

PROTECH MEDICAL

RADIATION SAFETY

MANUFACTURED IN THE USA

2020

ABOUT US

In 1986, Ronald Parasmó, a licensed optician in the state of Florida, was approached with an unusual request to repair leaded eyewear. The glasses belonged to a doctor and were used as protection against ionizing radiation. Ron quickly found the required materials to fix the eyewear and repaired them like new. The gentleman who sent Ron the eyewear was so impressed with the quality of his work that he began referring additional jobs. As time went on, the demand for repairs on lead glasses grew rapidly. Ron sought to begin work on his own line of radiation protective eyewear as a primary focus.

By 1991, Ron had improved upon existing radiation safety eyewear by developing his own modern line. Working diligently in the office and at home, Ron nurtured his growing venture until Protech was incorporated in 1994.

In 1997, Protech developed one of the most popular gloves on the market today, the ProGuard radiation reducing gloves for fluoroscopic procedures. The following year, the gloves were brought to market with FDA 510(k) approval and quickly rose to be the number one glove in the world.

Fulfilling Ron's commitment to high quality products, in 1999, Protech became ISO certified and gained CE on its gloves and eyewear. In the early 2000s, with the success of gloves and eyewear inspiring further growth, Protech set out on a mission to become the one-stop-shop for radiation protection apparel by introducing its own line of high quality, light weight aprons. Through the efforts of many great employees, the apron business took root. In 2004, with aprons becoming firmly established along with the introduction of storage and barrier products, Protech had officially transitioned from market disruptor to a mature, full-scale radiation apparel manufacturer.

In 2014, Ron's son Jarrod joined Protech's team to modernize and revitalize the business through the development of different technology platforms and marketing campaigns. Fast-forward to today, Protech is now one of the most recognized manufacturers of radiation safety products in the world; known for its quality and service. We offer a wide variety of products to keep you adequately protected, including: non-lead aprons, leaded eyewear, fluoroscopic procedure gloves, lead acrylic barriers, inventory management solutions, sales software and other innovative solutions. Jarrod has proudly assumed the role as President and is currently leading the Protech family into a new period of growth and innovation

MISSION STATEMENT

Our mission is to keep you safe by reducing your exposure to ionizing radiation and its harmful effects while offering innovative, lightweight and stylish solutions. Protech employs a team of professionals that takes great pride in the quality of its products. This is largely due to a leadership that is focused on quality and expert craftsmanship. Our entire staff understands the importance of the products we manufacture and how they contribute to your wellbeing.

Protech's concern is, and will always be, your safety.

Quality. Service. Integrity: COMPROMISE ELSEWHERE.

WHAT'S NEW

01

SCATTERGUARD PATIENT DRAPES

During procedures requiring fluoroscopy, direct beam radiation contacts a patient and “scatters” towards the surgeon and other personnel. **“The scattered radiation from the patient comprises the main source of radiation dose to staff.” – International Atomic Energy Agency**

Protect yourself and your team with Scatterguard drapes. Tested in accordance with ASTM and IEC standards, ScatterGuard products provide excellent protection for fluoro-lab and operating suite personnel during interventional procedures. They are lightweight, lead free, conform to the patient’s body and are disposable through normal waste procedures.

QUICKSHIP APRONS

Protech's line of high quality, quickship aprons are ready to ship at a moments notice. Choose from our premium, ultralite lead and lead-free options or save with our regular lead selections.

Our premium quickship aprons are fluid proof, anti-microbial and stain resistant.

Get your apron now! No order forms required.

FOR MORE INFO ABOUT QUICKSHIP APRONS, PLEASE SEE PAGE 13

03

PROGUARD 360

Protech has created a comprehensive range of radiation attenuation gloves for all of your needs. From lead with latex to lead-free & latex-free, Protech has every option of glove, unified under brand, sizing, design, and quality. Our premium product is sold by the pair or pallet.

Sample the world's #1 glove brand today.

PROGUARD APRONS

Protech Medical has some of the most professional sewing staff in the industry. Our ProGuard aprons are hand-crafted in the USA and tailored according to your needs.

Premium quality and a high degree of customization play an important role in our company's success. Furthering our commitment to high quality, Protech is ISO certified and has attained CE on its products.

ProGuard aprons are number one in custom and come in 5 durable, lightweight core material options that are made from the highest quality raw materials and most advanced manufacturing techniques available.

COLOR OPTIONS

- Refer to pages 32-35 for apron colors.

SIZING & MEASUREMENTS

- Refer to pages 36-37 for sizing information.

Our core materials are tested at various kVp ranges and in accordance with ASTM guidelines and European IEC regulations. Protech tests its materials annually and always has the test results on hand to be sent to you at your request. Protech's vinyl based core materials are the most lightweight materials in the industry. Our lead materials are available to ship worldwide in a variety of thicknesses and quantities.

