**LWCF Success in Alabama**

The Land and Water Conservation Fund (LWCF) has provided funding to help protect some of Alabama's most special places and ensure recreational access for hunting, fishing and other outdoor activities. Alabama has received approximately $164.9 million in LWCF funding over the past five decades, protecting places such as the Bon Secour and Cahaba National Wildlife Refuges, Little River Canyon National Preserve, and Talladega, Tuskegee and Bankhead National Forests.

Forest Legacy Program (FLP) grants are also funded under LWCF, to help protect working forests. The FLP cost-share funding supports timber sector jobs and sustainable forest operations while enhancing wildlife habitat, water quality and recreation. For example, the FLP contributed to places such as the Mobile Tensaw Delta in Mobile and Baldwin Counties and Cumberland Mountains Preserve in Jackson County. The FLP assists states and private forest owners to maintain working forest lands through matching grants for permanent conservation easement and fee acquisitions, and has leveraged approximately $17 million in federal funds to invest in Alabama’s forests, while protecting air and water quality, wildlife habitat, access for recreation and other public benefits provided by forests.

LWCF state assistance grants have further supported hundreds of projects across Alabama's state and local parks including John B. Lagarde Park in Anniston, the Skyline Wildlife Management Area in Chambers County, and Lake Guntersville State Park in Marshall County.

**Economic Benefits**

Active outdoor recreation is an important part of the Alabama economy. The Outdoor Industry Association has found that active outdoor recreation generates $14 billion in consumer spending in Alabama, 135,000 jobs which generate $3.9 billion in wages and salaries, and produces $857 million annually in state and local tax revenue. Further, the U.S. Census reports that each year 2.1 million people hunt, fish, or enjoy wildlife-watching in Alabama, contributing over $2.2 billion in wildlife recreation spending to the state economy.
LWCF is a simple idea: that a portion of offshore drilling fees should be used to protect important land and water for all Americans. These are not taxpayer dollars. Unfortunately, the promise of LWCF has been broken. The program is authorized to receive up to $900 million each year—but most of these funds have been diverted elsewhere. Now is the time to fix this and ensure that funds retained in the LWCF account are used for their intended conservation and recreation purposes.

LWCF supports the acquisition of land and conservation easements to protect our national parks, wildlife refuges, forests, trails, and BLM sites, grants funds to the states for local and state park needs, protects critical wildlife habitat, watersheds and recreational access, and conserves working farms, ranches and forestlands that enhance local economies.

Cahaba River National Wildlife Refuge

The Cahaba River remains Alabama’s only free flowing river, and its wild habitat currently supports 64 rare and imperiled plant and animal species. Recognizing the need to protect this piece of America’s natural heritage, Congress authorized the creation of the Cahaba River National Wildlife Refuge in 2000. Using LWCF funds, approximately 3,000 acres of land along the banks of the Cahaba River have been protected. When complete, the wildlife refuge will provide countless recreation opportunities, including hiking, fishing, canoeing, hunting, outdoor education, and wildlife viewing.

Status of the Land and Water Conservation Fund

In 2019, permanent authorization of LWCF was secured as part of S. 47, the John D. Dingell, Jr. Conservation, Management, and Recreation Act. Passage of the Dingell Act ensures that LWCF no longer faces the uncertainty of potential expiration, and that the unique structure and inflow of funds to LWCF is protected. The focus is now on permanent full funding for LWCF – ensuring that each year the $900 million deposited into the LWCF account actually goes towards conservation and recreation priorities. Over the 55 years of the program, over $22 billion has been diverted from LWCF to other, unknown purposes. That means that our public lands, waters, and historic sites have been put in peril. As open space continues to shrink, LWCF investments become even more critical to providing the outdoor opportunities for all future generations.

The Land and Water Conservation Fund Permanent Funding Act – S. 1081 and H.R. 3195 – have passed through their respective committees and are ready for floor votes in both chambers.
