services on a more modular level.

In these cases, the services provided by IWPS will address those specific areas of concern and will be included in a Financial Planning/Consulting Agreement negotiated by IWPS and the client.

Advice is based on objectives communicated, either orally or in writing, by the client and the IWPS advisor. Consulting services may be provided through individual consultations and/or a written project document.

Comprehensive Financial Planning and Project-Based Consulting Topics

We provide financial planning services on topics such as retirement planning, risk management, college savings, cash flow, debt management, work benefits, and estate and incapacity planning.

Financial planning is a comprehensive evaluation of a client's current and future financial state by using currently known variables to predict future cash flows, asset values and withdrawal plans. The key defining aspect of financial planning is that through the financial planning process, all questions, information and analysis will be considered as they impact and are impacted by the entire financial and life situation of the client. Clients purchasing this service will receive a written or an electronic report, providing the client with a detailed financial plan designed to achieve his or her stated financial goals and objectives.

In general, the financial plan will address any or all of the following areas of concern. The client and advisor will work together to select the specific areas to cover. These areas may include, but are not limited to, the following:

- **Business Planning:** We provide consulting services for clients who currently operate their own business, are considering starting a business, or are planning for an exit from their current business. Under this type of engagement, we work with you to assess your current situation, identify your objectives, and develop a plan aimed at achieving your goals.
- **Cash Flow and Debt Management:** We will conduct a review of your income and expenses to determine your current surplus or deficit along with advice on prioritizing how any surplus should be used or how to reduce expenses if they exceed your income. Advice may also be provided on which debts to pay off first based on factors such as the interest rate of the debt and any income tax ramifications. We may also recommend what we believe to be an appropriate cash reserve that should be considered for emergencies and other financial goals, along with a review of accounts (such as money market funds) for such reserves, plus strategies to save desired amounts.
- **College Savings:** Includes projecting the amount that will be needed to achieve college or other post-secondary education funding goals, along with advice on ways for you to save the desired

amount. Recommendations as to savings strategies are included, and, if needed, we will review your financial picture as it relates to eligibility for financial aid or the best way to contribute to grandchildren (if appropriate).

- **Employee Benefits Optimization:** We will provide review and analysis as to whether you, as an employee, are taking the maximum advantage possible of your employee benefits. If you are a business owner, we will consider and/or recommend the various benefit programs that can be structured to meet both business and personal retirement goals.
- **Estate Planning:** This usually includes an analysis of your exposure to estate taxes and your current estate plan, which may include whether you have a will, powers of attorney, trusts and other related documents. Our advice also typically includes ways for you to minimize or avoid future estate taxes by implementing appropriate estate planning strategies such as the use of applicable trusts.

We always recommend that you consult with a qualified attorney when you initiate, update, or complete estate planning activities. We may provide you with contact information for attorneys who specialize in estate planning when you wish to hire an attorney for such purposes. From time-to-time, we will participate in meetings or phone calls between you and your attorney with your approval or request.

- **Financial Goals:** We will help clients identify financial goals and develop a plan to reach them. We will identify what you plan to accomplish, what resources you will need to make it happen, how much time you will need to reach the goal, and how much you should budget for your goal.
- **Insurance:** Review of existing policies to ensure proper coverage for life, health, disability, long-term care, liability, home and automobile.
- **Investment Analysis:** This may involve developing an asset allocation strategy to meet clients' financial goals and risk tolerance, providing information on investment vehicles and strategies, reviewing employee stock options, , as well as assisting you in establishing your own investment account at a selected broker/dealer or custodian. The strategies and types of investments we may recommend are further discussed in Item 8 of this brochure.
- **Retirement Planning:** Our retirement planning services typically include projections of your likelihood of achieving your financial goals, typically focusing on financial independence as the primary objective. For situations where projections show less than the desired results, we may make recommendations, including those that may impact the original projections by adjusting certain variables (i.e., working longer, saving more, spending less, taking more risk with

investments).

If you are near retirement or already retired, advice may be given on appropriate distribution strategies to minimize the likelihood of running out of money or having to adversely alter spending during your retirement years.