THE PROGUARD DIFFERENCE

Light-weight, improved flexibility, and increased durability, our ProGuard Aprons possess advanced polymer technology and are hand-crafted. This technology is a key feature in all apron lead types at no extra cost to you. Your aprons go beyond the competition and will feel lighter and last longer. To truly set our quality apart from the competition, ProGuard aprons include the premium features shown below.

A COMMITMENT TO QUALITY

With full time quality control staff and ISO certification, you are getting the best in American made protective apparel.

PROGUARD ULTRA-FLEX VINYL

ProGuard ultra-flex vinyl features more flexibility and durability which provides superior comfort.

2 YEAR WARRANTY

Protech guarantees the quality and workmanship of its aprons for two years against manufacturer defects.

NON-SLIP FABRIC ON SKIRT INTERIOR

Included for free, our premium non-slip fabric improves the fit of your skirt by reducing sliding and shifting.

BUCKLE SETS IN VEST SKIRTS & WRAP AROUND APRONS

Adjustable buckle sets are now included on all vest, skirt, and wrap-around apron purchases. Buckle sets help you tighten your apron and improve the overall comfort and fit of the apron.

IN-HOUSE EMBROIDERY & LOGOS

Don't let your apron "disappear." Our embroidery and logos are done in-house with modern monogram machines and the latest in digitization technology.

ECO-FRIENDLY LEAD FREE

Proguard lead free core materials are recyclable and non-toxic.

CUSTOM APRONS ARE OUR SPECIALTY

We specialize in designing tailor made aprons. Choose from over 100 colors for your apron's exterior color, interior color, and binding. When you're finished, you can add embroidery, logos and other add-ons for a truly tailored experience.

LUXRAY PATTERNS

LuXRay offers patterned accents on the apron's sides and shoulders combined with an optional matching design on your thyroid collar.

TECHNICAL SPECIFICATIONS

K-EDGE TECHNOLOGY

Each ProGuard core material is carefully formulated to more efficiently attenuate portions of the photon spectrum and limit “gaps” in protection due to over reliances on individual x-ray protective elements. Protech utilizes proper elemental balance to address k-edge concerns for key diagnostic imaging ranges. Protech’s advanced elastomers exhibit the best balance of toughness, flexibility, durability and cracking resistance.

* Antimony/barium provide more efficient attenuation of the photon spectrum below the K-edge window of lead (35 - 88 keV)

* Higher Z elements, tungsten, bismuth and lead are more efficient for stopping higher energy radiation (>9/88 keV), and also cover the K-edge fluorescence window of antimony (< 35 keV).

STANDARD LEAD

Protech's standard lead is an affordable, highly protective lead vinyl material providing consistent x-ray protection throughout a wide range of kV. IEC certified.

ULTRALITE LEAD

Ultralite Lead is a lightweight, flexible x-ray protection material created from a mixture of antimony, lead, and durable vinyl. Ultralite lead is roughly 13% lighter than our lead product. (aka T-lite) IEC certified.

PROLITE LEAD-FREE IEC

Prolite Lead-Free IEC is a light weight, highly flexible x-ray protective material made up of a more concentrated blend of antimony, bismuth, and plasticizers. Prolite IEC is 15% lighter than our lead product. (aka Supreme) IEC Certified.

PROLITE LEAD-FREE ASTM

Prolite Lead-Free ASTM was developed as a cutting edge, flexible x-ray protective material composed of antimony, bismuth, and optimized plasticizers. Prolite ASTM is 20% lighter than our lead product.

BI-LAYER (PREMIER)

Our Bi-layer material is an ultra-light weight lead-free, multi-layered, x-ray protective material designed with individual layers of antimony and bismuth that optimize attenuation values for k-edge protection over a wide range of kV. Bilayer is 24% lighter than our lead product and one of the lightest IEC certified materials available.

ASTM 2547-06: (USA) Standard test method for determining the attenuation properties in a primary x-ray beam of materials used against radiation.

ASTM 2547-18: (USA) Standard test method for determining the attenuation properties in a primary x-ray beam of materials used against radiation.

WARRANTY

Protech's high quality garments ("Garments", aka PPE or Aprons) include; aprons, thyroid collars, gloves, dental aprons, reproductive aprons, and lead accessories. The Garments are warranted to be free of defects in materials and workmanship to the original purchaser for TWO years. If a defect appears, this card along with the date of purchase and explanation of defect must be returned to the company of original purchase.

Upon evaluation, Protech will either repair or replace the defective item or part without charge to the purchaser. This warranty is void when the product has been tampered with, when repairs or attempted repairs have been made by unauthorized persons, or when the item has been subject to misuse, abuse or damage in transit. No charges will be accepted or reimbursed for unauthorized parts, repairs or services.

Please contact your local representative for return instructions. All returns, repairs, or exchanges, regardless of reason, must be accompanied by an authorized RMA. Customer should make available the Purchase Order # or relevant sales information.

