

CARE + MAINTENANCE | CABANA X

01 CABANA X CLEANING

Care and maintenance are required to ensure the proper lifetime of your Cabana X. Mildew and mold grow on dirt, pollen, and other organic matter; so simple routine cleanings will prevent them from forming on powder coated aluminum and fabrics. Keep louvers open when not in use and take out and store the louvers in a dry place during the off-season. Extra care is required if the cabana is used by an indoor pool or near the seaside.