- **Risk Management:** A risk management review includes an analysis of your exposure to major risks that could have a significant adverse impact on your financial picture, such as premature death, disability, property and casualty losses, or the need for long-term care planning. Advice may be provided on ways to minimize such risks and about weighing the costs of purchasing insurance versus the benefits of doing so and, likewise, the potential cost of not purchasing insurance (“self-insuring”).
- **Tax Planning Strategies:** Advice may include ways to minimize current and future income taxes as a part of your overall financial planning picture. For example, we may make recommendations on which type of account(s) or specific investments should be owned based in part on their “tax efficiency,” with consideration that there is always a possibility of future changes to federal, state or local tax laws and rates that may impact your situation.

We recommend that you consult with a qualified tax professional before initiating any tax planning strategy, and we may provide you with contact information for accountants or attorneys who specialize in this area if you wish to hire someone for such purposes. We will participate in meetings or phone calls between you and your tax professional with your approval.

Educational Workshops and Seminars

IWPS hosts educational workshops and seminars about a variety of financial related topics. The workshops or seminars are not designed to provide specific and personal advice to a specific Client. Instead, as referenced by the title, the workshop or seminars are educational in nature and provide impersonal advice to attendees.

Client Tailored Services and Client Imposed Restrictions

We offer the same suite of services to all of our clients. However, specific client financial plans and their implementation are dependent upon the client and their current situation (income, tax levels, and risk tolerance levels), which is used to construct a client specific plan to aid in the selection of a portfolio that matches restrictions, needs, and targets.

These services may include:

- Establishing an Investment Policy Statement – IWPS, in connection with the Client, may develop a statement that summarizes the Client’s investment goals and objectives along with the broad strategy[ies] to be employed to meet the objectives.
- Asset Allocation – IWPS will develop a strategic asset allocation that is targeted to meet the investment objectives, time horizon, financial situation and tolerance for risk for each Client.
- Portfolio Construction – IWPS will develop a portfolio for the Client that is intended to meet the stated goals and objectives of the Client.
- Investment Management and Supervision – IWPS will provide investment management and ongoing oversight of the Client’s portfolio and overall account.

Wrap Fee Programs

We do not participate in wrap fee programs.

Item 5: Fees and Compensation

Please note, unless a client has received the firm’s disclosure brochure at least 48 hours prior to signing the investment advisory contract, the investment advisory contract may be terminated by the client within five (5) business days of signing the contract without incurring any advisory fees. How we are paid depends on the type of advisory service we are performing. Please review the fee and compensation information below.

Comprehensive Financial Planning and Portfolio Management

Comprehensive Financial Planning consists of an upfront charge of \$500 and an annual fee that many range between \$1,875 and \$10,000 (based on the client service elections). The annual fee is payable on a quarterly or monthly basis, as elected by the client, in advance of services provided for the month or quarter (as determined in the Engagement Agreement). For clients utilizing only Comprehensive Financial Planning, payment for this service is made by check. An this service may be terminated with written notice at least 5 calendar days in advance. Upon termination of the account, any unearned fee will be refunded to the client.

Advisory fees are directly debited from client accounts, or the client may choose to pay by check or electronically. Accounts initiated or terminated during a calendar quarter will be charged a pro-rated fee based on the amount of time remaining in the billing period. An account may be terminated with written notice at least 5 calendar days in advance. Upon termination of the account, any unearned fee will be refunded to the client.

Fees may vary from the above fee schedule depending on the nature and complexity of each Client’s circumstances, or with the inclusion of Financial Planning services, which is offered on an hourly or fixed financial planning fee basis, as described below. An estimate for the total costs will be determined prior to establishing the advisory relationship and will be attached to the Advisory Agreement

Project Based Financial Planning

Project Based Financial Planning will generally be offered on a fixed fee basis. In special circumstances it may be offered on an hourly basis at a rate of \$150 per hour, paid in arrears. This service may be terminated with 5 days' notice. Upon termination, any unearned fee will be prorated and returned to the client.

Fixed fees will be determined on a case by case basis with the fee based on the complexity of the situation and the needs of the client. The fixed fee will be agreed upon before the start of any work. The fixed fee can range between \$500 and \$10,000. The fee is negotiable based on complexity and scope of the services needed. If a fixed fee program is chosen, half of the fee maybe due at the beginning of process and the remainder is due at completion of work, however, IWPS will not bill an amount above \$500.00 more than 6 months in advance.