QUALITY AND TRANSPARENCY

Protech is an industry leader in high quality x-ray protective products. It is our mission to educate healthcare professionals on what is inside their apron. The below tables present fully transparent details on what our apron product is composed of and how it protects you.

APRON SERVICES

AND ADDITIONAL APRON INFO

SPONSORSHIPS | CHARITY

Protech sponsors educational events worldwide. We are currently working with partners throughout the world to ensure adequate protection is available during fluoroscopic procedures. If you manage a trade show and would like temporary aprons sent over, please give us a call.

INTELLITRACK INVENTORY MANAGEMENT

Track and manage your radiation protective apparel and equipment with IntelliTrack. IntelliTrack is an enterprise level, cloud-based software that offers robust functionality and reporting to easily pass The Joint Commission (TJC) inspections. Its RFID capabilities enable you to quickly scan and inspect multiple aprons at the same time. For more information, see pages 12-13.

RENTAL APRONS

Rental aprons are essential for continuous education courses, cadaver workshops, or any other event that requires the use of fluoro and radiation protective apparel. There is no need to purchase and hold all of that inventory. Protech has a large selection of in stock apron rentals available to ship year round.

LEAD DISPOSAL

Aprons containing lead must be disposed of carefully. Protech provides an in-house replacement service for this very occasion. Our disposal service is free with the purchase of any new apron! There are always additional offers available so feel free to call and get hassle free disposal of your lead, today.

STORAGE

When not in use, garments should be placed on a hanger or stored using Protech's apron storage equipment. Avoid contact with hot surfaces or exposure to direct sunlight. Also avoid contact with sharp objects, as these may damage the garment's protective core material. For transportation, garments should be carefully rolled up, not folded, and placed into a box or Protech duffle bag.

CLEANING

DO's

Clean most dirt and stains (blood, bodily fluids, barium contrast media) using designated apron cleaning solutions or mild household soaps in diluted form. To apply cleaning fluid, please use a cloth or wipe and always use cold water.

DONT's

While it is possible, we DO NOT recommend you machine wash or dry your apron. Do not use hot or warm water. Do not iron or autoclave.

QUICKSHIP APRONS

FAST, EASY, AND AFFORDABLE

Tired of waiting weeks for your apron? Do you need protection now? Protech's line of high quality, quickship aprons are ready to ship at a moments notice. Choose from a selection of premium style aprons with feature-rich add-ons or pinch a penny with cost effective economy styles.

NO ORDER FORMS REQUIRED!

CLOUD BASED INVENTORY MANAGEMENT TRACKING

Protech introduces IntelliTrack: The intelligent way to track and manage your radiation protective apparel and equipment. IntelliTrack offers RFID capabilities that enable you to quickly scan and inspect multiple aprons at the same time. Passing The Joint Commission (TJC) inspections will no longer be a burden with IntelliTrack's cloud based functionality and easy reporting. IntelliTrack is an enterprise level software designed with flexibility and efficiency in mind to meet any of your unique needs.

"LITE" PACKAGE

Tight budget? We understand. IntelliTrack can be offered in a more affordable package. IntelliTrack Lite provides all the same great features such as robust reports, intuitive support tools, and easy to use inspection software. Try IntelliTrack Lite today for free for one year!

"ENTERPRISE" PACKAGE

A perfect fit for any organization, IntelliTrack's enterprise package includes lifetime email and phone support, free additional reports, fast tracked software improvement recommendations, and our exclusive RFID technology.

BACKED BY INDUSTRY LEADERS

"We were a part of IntelliTrack's initial development team. It was amazing seeing our recommendations being added to the software almost immediately. IntelliTrack's use of RFID technology vastly improved our inspection process and their reports made passing The Joint Commission inspections as simple as a push of a button." --- Central Main Medical Center

"At first, IntelliTrack appeared to be overwhelming, but Jarrod helped us every step of the way. Whenever there was an issue, a brief call to IntelliTrack's professional team quickly helped resolve it. Thanks to IntelliTrack, managing our inventory is easy, and inspections are even easier." --- Central Florida Regional Hospital

"We helped test IntelliTrack's beta software. Needless to say, we have been with them since the beginning. Their team was highly professional and really listened to what we wanted in our inspection software. They delivered." --- Lowell General

WHY INTELLITRACK?

Why choose IntelliTrack? The Joint Commission is cracking down on hospitals who have missing aprons and do not effectively manage or inspect their radiation protective apparel. Once you become an IntelliTrack customer, all garments purchased on or after that date come with their data already entered into IntelliTrack and a Smart Tag professionally sewn into the apron. Your radiation protective apparel will be managed from the minute your order is placed to the moment you need to replace or reorder. IntelliTrack will save you time and money whether you are looking to improve your inspection process or simply want to manage your apron inventory more effectively.

ADVANCED REPORTS

Generate custom reports for you and The Joint Commission. Can't find the report you're looking for? Our support team will gladly create it for you.

