

ETHOS

WOODFIRES

Australia Woodfire Pricelist
November 2020 Edition

The **evolution** of the wood fire as a **clean and efficient** heating solution.

ethosfires.com.au

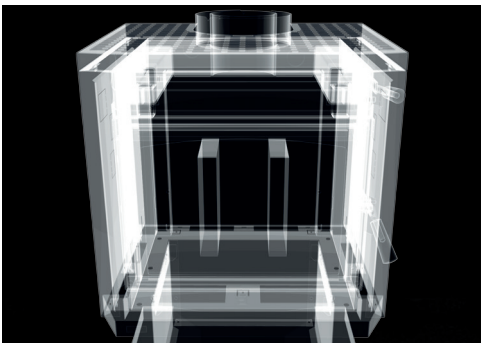

five reasons why

ETHOS
WOODFIRES

draft free operation for airtight homes

Ethos unique flue system draws all its combustion air from outside the building, meaning the fire does not interact with the internal air. Ethos fires work perfectly in airtight environments, and in older buildings they reduce cold drafts so you'll feel warmer, longer.

a smarter designed firebox

Incoming air is preheated by the hot exhaust inner flue, delivering super heated combustion air. The specially designed firebox creates four distinct burn areas, delivering you more heat from the wood you burn and less smoke going up the chimney.

big things from a small package

Our compact firebox delivers similar heating power to much larger fires from other companies. Take your room back with a powerful Ethos fire, and get more heat out while you burn less wood.

low emission and highly efficient

A hot fire is a clean fire, and Ethos fires are some of the cleanest. Burn soft or hard woods with ease, and get more heat from less wood compared to other less efficient fires. Ideal for urban areas, the emissions from an Ethos fire are among the lowest in the market.

coloured to suit your room

Change the fire to fit your decor, not your decor to suit the fire. With more than 160 colour options available you can customise the fire make a bold statement, or make your fire a more subtle appliance. The choice is yours.

Freestanding Fire

Model	Description	RRP
FS100-xxxxx	Genesis Freestanding Woodfire (replace xxxxx with colour chart code)	4,499

flue kit details

 This Flue Kit must be installed by a suitably qualified tradesperson or a solid fuel heater installer.

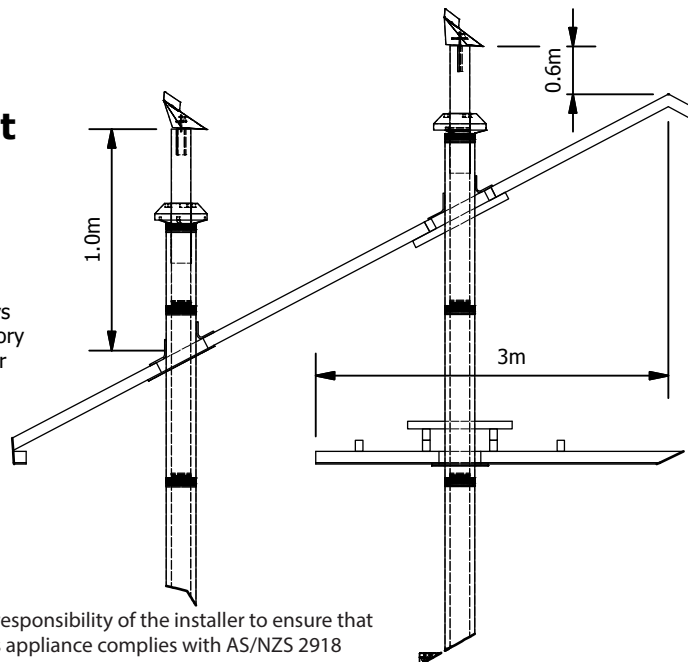

* This kit may require additional components to complete installation.

