

LINKED CALENDAR INTEGRATION

KEEPING TRAVELERS ON TRACK

Keeping track of travel calendars is difficult and frustrating. If trip plans change or a flight is disrupted, travelers' calendars are suddenly out of date. They're likely to miss an important meeting, arrive at the airport late or show up at the wrong hotel.

With Deem's Linked Calendar these worries are a thing of the past.

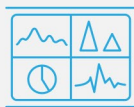

Deem's automated calendar integration allows travelers to connect their travel reservations with enterprise and personal calendars. If a travel delegate books a trip for someone else, the itinerary automatically appears on the traveler's calendar. Deem Linked Calendar is **fully integrated with Microsoft Exchange Server, IBM (Lotus) Domino, iCal and Google Calendar** and accessible online and offline, via mobile, sharable and connected to an address book.

Benefits of Linked Calendar

No manual calendar entries. It's all automatic!

Details are always immediately accessible

Accessible via smartphone

Updates sync automatically

No travel delegate calendar entry, copy and paste

For Travel Managers: Deem Clock Work Features

Your job is mission control. Provide travelers with the industry-winning tools and best compliant choices - with easy enablement of Linked Calendars your travelers will always stay on track.

Compliance

Direct travelers to compliant options and help them make the best choices.

Convenience

Know your travelers are taken care of on the road, with access to a powerful platform designed exactly the way they want.

Control

Manage spend across all categories and increase adoption with an easy-to-use and feature-rich platform your travelers will actually want to use.

For Travelers: Deem Road Work Features

Deem Road Work is a beautifully designed platform, serving mission critical solutions travelers need. With Linked Calendar Traveler can focus on doing business - not on manual cutting and pasting of trip itineraries.

Critical Information

Upcoming trip information, confirmation numbers, seat assignments - it's all in the Linked Calendar invite, mobile notification and email reminder.

Changes

Disruptions happen. Master the worst with easy to access reservation records and dynamic content.

Connected

Travelers can connect devices to receive updates exactly the way they want - be it on mobile or desktop.