INTUITIVE DESIGN

IntelliTrack was designed with you in mind. With user-friendly tools and simple navigation, IntelliTrack will greatly improve the quality of your inspection process.

INVENTORY AND ORDER TRACKING

Track your apron orders and be prepared for the future in hospital-wide inventory tracking solutions. Streamline data entry and improve reporting accuracy.

GROUP INSPECTION AND EDITING

Record inspection results for large groups of aprons at one time. Simplify inventory and inspection management with IntelliTrack's unique group editing features.

RFID TECHNOLOGY FOR RANGED SCANS

Easily scan and access your apron's information from a distance. Group scan up to 30 stacked aprons with no limits on the total number of aprons scanned.

ACCESSIBLE FROM ANY DEVICE

IntelliTrack is as adaptable as you need it to be. The easy-to-use interface can be accessed from your desktop, smartphone or tablet without any complications.

“ We wanted a software that could help manage apron inventory and improve inspection accuracy. We felt that the free softwares and apps were inadequate. Some of them even required employees to use their own personal devices. IntelliTrack was the only true enterprise software that delivered on what we were looking for.” --- Stamford Hospital

Included Features:	Backstrap, Back Relief Belt	-

BACK RELIEF APRON

MODEL: [AP-BR]

Save yourself from back pain with Protech's Back Relief apron. This apron features a unique padded belt system constructed with a bonded elasticized panel that will not lose its shape. When engaged, the special back relief belt provides lumbar support, while transferring the weight of the apron from your shoulders to your hips. It provides increased comfort and back support throughout the life of the apron. A velcro backstrap is also included to secure the apron around your shoulder area and prevent sliding.

Available Colors: Refer to pages 32-35

BUCKLE APRON

MODEL: [AP-BA]

The Buckle Apron comes standard with an easy-release buckle allowing for quick removal of the apron. The belt is adjustable to accommodate different sizes. Criss-cross back straps provide a secure, comfortable fit.

Available Colors: Refer to pages 32-35

Included Features:	Backstrap, Elastic Back	Hanging Straps

FLEXBACK APRON

MODEL: [AP-FB]

Representing the gold standard for Protech's quality, the Flexback apron provides enhanced back relief and comfort with its excellent weight distribution. Criss-cross back straps are specially designed with elastic to "flex" the apron's weight burden off your shoulders to your hips, thereby providing support to your lower back. A velcro backstrap (shown below) is included and secures the apron around your shoulder area to prevent sliding.

Available Colors: Refer to pages 32-35

SURGICAL DROP APRON

MODEL: [AP-SD]

Maintain your sterile field with the quick release Surgical Drop Apron. Easy-release velcro closures allow the surgical drop to fall even when underneath your scrubs. With padded shoulders and a criss-cross back strap design the surgical drop apron provides maximum comfort for all users. Hanging straps are included to allow for easy storage on any Protech apron rack.

Available Colors: Refer to pages 32-35

TIE APRON

MODEL: [AP-TIE]

The Tie Apron is an easy-to-use, affordable option for maximum radiation protection. Utilizing a tie closure, the Tie Apron's criss crossing tie straps ensure a secure and comfortable fit. Pediatric sizing available, see page 37 for size chart.

Available Colors: Refer to pages 32-35

VELCRO ADJUSTABLE APRON

MODEL: [AP-VA]

Do you need comfort and adjustability at an affordable price? The Velcro Adjustable apron has crisscrossing back straps that provide back support while securing the apron around your waist. Wide back straps prevent the apron from slipping around your shoulder and back area. Pediatric sizing available, see page 37 for size chart.

Available Colors: Refer to pages 32-35

Included Features:	Backstrap, Elastic Back	Vest - Elastic Back, Drop Shoulder (left), Skirt - Premium Non-Slip Backing

UROLOGY APRON

MODEL: [AP-UA]

If you sit while performing procedures requiring x-ray, you may be unnecessarily exposing yourself to radiation. The Urology Apron features a three panel system at the bottom of the apron which enable the user to sit comfortably while maintaining maximum coverage from x-ray.

Available Colors: Refer to pages 32-35

TRI-TAB VEST SKIRT

MODEL: [AP-TVS]

With an easy-on, easy-off multi tab (velcro) closure design, the Tri-tab is a popular style for vest and skirt combinations. Velcro closures are located on the left shoulder and around the hips. An elastic back allows for a flexible fit while providing premium comfort and back support. The Tri-tab Vest Skirt reduces excess overlapping lead and is **up to 10% lighter than traditional vest models.**

Available Colors: Refer to pages 32-35

VEST SKIRT APRON

MODEL: [AP-VS]

Be prepared for prolonged procedures with the maximum protection Vest Skirt Flexback apron. The two piece design shifts 70% of the weight directly to the hips, reducing back fatigue. The vest features two 0.50mm Pb panels that create a 1.0mm overlap and the skirt comes standard with a premium non-slip fabric in the back.