Investment Management Services (Grandfathered for Clients Prior to 10/01/2016)

Our standard advisory fee is based on the market value of the assets under management and is calculated as follows:

Account Value	Annual Advisory Fee
\$0 - \$1,000,000	1.00%
\$1,000,001 - \$2,000,000	0.75%
\$2,000,001 and Above	0.50%

The annual fees are negotiable and are prorated (prorated fees begin the first month after asset(s) are received) and paid in advance on a quarterly basis pursuant to the terms of the investment advisory agreement. The advisory fee is a blended fee and is calculated by assessing the percentage rates using the predefined levels of assets as shown in the above chart, resulting in a combined weighted fee. For example, an account valued at \$2,000,000 would pay an effective fee of 0.88%. This is determined by the following calculation: $(\$1,000,000 \times 1.00\%) + (\$1,000,000 \times 0.75\%) = \$17,500.00$. No increase in the annual fee shall be effective without agreement from the client by signing a new agreement or amendment to their current advisory agreement.

Educational Workshops and Seminars

At times, IWPS may deliver educational seminars for clients and prospective clients. Generally, IWPS does not charge any fees for attending an educational seminar or workshop. However for certain

Clients (i.e. Business Companies), IWPS will charge \$1,000 per day, plus any travel expenses (if applicable) for any education seminars. Attendees are not required to become Clients of IWPS.

Other Types of Fees and Expenses

Our fees are exclusive of brokerage commissions, transaction fees, and other related costs and expenses which may be incurred by the client. Clients may incur certain charges imposed by custodians, brokers, and other third parties such as custodial fees, deferred sales charges, odd-lot differentials, transfer taxes, wire transfer and electronic fund fees, and other fees and taxes on brokerage accounts and securities transactions. Mutual fund and exchange traded funds also charge internal management fees, which are disclosed in a fund's prospectus. Such charges, fees and commissions are exclusive of and in addition to our fee, and we shall not receive any portion of these commissions, fees, and costs.

Item 12 further describes the factors that we consider in selecting or recommending broker-dealers for client's transactions and determining the reasonableness of their compensation (e.g., commissions).

We do not accept compensation for the sale of securities or other investment products including asset-based sales charges or service fees from the sale of mutual funds.

Item 6: Performance-Based Fees and Side-By-Side Management

We do not offer performance-based fees.

Item 7: Types of Clients

We provide financial planning and portfolio management services to individuals, and high net-worth individuals.

We do not have a minimum account size requirement.

Item 8: Methods of Analysis, Investment Strategies and Risk of Loss

When clients have us complete an Investment Analysis (described in Item 4 of this brochure) as part of their financial plan, our primary methods of investment analysis are fundamental and technical analysis selection of other advisers and Passive investment management.

Fundamental analysis involves analyzing individual companies and their industry groups, such as a company's financial statements, details regarding the company's product line, the experience, and

expertise of the company's management, and the outlook for the company's industry. The resulting data is used to measure the true value of the company's stock compared to the current market value. The risk of fundamental analysis is that information obtained may be incorrect and the analysis may not provide an accurate estimate of earnings, which may be the basis for a stock's value. If securities prices adjust rapidly to new information, utilizing fundamental analysis may not result in favorable performance.

Technical analysis involves using chart patterns, momentum, volume, and relative strength in an effort to pick sectors that may outperform market indices. However, there is no assurance of accurate forecasts or that trends will develop in the markets we follow. In the past, there have been periods without discernible trends and similar periods will presumably occur in the future. Even where major trends develop, outside factors like government intervention could potentially shorten them.

Furthermore, one limitation of technical analysis is that it requires price movement data, which can translate into price trends sufficient to dictate a market entry or exit decision. In a trendless or erratic market, a technical method may fail to identify trends requiring action. In addition, technical methods may overreact to minor price movements, establishing positions contrary to overall price trends, which may result in losses. Finally, a technical trading method may underperform other trading methods when fundamental factors dominate price moves within a given market.

We employ the use of sub-advisers ("outside managers"). Our analysis of outside managers involve the examination of the experience, expertise, investment philosophies, and past performance of the outside managers in an attempt to determine if that manager has demonstrated an ability to invest over a period of time and in different economic conditions. We monitor the manager's underlying holdings, strategies, concentrations and leverage as part of our overall periodic risk assessment. Additionally, as part of our due-diligence process, we survey the manager's compliance and business enterprise risks. A risk of investing with an outside manager who has been successful in the past is that he/she may not be able to replicate that success in the future. In addition, as we do not control the underlying investments in an outside manager's portfolio. There is also a risk that a manager may deviate from the stated investment mandate or strategy of the portfolio, making it a less suitable investment for our clients. Moreover, as we do not control the manager's daily business and compliance operations, we may be unaware of the lack of internal controls necessary to prevent business, regulatory or reputational deficiencies.

