

EZY-TAB

Part No. ET-2017

The Ezy-Tab is to be installed on the trailing edge of the lower unit skeg on the starboard (right) side. The Ezy-Tab has a lip on the flat side which is to index on the trailing edge of the skeg. With Ezy-Tab in position as indicated in drawing, drill hole in one position using Ezy-Tab as a drill template. Install screw in this hole to hold Ezy-Tab in position. Repeat for remaining holes.

NOTE: On some lower unit skegs, it may be necessary to shorten the Ezy-Tab because of the length of the skeg.

If screws penetrate the skeg, use a file and carefully file the ends of the screws down smooth with skeg.

MAINTENANCE INSTRUCTIONS: Maintenance inspection is the owner's responsibility and must be performed as follows:

- *Check mounting hardware for adequate tightness.*
- *Check for cracks or broken area that may have occurred by striking objects with lower unit.*
- **NOTE: Operation in salt water areas is considered SEVERE SERVICE.**