Available Colors: Refer to pages 32-35

VEST SKIRT OVERLAP APRON

MODEL: [AP-VSFO]

Come prepared for prolonged procedures with the maximum protection Vest Skirt Full Overlap apron. The two piece design shifts 70% of the weight directly to the hips, reducing back fatigue. The Vest Skirt's full overlap design provides larger front panels covering the entire chest. When engaged, each front panel has 0.25mm Pb to provide the 0.50mm Pb combined protection. Reducing the 1.00mm overlap provides a lighter weight than your traditional vest and skirt apron.

Available Colors: Refer to pages 32-35

WRAP AROUND BACK RELIEF

MODEL: [AP-WABR]

Offering full protection, this back relieving design transfers the weight from your shoulders to your hips with the aid of a 6" lumbar support belt. The Wrap Around Back Relief apron features velcro and buckle closures, a velcro break-away side seam for freedom of movement, and 1.00mm LE when the overlapping panels are engaged. Padded shoulders offer added comfort.

Available Colors: Refer to pages 32-35

WRAP AROUND FULL OVERLAP

MODEL: [AP-WAFO]

Offering full protection, this back relieving design transfers the weight from your shoulders to your hips with the aid of a 6" lumbar support belt. The Wrap Around Full Overlap apron features velcro and buckle closures, a velcro break-away side seam for freedom of movement, and .50mm LE when the overlapping panels are engaged. Padded shoulders offer added comfort. The wraparound full overlap apron eliminates redundant fabric and lead; reducing unnecessary weight and increasing comfort. The two enlarged front panels each contain 0.25mm LE totalling 0.50mm LE when engaged.

WRAP AROUND FLEXBACK

MODEL: [AP-WAFB]

Want the ultimate in comfort and protection? The Wrap Around Flexback apron combines the best qualities of our flexback apron with the full protection and back support of our wraparound back relief apron. The elastic stretch-back shifts weight from your shoulders to your hips while tri-tab velcro closures provide an easy-on, easy-off solution for your one-piece apron. The Wrap Around Flexback eliminates excess overlapping lead and is up to **10% lighter than traditional wrap styles**.

Available Colors: Refer to pages 32-35

MATERNITY APRON

MODEL: [AP-MA]

The maternity apron features easy ties and a quick release buckle to secure the back and front panels; allowing complete adjustability during pregnancy. The maternity apron also includes an additional .50mm equivalent half apron for a total of 1.00mm Pb protection over the abdominal area and lower extremities.

Available Colors: Refer to pages 32-35

ORIGINAL THYROID COLLAR MODEL: [AP-TCO]

The traditional style thyroid collar fits lower on the neck, offering coverage of the thyroid against scatter radiation. Velcro strips on the end allow for neck size adjustability. This style of thyroid is our most popular and has two options for closure in the back; velcro or buckle.

Available Colors: Refer to pages 32-35

STANDARD THYROID COLLAR MODEL: [AP-TCS]

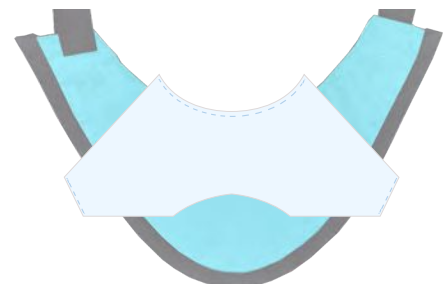

The standard radiation thyroid collar is designed to fit higher along the neck while providing complete coverage of the thyroid against x-ray radiation. This style of thyroid is our most popular and has two options for closure in the back; velcro or buckle.

Available Colors: Refer to pages 32-35

THYROID COLLAR COVERS MODEL: [SG-DTCC]

The Scatterguard disposable thyroid collar cover is designed to prolong the life of your thyroid collar by keeping it clean!

ProGuard Thyroid Collar MODEL: [AP-TCG]

Featuring a form-fitting design and velcro closure, the ProGuard thyroid collar provides front and back protection.

Available Colors: Refer to pages 32-35

Pediatric Thyroid Collar MODEL: [AP-TCP]

Available in either the standard or original style thyroid collars, our Pediatric Thyroid collar is designed to protect children ages 2 to 10 from harmful x-ray. Choose between a small (for ages 2 - 4) and medium (ages 5 to 10).

Available Colors: Refer to pages 32-35

Mammography Thyroid Collar MODEL: [AP-TCM]

Don't let the standard or original thyroid collar get all the attention. The mammography's sleek profile provides a detachable alternative to "sewn-in" thyroid collars while allowing for adjustability. Additionally, the mammography thyroid collar serves as a valuable option for patient protection.

PROGUARD SMART CAP MODEL: [AP-PGCAP]

Need head protection that is breathable, light-weight, and comfortable? The ProGuard Smart Cap features Cool Guard spandex fabric on the top while providing protection around the sides of your head.

