

TRAVEL & EXPENSE

DEEM'S NEW INTEGRATED WORK FOURCE

All Business. No Trip. The most difficult part of any business trip is too often the trip itself. It shouldn't be. We make it easier for the traveler to get down to business without distraction. We make it simple for the manager to keep track of all the moving parts. And we support our partners with the information they need to stay competitive. We have 35,000 corporate customers and growing, and the world's largest travel management companies are now on the Deem platform. We've figured out how to cut through the crap in the travel business. **We get it.**

Deem Travel and Expense

Deem provides the most advanced consumer grade, global online booking and expense platform. Deem's seamless experience across desktop and mobile app drive traveler adoption, provide customizable policy control and enable efficient travel spend management.

Integrated Policy Drives Savings

Building company policy is simple, but implementation and enforcement can be difficult. Deem takes a consultative approach, designing and building a policy program that's integrated and fully customized to control spend, before spend happens.

Automated Ticket Exchange

A powerful tool that completely automates the use of unused tickets, by flagging their availability and dynamically calculating their value during the shopping experience. Travelers are prompted to use aging tickets by flagging airlines in the new trip booking process and the system automatically recalculates the exchange, inclusive of all penalties and taxes for both domestic and international flights.

Mobile Receipt Capture and Automated Receipt Processing

With Deem Work Fource's travel and expense integration, travelers can leave their receipts behind. Travelers simply capture an image of the receipt using the Deem mobile app and Deem's automated receipt processing combines optical character recognition with human-verification to send a copy of the receipt to the traveler's digital wallet.

Pre-Trip Approval

Deem's unique Pre-Trip Approval and notification workflow provides the flexibility to review 100% of bookings but only act on those that are out of policy. Companies save money by giving travelers a consumer like experience with booking and choices of content. They don't need to visit other sites, so enforcing policy becomes effortless. Deem also drives efficiency with traveler reminders such as visa application requirements so there are no surprises at the airport.

Modern User Experience

An intuitive and dynamic design across desktop and mobile platforms. Easily search and compare air, hotel, rental car and car service options. Flexible policy filters and preferred supplier icons (including TripAdvisor reviews, photos and amenities) drive higher adoption and compliance.

Personalized Travel Preferences

Travelers can easily personalize Deem Work Fource to their exact preference. They can assign seat and meal choices on flights, add frequent flyer, hotel loyalty and other related programs. They can customize notifications for assistants, co-workers and family members to keep them informed.

DEEM TRAVEL HIGHLIGHTS
