

# WORK FOURCE

## BUSINESS TRAVEL SOLUTIONS THAT WORK

**All Business. No Trip.** The most difficult part of any business trip is too often the trip itself. It shouldn't be. We make it easier for the traveler to get down to business without distraction. We make it simple for the manager to keep track of all the moving parts. And we support our partners with the information they need to stay competitive. We have 35,000 corporate customers and growing, and the world's largest travel management companies are now on the Deem platform. We've figured out how to cut through the crap in the travel business. **We get it.**

### Deem Work Fource

Deem Work Fource is a suite of travel booking and management tools for the entire business travel ecosystem. Deem Work Fource brings beautiful design, machine learning and customization together to provide travelers, travel managers, TMCs and suppliers with a dynamic and seamless platform - all the way from shopping and booking to applying policy and managing costs.

#### Deem Road Work, for Travelers

Mobile and desktop apps for planning, booking and updating trips with unprecedented ease and flexibility, thanks to a variety of intelligent features such as personalized recommendations and pre-emptive assistance.

#### Deem Book Work, for the Travel Management Companies

A fast, flexible and efficient set of administrative tools that streamline agency processes to better serve corporate clients while also growing revenue.

#### Deem Clock Work, for Corporate Travel Managers

A robust set of tools for managing travel programs, spurring adoption, and fostering compliance, driven by a uniquely flexible and comprehensive policy engine.

#### Deem Net Work, for Suppliers

Powerful APIs and services enabling providers of air, hotel, rail, ground, and other logically adjacent content and services, to market their products and services in the Deem platform.

## DEEM WORK FOURCE FEATURES

### Online Booking

A modern online booking and management system for desktop and mobile usage which offers content, policy, and approval workflow for travelers, travel managers and travel management companies.

### Open Expense

A configurable API that connects to any external expense platform.

### Proactive Check-In

Access to free 24-hour auto check-in on Southwest Airlines, guaranteeing a 90% placement in A + B boarding.

### Dynamic Messaging

Allows for customizable messaging, based on individuals or groups. Messages can be assigned to content or behavior, such as out of policy bookings and real-time emergency or weather challenges.

### Universal Content

Localized content across the globe, in 15 languages, including low cost carriers and rail. Exclusive access to Google ITA flight search and Southwest Direct Access.

### Policy Builder

A robust policy engine that's a snap to use. Supports complex cost control, including interactive pre-trip approval, seamless workflows, dynamic flagging and contextual messaging.

### Intelligent Meetings

Full integration with meetings platforms, including Cvent. Onboard users through Deem's single sign on to reduce implementation time and apply customized policies.

### Intelligent Attach

An artificial intelligence and machine learning technology that predicts preferred hotels for travelers based on history, preference, and +200 million real-time sentiment data points.

### Automated Ticket Exchange

A powerful tool that automates the use of unused tickets. Dynamic icons on new booking options to inform the traveler of available credits.

### Linked Calendar

Automatic and dynamic calendar entries are created with every travel booking - accessible online and offline, via mobile, sharable and connected to an address book. Fully integrated with Exchange Server, LDAP, iCal and Google Calendar.

### Preferred Content

Access to unique and discounted content including Alaska Airlines, Booking.com, Virgin America, Southwest Airlines and SilverRail.

### Preemptive Assistance

Deem's Work Fource platform intelligently predicts when travelers need to review travel plans, adjust their bookings and attach hotels or car service.

### PNR Editor

Designed to create consistency between online and offline Passenger Name Records (PNR) for travel management company back-office, fulfillment and reporting needs.