Roof & Ceiling Installation

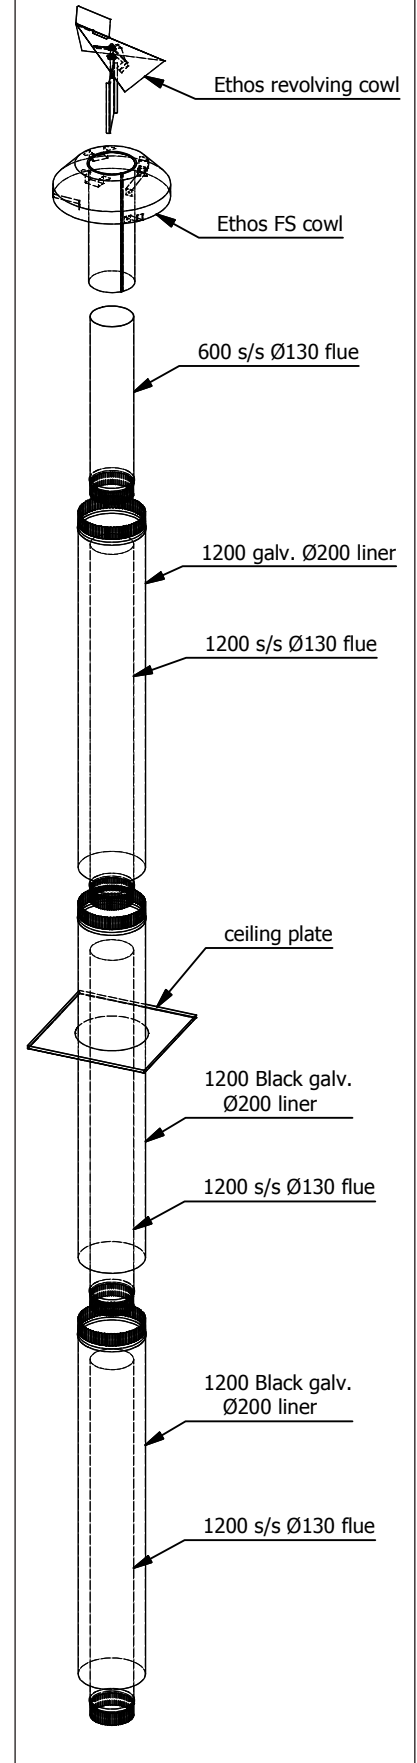

Minimum Chimney Height (excluding cowl)

Depending on local circumstances, taller chimneys may be required for satisfactory performance. Check with your local building authority.