Available Colors: Refer to pages 32-35

DISPOSABLE SMART CAP MODEL: [SG-DCAP]

ScatterGuard's disposable Smart Caps are designed to provide essential protection against scatter radiation. Light-weight and adjustable, our Smart Cap has a convenient, universal fit. The Smart Cap is made with a premium lead-free material and may be disposed of through normal waste procedures. The disposable Smart Cap blocks up to 95% of radiation depending on whether you choose 0.125, 0.25 or 0.375mm LE.

Available Colors: Baby Blue

PAGE CAP & HEAD CAP MODEL: [AP-PAGE / CAP]

The Page Cap is designed to provide protection around the sides of your head, while the top contains no lead. Alternatively, similar to a scrub cap, the Head Cap provides x-ray protection around the entire head. Velcro tab closures allow for an adjustable fit on both styles. *Sizes based on head circumference.

BREAST STOLE

MODEL: [AP-STOLE]

The breast shield is primarily used for spinal imaging. The shield features velcro panels and an adjustable belt for proper positioning. The neck area does not contain lead, allowing complete visibility of the spine during x-ray, while offering protection to the breast area. This shield is great for scoliosis studies.

Available Colors: Refer to pages 32-35

GONAD/OVARIAN SHIELD

MODEL: [AP-GONAD]

This unique gonad/ovarian shield belt system comes complete with four interchangeable sizes which provide coverage from x-ray for a variety of needs. The adjustable buckle also allows the user to fit almost any waist size. The gonad/ovarian belt system comes as a set of 4 sizes, or can be purchased individually.

Available Colors: Refer to pages 32-35

HALF APRON

MODEL: [AP-HA]

The half apron can provide extra radiation protection. Selling it separate also allows you to mix and match a smaller bottom half with a larger top piece or vice versa.

Available Colors: Refer to pages 32-35

BACK RELIEF BELT

MODEL: [AP-BLT]

The back relief belt is constructed of neoprene bonded elastic. It features high quality components that do not lose elasticity. The belt also features a non-slip adjustable buckle to ensure a secure fit. The back relief belt attaches separately from the apron.

Available Colors: Refer to pages 32-35

CORSET BELT

MODEL: [AP-CORSET]

Our corset belt is a great apron accessory for added back support when wearing a radiation protective apron. The finger pull tab and pulley system along the spine provides for simple adjustment and even tension.

*The corset belt is worn under the apron.

Available Colors: Black

APRON DUFFLE BAG

MODEL: [AP-DUFFLE]

Our duffle bag protects your aprons while traveling between facilities or out of the country. Protect and store your aprons for transport now with our affordable, high quality duffle bag. Features: 10" Velcro Opening, Carrying Handle & Shoulder Strap.

MIGHTY MAX RACK

MODEL: [AP-MAX-MOB]

The Mighty-Max mobile apron rack's solid steel design holds up to 10 aprons. The pedestal base has rolling wheels for easy portability. Convenience hooks on each hanger can hold lead skirts.
Dimensions: 25" W x 28" L x 48" H

PORTA RACK

MODEL: [AP-PORTRK]

Ideal for use in the O.R., Specials, and Cath Labs, this portable apron storage unit is great quality and affordable. The 24" wheel base with double casters allows this completely loaded rack to glide smoothly while being moved. The porta rack features moving hanger arms that swing forward and backwards for easy apron selection as well as an optional glove rack on the top for maximum storage capabilities.

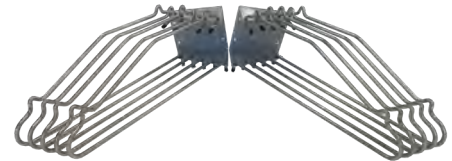

**SPECIAL: Available with glove rack (shown)
 AP-PORTRK-WGL (Holds 8 Heavy Duty Gloves)**

WALL RACK

MODEL: [AP-WALL-L/R]

Prolong the life of your radiation protective garment with our apron wall rack console. Each console holds up to 5 protective aprons with the combined left and right consoles storing up to 10 aprons. The wall console features hooks on the top of the hangers for lead skirts.
 *Does not include mounting hardware.

VALET RACK

MODEL: [AP-VALET/VALET-VS]

Industrial quality steel construction and easy roll casters make these mobile apron racks an excellent portable storage option. The rack provides storage capacity for up to 15 aprons! *Includes 4 screws for quick assembly

PEG RACK

MODEL: [AP-PEG]

The apron Peg rack is made of steel construction and easily screws into wall studs. It can store up to 9 aprons but comes in a variety of sizes that accommodate the storage of 1, 2, 4, 7, or 9 lead aprons. This affordable wall storage for aprons is essential to prolong the life of your protective aprons. *Mounting hardware is not included.