Passive Investment Management

We primarily practice passive investment management. Passive investing involves building portfolios that are comprised of various distinct asset classes. The asset classes are weighted in a manner to achieve a desired relationship between correlation, risk and return. Funds that passively capture the returns of the desired asset classes are placed in the portfolio. The funds that are used to build passive portfolios are typically index mutual funds or exchange traded funds.

Passive investment management is characterized by low portfolio expenses (i.e. the funds inside the portfolio have low internal costs), minimal trading costs (due to infrequent trading activity), and relative tax efficiency (because the funds inside the portfolio are tax efficient and turnover inside the portfolio is minimal).

In contrast, active management involves a single manager or managers who employ some method, strategy or technique to construct a portfolio that is intended to generate returns that are greater than the broader market or a designated benchmark. Academic research indicates most active managers underperform the market. From time-to-time, we do utilize active managers within portfolio's were we feel it is suited.

Material Risks Involved

All investing strategies we offer involve risk and may result in a loss of your original investment which you should be prepared to bear. Many of these risks apply equally to stocks, bonds, commodities and any other investment or security. Material risks associated with our investment strategies are listed below.

Market Risk: Market risk involves the possibility that an investment's current market value will fall because of a general market decline, reducing the value of the investment regardless of the operational success of the issuer's operations or its financial condition.

Strategy Risk: The Adviser's investment strategies and/or investment techniques may not work as intended.

Small and Medium Cap Company Risk: Securities of companies with small and medium market capitalizations are often more volatile and less liquid than investments in larger companies. Small and medium cap companies may face a greater risk of business failure, which could increase the volatility of the client's portfolio.

Concentration Risk: Certain investment strategies focus on particular asset-classes, industries, sectors or types of investment. From time to time these strategies may be subject to greater risks of adverse developments in such areas of focus than a strategy that is more broadly diversified across a wider variety of investments.

Interest Rate Risk: Bond (fixed income) prices generally fall when interest rates rise, and the value may fall below par value or the principal investment. The opposite is also generally true: bond prices generally rise when interest rates fall. In general, fixed income securities with longer maturities are more sensitive to these price changes. Most other investments are also sensitive to the level and direction of interest rates.

Legal or Legislative Risk: Legislative changes or Court rulings may impact the value of investments, or the securities' claim on the issuer's assets and finances.

Inflation: Inflation may erode the buying-power of your investment portfolio, even if the dollar value of your investments remains the same.

Risks Associated with Securities

Apart from the general risks outlined above which apply to all types of investments, specific securities may have other risks.

Common stocks may go up and down in price quite dramatically, and in the event of an issuer's bankruptcy or restructuring could lose all value. A slower-growth or recessionary economic environment could have an adverse effect on the price of all stocks.

Corporate Bonds are debt securities to borrow money. Generally, issuers pay investors periodic interest and repay the amount borrowed either periodically during the life of the security and/or at maturity. Alternatively, investors can purchase other debt securities, such as zero coupon bonds, which do not pay current interest, but rather are priced at a discount from their face values and their values accrete over time to face value at maturity. The market prices of debt securities fluctuate depending on such factors as interest rates, credit quality, and maturity. In general, market prices of debt securities decline when interest rates rise and increase when interest rates fall. The longer the time to a bond's maturity, the greater its interest rate risk.

Bank Obligations including bonds and certificates of deposit may be vulnerable to setbacks or panics in the banking industry. Banks and other financial institutions are greatly affected by interest rates and may be adversely affected by downturns in the U.S. and foreign economies or changes in banking regulations.

Municipal Bonds are debt obligations generally issued to obtain funds for various public purposes, including the construction of public facilities. Municipal bonds pay a lower rate of return than most other types of bonds. However, because of a municipal bond's tax-favored status, investors should compare the relative after-tax return to the after-tax return of other bonds, depending on the investor's tax bracket. Investing in municipal bonds carries the same general risks as investing in bonds in general. Those risks include interest rate risk, reinvestment risk, inflation risk, market risk, call or redemption risk, credit risk, and liquidity and valuation risk.