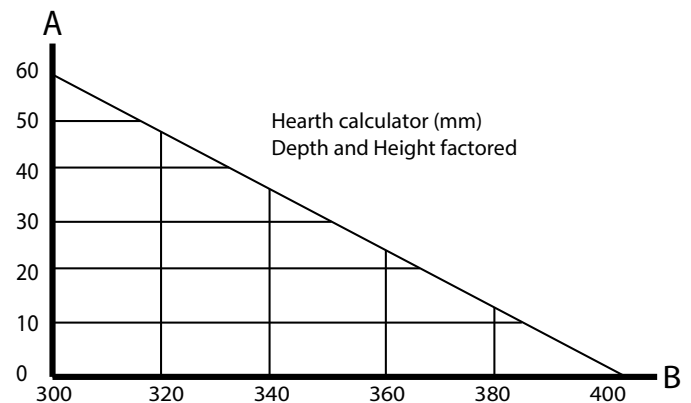

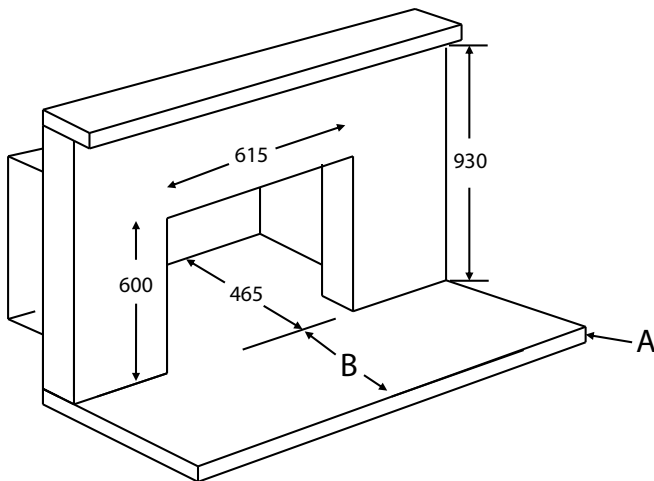

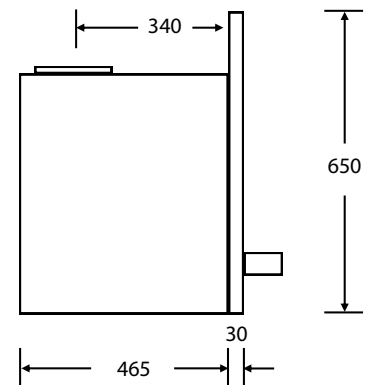

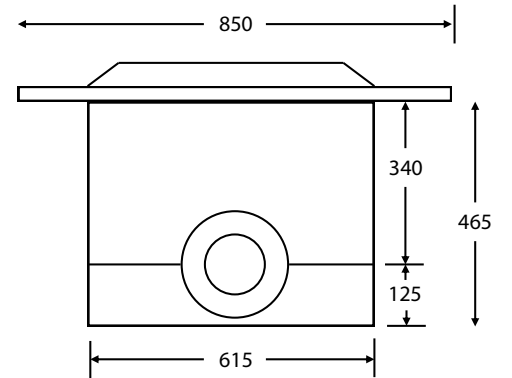

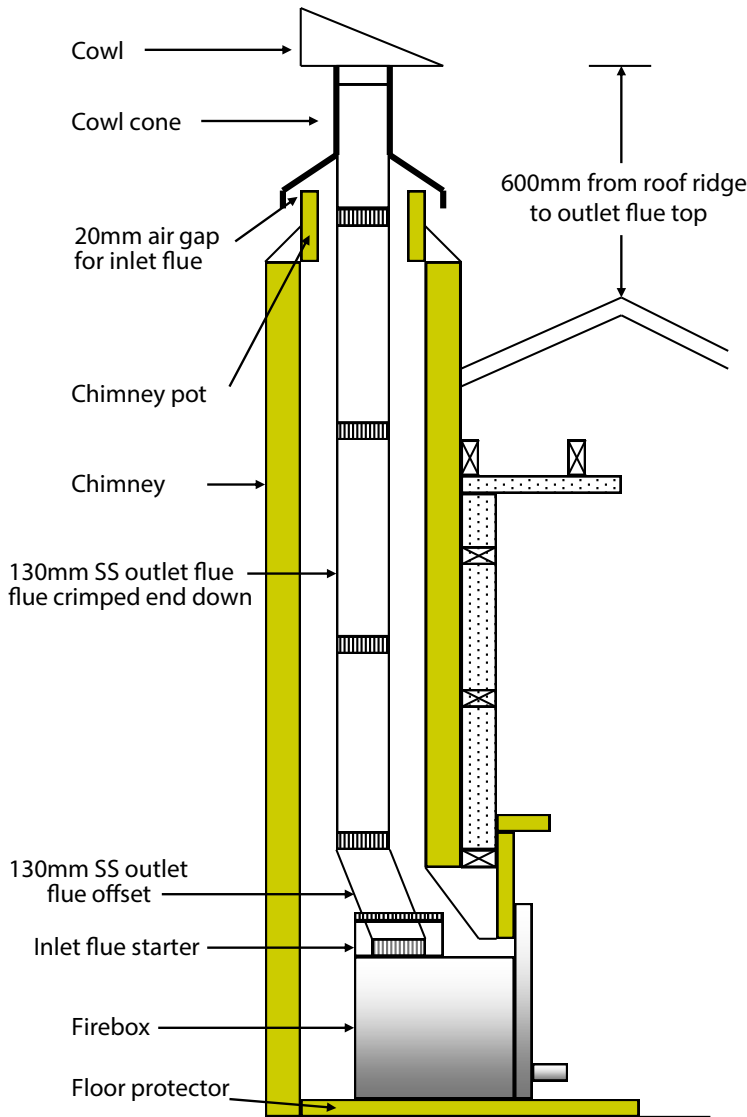

4.2m Flue Kit Components

 **IMPORTANT:** It is the responsibility of the installer to ensure that the installation of this appliance complies with AS/NZS 2918. The above installation diagrams are provided as a guide only.