APRON MEASUREMENTS

CHEST MEASUREMENT

Measure around the largest circumference of the bust area, keeping the tape parallel to the floor with the client's arms at their sides.

WAIST MEASUREMENT

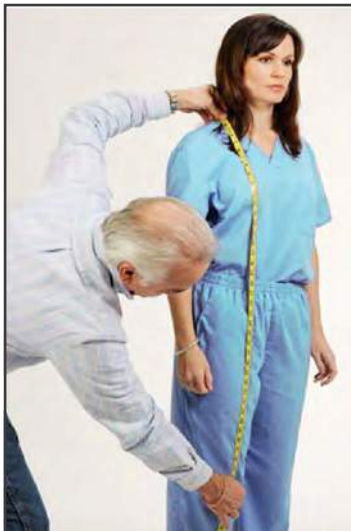

Measure around the smallest circumference of the torso. If you measure at waist level it may be inaccurate.

HIP MEASUREMENT

Measure around the largest circumference of the hips and buttocks with the tape parallel to the floor: generally 8-9 inches down from the waist.

FRONT APRON LENGTH MEASUREMENT

Measure from the top of the shoulder over the bust to the desired length. Do not contour the tape measure in under the bust.

VEST LENGTH MEASUREMENT

Measure from the top of the shoulder over the bust to the desired length. Do not contour the tape measure under the bust.

SKIRT LENGTH MEASUREMENT

Measure from the top of the pant line (waist) and over the outside of the hip down to the desired length.

EYEWEAR

All lead glasses are manufactured by Protech Medical in the USA (Florida) and are made with 0.75mm or 0.50mm Pb lead equivalent lenses.

Included in all eyewear purchases is a hard case, head strap, and a 1 year manufacturer warranty against defects.

"The Threshold for radiation to the eye is 0.50 GY or **20 MSV IN A YEAR.**"

-- International Atomic Energy Agency

SPECIAL ORDERS LIST:

- See pages 62-63 for more frame options

Your eyes are 4 times more sensitive to radiation than other parts of your body. Not too long ago, few doctors used leaded eyewear. With the increase in occurrences of early onset cataracts, lead glasses are now a staple in fluoroscopic procedures.

Protech Medical manufactures a wide range of premium leaded eyewear including: glasses, prescription eyewear, goggles, fitovers, and faceshields.

Our dedication to manufacturing in the U.S. and commitment to sourcing the highest quality materials has made us the number one eyewear manufacturer in the world.

SIZING & ADD-ONS:

- Refer to pages 64-65 for sizing information.

STATEMENT OF COMPLIANCE

Lead Equivalence (mm Pb) - 0.50 or 0.75
IEC 61331-3:2014 Regulation (EU) 2016/425 Module B EU Type Examination

X-ray Tube Voltage - 60 kV – 150 kV

WHO USES PROTECTIVE GLASSES?

With the accessibility of modern designed frames and ultra-light lenses, protective leaded eyewear is used by roughly 95% of physicians and staff in the following vocations:

CARDIAC CATH

EP LABS

INTERVENTIONAL
RADIOLOGY

PAIN
MANAGEMENT

UROLOGY

ORTHOPEDIC
SURGERY

"The typical interventional cardiologist gets exposed to **20 to 30 mSv each year**. This level of exposure is nearly **10 times greater** than the level of exposure received by the entire body."

-- US National Library of Medicine

VADER

MODEL: [RE-NY117]

The Vader's ultra-flex technology provides premium comfort at a fraction of the cost of traditional wraparound leaded eyewear. They provide protection for the entire eye area without the need of added side shields. Additionally, the Vaders are one of the lightest radiation safety frames given their large area of protection.

Available Colors: Gray, Matte Black, Shiny Black, Clear Brown

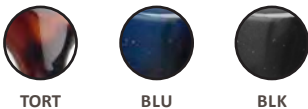

53 WRAP

MODEL: [RE-53/53A]

The 53 wrap is constructed of durable nylon that exhibits superior flexibility while minimizing potential breakage. Its full saddle bridge provides maximum comfort and evenly distributes weight over the nose.

*Also available with adjustable nose pads (Model 53A)

Available Colors: Tortoise, Blue Tortoise, Black

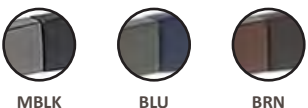

MALIBU

MODEL: [RE-MALIB]

The Malibu frame modernizes the classic wayfarer design and is offered in several tasteful color selections. While not one of the most protective styles for lateral and wide-angle x-ray protection, the Malibu is a compelling option for those requiring basic radiation protection at an affordable price... and wanting to look good while you are at it.

FULL FACE SHIELD

MODEL: [450FPM]

The Full Face Shield uses a lead impregnated protective acrylic shield suspended from a dual adjustable headpiece. The Full face shield provides maximum x-ray protection due to its larger lead impregnated shield. Because of the multi-adjustable headpiece, you can angle the mask to protect from radiation in many different positions as well as adjust the size to comfortably fit your head. *Mask should be worn with leaded eyewear protection.

