

Caring for Your SapphirePine

Congratulations on your SapphirePine purchase! By choosing a SapphirePine design, you beautify your home and help to transform California's forests for the better at the same time. Thank you!

Just like us, wood furniture requires proper care to look its best. To maintain the beauty of your SapphirePine furniture long into the future, please follow these simple guidelines:

To protect the surface:

- Wipe up liquid spills immediately with a cotton cloth or paper towel—the wood already has a beautiful blue color—no need to add red wine or purple grape juice stains.
- Use coasters and hot plates—the wood's natural growth rings are more beautiful than liquid rings.
- Avoid using your SapphirePine furniture directly as a writing surface—you don't want to engrave it with your journal entry or first draft of your novel!

To clean:

- Use a towel (paper or cotton), dish soap (not industrial or special cleaners), and water.
- Wipe dry after cleaning.
- Avoid abrasive scrubbers or chemical cleaners, just as you would with your own skin.

To preserve:

- Put your new SapphirePine furniture indoors where you are comfortable. If you wouldn't want to spend 3 hours there, your SapphirePine furniture wouldn't either.
- Avoid excessive humidity (for example, steamy bathrooms).
- Keep your furniture out of prolonged exposure to direct sunlight—the wood is not interested in a suntan.

That's it! We hand-selected the highest quality, durable wood for your SapphirePine furniture. Following these guidelines will help you maintain its beauty and style.

If you have any questions, please contact us at hello@sapphirepine.com. We want you to love your SapphirePine design as much as we do, and we're always happy to chat!