Options and other derivatives carry many unique risks, including time-sensitivity, and can result in the complete loss of principal. While covered call writing does provide a partial hedge to the stock against which the call is written, the hedge is limited to the amount of cash flow received when writing the option. When selling covered calls, there is a risk the underlying position may be called away at a price lower than the current market price.

Exchange Traded Funds prices may vary significantly from the Net Asset Value due to market conditions. Certain Exchange Traded Funds may not track underlying benchmarks as expected.

Investment Companies Risk. When a client invests in open end mutual funds or ETFs, the client indirectly bears its proportionate share of any fees and expenses payable directly by those funds. Therefore, the client will incur higher expenses, many of which may be duplicative. In addition, the client's overall portfolio may be affected by losses of an underlying fund and the level of risk arising from the investment practices of an underlying fund (such as the use of derivatives). ETFs are also subject to the following risks: (i) an ETF's shares may trade at a market price that is above or below their net asset value; (ii) the ETF may employ an investment strategy that utilizes high leverage ratios; or (iii) trading of an ETF's shares may be halted if the listing exchange's officials deem such action appropriate, the shares are de-listed from the exchange, or the activation of market-wide "circuit breakers" (which are tied to large decreases in stock prices) halts stock trading generally. The Adviser has no control over the risks taken by the underlying funds in which client's invest.

Item 9: Disciplinary Information

Registered investment advisers are required to disclose all material facts regarding any legal or disciplinary events that would be material to your evaluation of IWPS or the integrity of our management. We have no information applicable to this Item.

Item 10: Other Financial Industry Activities and Affiliations

Amy Irvine currently serves as the Chief Compliance Officer of Pinnacle Financial Wealth Management. This is expected to end on or before December 31st, 2016. Thereafter, Mrs. Irvine may provide financial planning services to clients of Pinnacle Financial Wealth Management on a referral basis; however, the two companies will be independent of each other.

Item 11: Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

As a fiduciary, our firm and its associates have a duty of utmost good faith to act solely in the best interests of each client. Our clients entrust us with their funds and personal information, which in turn places a high standard on our conduct and integrity. Our fiduciary duty is a core aspect of our Code of Ethics and represents the expected basis of all of our dealings. The firm also adheres to the Code of Ethics and Professional Responsibility adopted by the CFP® Board of Standards Inc., and accepts the

obligation not only to comply with the mandates and requirements of all applicable laws and regulations but also to take responsibility to act in an ethical and professionally responsible manner in all professional services and activities.

This code does not attempt to identify all possible conflicts of interest, and literal compliance with each of its specific provisions will not shield associated persons from liability for personal trading or other conduct that violates a fiduciary duty to advisory clients. A summary of the Code of Ethics' Principles is outlined below.

- Integrity - Associated persons shall offer and provide professional services with integrity.
- Objectivity - Associated persons shall be objective in providing professional services to clients.
- Competence - Associated persons shall provide services to clients competently and maintain the necessary knowledge and skill to continue to do so in those areas in which they are engaged.
- Fairness - Associated persons shall perform professional services in a manner that is fair and reasonable to clients, principals, partners, and employers, and shall disclose conflict(s) of interest in providing such services.
- Confidentiality - Associated persons shall not disclose confidential client information without the specific consent of the client unless in response to proper legal process, or as required by law.
- Professionalism - Associated persons' conduct in all matter shall reflect credit of the profession.
- Diligence - Associated persons shall act diligently in providing professional services.

We will, upon request, promptly provide a complete code of ethics.

Our firm and its "related persons" (associates, their immediate family members, etc.) may buy or sell securities the same as, similar to, or different from, those we recommend to clients for their accounts. A recommendation made to one client may be different in nature or in timing from a recommendation made to a different client. Clients often have different objectives and risk tolerances. At no time, however, will our firm or any related party receive preferential treatment over our clients.

In an effort to reduce or eliminate certain conflicts of interest involving the firm or personal trading, our policy may require that we restrict or prohibit associates' transactions in specific securities transactions. Any exceptions or trading pre-clearance must be approved by our Chief Compliance Officer in advance of the transaction in an account, and we maintain the required personal securities transaction records per regulation.

