Ahead developed the first Aheadinscriber™ engraving machine years ago to help retail shops capitalize on personalization of our various metal accessories, and it was a tremendous success! Those shops that have been engraving bag tags, money clips, and other items for their members or guests will tell you that it is the easiest money they have ever made! With the new Aheadinscriber™ 2.0, it just got even easier!

**FEATURES**

**COMPACT SIZE**
With a footprint of H.15" x W.9" x D.10" and a weight of just 18 pounds, the AHEADINSCRIBER™ 2.0 is suitable for a retail counter. Get it out in the open to generate demand!

**QUIET**
The diamond drag engraving is housed in an insulated compartment to keep things to a whisper. Shhh...

**SELF CONTAINED SOFTWARE**
There’s no need for a PC to operate the machine. The proprietary AHEADINSCRIBER™ 2.0 software and engraving mechanism are all within the same unit!

**TOUCH SCREEN TECHNOLOGY**
Use the included stylus, golf tee, or a fingertip to advance through the self guided software. Choose the item you wish to engrave, select from various text layouts, key in the words, and GO!

**HARDWARE FREE JIGS**
Each engravable accessory comes with a form fitting jig that makes it easy to plug in the accessory without the need for a jewelers’ vise. The AHEADINSCRIBER™ 2.0 software is synced with the jig so the names are perfectly positioned every time. Round peg, round hole. Easy.

Slide-show The machine speaks for itself...sort of. A slide-show of your shop logo, pricing information, photos of engraved accessories flips silently on the LCD display when the machine is not in use.