Item 12: Brokerage Practices

Factors Used to Select Custodians and/or Broker-Dealers

Irvine Wealth Planning Strategies, LLC does not have any affiliation with Broker-Dealers. Specific custodian recommendations are made to client based on their need for such services. We recommend custodians based on the reputation and services provided by the firm.

1. Research and Other Soft-Dollar Benefits

We currently do not receive soft dollar benefits.

2. Brokerage for Client Referrals

We receive no referrals from a broker-dealer or third party in exchange for using that broker-dealer or third party.

3. Clients Directing Which Broker/Dealer/Custodian to Use

We do recommend a specific custodian for clients to use, however, clients may custody their assets at a custodian of their choice. Clients may also direct us to use a specific broker-dealer to execute transactions. By allowing clients to choose a specific custodian, we may be unable to achieve most favorable execution of client transaction and this may cost clients' money over using a lower-cost custodian.

Aggregating (Block) Trading for Multiple Client Accounts

Generally, we combine multiple orders for shares of the same securities purchased for advisory accounts we manage (this practice is commonly referred to as "block trading"). We will then distribute a portion of the shares to participating accounts in a fair and equitable manner. The distribution of the shares purchased is typically proportionate to the size of the account, but it is not based on account performance or the amount or structure of management fees. Subject to our discretion, regarding particular circumstances and market conditions, when we combine orders, each participating account pays an average price per share for all transactions and pays a proportionate share of all transaction costs. Accounts owned by our firm or persons associated with our firm may participate in block trading with your accounts; however, they will not be given preferential treatment.

Item 13: Review of Accounts

Client accounts with the Investment Management Service will be reviewed regularly; desirably on a quarterly basis, but no less than annually, by Amy Irvine. During the regular review the account's performance is compared against like-managed accounts to identify any unacceptable performance deviation. Additionally, reasonable client imposed restrictions will be reviewed to confirm that they are being enforced. Events that may trigger a special review would be unusual performance, addition or deletions of client imposed restrictions, excessive draw-down, volatility in performance, or buy and sell decisions from the firm or per client's needs.

Clients will receive trade confirmations from the custodian(s) for each transaction in their accounts as well as monthly or quarterly statements and annual tax reporting statements from their custodian showing all activity in the accounts, such as receipt of dividends and interest.

IWPS will provide written reports to Investment Management clients at least annually. We urge clients to compare these reports against the account statements they receive from their custodian.

Item 14: Client Referrals and Other Compensation

We do not receive any economic benefit, directly or indirectly from any third party for advice rendered to our clients. Nor do we directly or indirectly compensate any person who is not advisory personnel for client referrals.

Item 15: Custody

IWPS does not have custody, except for in the instance of withdrawing client fees. IWPS sends a copy of the invoice to the custodian or trustee at the same time a copy is sent to the client. The custodian sends quarterly statements to the client showing all disbursements for the custodian account, including the amount of the advisory fees. Clients provide written authorization permitting IWPS to be paid directly for their accounts held by the custodian or trustee. Clients should receive at least quarterly statements from the broker dealer, bank or other qualified custodian that holds and maintains client's investment assets.

Item 16: Investment Discretion

For those client accounts where we provide investment management services, we maintain discretion over client accounts with respect to securities to be bought and sold and the amount of securities to be bought and sold. Investment discretion is explained to clients in detail when an advisory relationship has commenced. At the start of the advisory relationship, the client will execute a Limited Power of Attorney which will grant our firm discretion over the account. Additionally, the discretionary relationship will be outlined in the advisory contract and signed by the client.

Item 17: Voting Client Securities

IWPS in connection with its fiduciary to our clients, has responsibility for voting proxies for portfolio securities consistent with the best economic interests each Client. IWPS maintains proxy-voting policies and procedures to guide its voting practices, which is available to Clients upon request. The Advisor shall monitor for corporate actions and proxies received from the Custodian and vote such proxies consistent with its policies and the best interest of Clients. In the unlikely event that a conflict of interest arises, the Advisor will disclose such conflict to the Client and may abstain from voting. Clients may request information regarding how IWPS has voted a Client's proxies and Clients may request a copy of the IWPS's proxy policies and procedures at any time.

Clients must direct the Custodian to deliver proxies and related information to the Advisor in order for the Advisor to assume this responsibility.

Item 18: Financial Information

Registered investment advisers are required in this Item to provide you with certain financial information or disclosures about our financial condition. We have no financial commitment that impairs our ability to meet contractual and fiduciary commitments to clients, and we have not been the subject of a bankruptcy proceeding.

We do not have custody of client funds or securities or require or solicit prepayment of more than \$500 in fees per client six months in advance.

Item 19: Requirements for State-Registered Advisers

Professional Designations, Licensing & Exams

CERTIFIED FINANCIAL PLANNER™, CFP® and federally registered CFP (with flame design) marks (collectively, the “CFP® marks”) are professional certification marks granted in the United States by Certified Financial Planner Board of Standards, Inc. (“CFP Board”).

The CFP® certification is a voluntary certification; no federal or state law or regulation requires financial planners to hold CFP® certification. It is recognized in the United States and a number of other countries for its (1) high standard of professional education; (2) stringent code of conduct and standards of practice; and (3) ethical requirements that govern professional engagements with clients. Currently, more than 68,000 individuals have obtained CFP® certification in the United States.

To attain the right to use the CFP® marks, an individual must satisfactorily fulfill the following requirements:

- **Education** – Complete an advanced college-level course of study addressing the financial planning subject areas that CFP Board’s studies have determined as necessary for the competent and professional delivery of financial planning services, and attain a Bachelor’s Degree from a regionally accredited United States college or university (or its equivalent from a foreign university). CFP Board’s financial planning subject areas include insurance planning and risk management, employee benefits planning, investment planning, income tax planning, retirement planning, and estate planning;
- **Examination** – Pass the comprehensive CFP® Certification Examination. The examination, administered in 10 hours over a two-day period, includes case studies and client scenarios designed to test one’s ability to correctly diagnose financial planning issues and apply one’s knowledge of financial planning to real world circumstances;
- **Experience** – Complete at least three years of full-time financial planning-related experience (or the equivalent, measured as 2,000 hours per year); and
- **Ethics** – Agree to be bound by CFP Board’s *Standards of Professional Conduct*, a set of documents outlining the ethical and practice standards for CFP® professionals.

Individuals who become certified must complete the following ongoing education and ethics requirements in order to maintain the right to continue to use the CFP® marks:

- **Continuing Education** – Complete 30 hours of continuing education hours every two years, including two hours on the *Code of Ethics* and other parts of the *Standards of Professional*

Conduct, to maintain competence and keep up with developments in the financial planning field; and

- **Ethics** – Renew an agreement to be bound by the *Standards of Professional Conduct*. The *Standards* prominently require that CFP® professionals provide financial planning services at a fiduciary standard of care. This means CFP® professionals must provide financial planning services in the best interests of their clients.

CFP® professionals who fail to comply with the above standards and requirements may be subject to CFP Board’s enforcement process, which could result in suspension or permanent revocation of their CFP® certification.

Chartered Advisor for Senior Living® (“CASL®”) is a designation of specialized knowledge of retirement planning. Holders of the CASL® designation are prepared to lead clients from middle age through retirement and assist them with the management, preservation, and transfer of wealth.

Program Learning Objectives:

- Demonstrate and understanding of the psychological, biological and sociological factors facing older clients in order to more effectively meet their unique needs.
- Aid clients in making decisions about investment and estate planning.
- Identify and analyze health and long-term care financing alternatives for seniors.
- Assist clients in making the decisions they face at retirement, including when to claim Social Security, how to taken pension distributions, choosing annuities, and deciding between residential options.

Master Planner Advanced Studies (“MPAS®”) is offered to the Master of Science Degree graduates from the College for Financial Planning.

Program Learning Objectives:

- The program consists of 36-43 semester credits and delves deeply into personal financial planning or investment-related content using research-based coursework and real-world case studies.
- Graduates of the program are required to demonstrate critical thinking skills and complex problem-solving techniques.
- Additionally, individuals must complete assignments, projects, research, and papers and meet all graduation requirements for the Master of Science degree.
- All designees have agreed to adhere to Standards of Professional Conduct and are subject to a disciplinary process.
- Designees renew their designation every two-years by completing 40 hours of content-specific continuing education, reaffirming adherence to the Standards of Professional Conduct and complying with self-disclosure requirements.

Other Business Activities