PANORAMIC FACE SHIELD

MODEL: [400PSM]

The Panoramic Face Shield utilizes a lead impregnated acrylic shield suspended from a dual adjustable headpiece. This lead face shield provides additional x-ray protection around the sides of the head while sacrificing some front protection. Because of the multi-adjustable headpiece, you can angle the mask to protect from radiation in many different positions as well as adjust the size to comfortably fit your head. *Mask should be worn with leaded eyewear protection.

TEMPLE

The length of your frame's temples is important to ensure stability and comfort.

TEMPLE GRIPS

Available with several eyewear styles, temple grips can provide comfort and stability for the wearer.

LEAD GLASS

Lead glass lenses provide standard 0.75mm Pb Equivalent protection.

NOSE BRIDGE

A well-designed nose bridge is necessary for a proper fit.

NOSE PADS

Ventilated nose pads keep the frame comfortably gripped on your face.

FRAME SIZING BREAKDOWN

Example frame size: ProGuard Leaders - 58-15-135*

In the above frame size, the 58 corresponds to "A" (Lens size), the 15 represents "B" (Bridge Size), and 135 is the length of "C" (Temple size). *"B" Size not specified.

NOTE: Not all frame sizes are representative of how a frame will fit. It is always best practice to try a frame on when possible. For instance, the Nike Brazen is a "large frame" based on its frame size, yet it fits a majority of men and women's faces.

EYE SIZE

Horizontally measured from outermost edges of the lens. Approx 40-62mm.

BRIDGE SIZE

Measurement of the distance between two lenses. Approx 14-24mm.

TEMPLE SIZE

Measurement of the arm or ear piece. The length of your frame's temples is important to ensure stability and comfort.

"B" MEASUREMENT

Measurement of the height of the lenses.
*For Bifocal and Progressive lenses, a B measurement of at least 25mm is recommended

RADIATION ATTENUATION GLOVES

A study by the National Center for Biotechnology Information concluded that:

A healthcare worker could receive more than *twice* the annual limit of radiation exposure simply by holding the head of a trauma patient four times per week with unshielded hands during cervical spine radiography.

The ProGuard family of products comprises the most technically advanced gloves with a proven record in quality and comfort. Our extensive range of gloves has been perfected over the last 30 years and carefully expanded to meet the growing needs of healthcare professionals. With affordable options, high-end selections and different thicknesses to choose from, ProGuard is a convenient single source for all your glove needs.

The ProGuard glove brand focuses on uniquely balancing tactile sensitivity, protection, and comfort in a way no others can. With a commitment to performance and safety, there is no room for compromise. In addition to our fluoroscopic procedure gloves, we have multiple patient positioning and veterinary style gloves available in various protection options and colors.

PROGUARD ELITE ATTENUATION GLOVES

Proguard Elite

Model:	E1/E2
Composition:	Lead Free Tungsten + Polyisoprene
CE Marked:	No
FDA:	PPE
Sterilized:	Ethylene Oxide
Resteralization:	FDA mandates single use
Allergen Info:	Powder Free Made with Latex
Features:	Anatomically Correct Finger Curvature
Usage:	Procedures requiring high tactile sensitivity

PROGUARD ELITE

MODEL: [E1/E2]

The Proguard Elite is composed of a lead-free tungsten formula blended with premium polyisoprene and a proprietary polymer matrix free of harmful chemicals (MBT and DPG). The Proguard Elite gloves are intended to reduce the amount of scattered radiation exposure to the hands during fluoroscopic procedures. Proguard gloves are Personal Protective Equipment and are sterile unless opened or damaged.

Our premium product is sold by the pair or pallet. Sample the world's #1 glove today!

PROGUARD ECO ATTENUATION GLOVES

Proguard Eco

Model:	C1/C2
Composition:	Natural Rubber Latex + Bismuth (Lead Free)
CE Marked:	No
FDA:	PPE
Sterilized:	Ethilene Oxide
Resterilization:	FDA mandates single use
Allergen Info:	Powder Free Made with Latex
Features:	Anatomically Correct Finger Curvature
Usage:	Procedures requiring high tactile sensitivity

PROGUARD ECO

MODEL: [C1/C2]

The Proguard Eco gloves are intended to reduce the amount of scattered radiation exposure to the hands during fluoroscopic procedures. They are composed of a premium lead-free bismuth formula and ultra-flexible, natural latex. Over 25 years of glove manufacturing experience has resulted in the most comfortable, ultra-thin and tactile glove.

Our premium product is sold by the pair or pallet. Sample the world's #1 glove today!

ANGIOGRAPHIC LEAD GLOVES MODEL: [ANGIO]

The Angiographic Lead Glove is mainly used in patient positioning but is also ideal for procedures involving high radiation exposure. The glove is soft, flexible, and can easily be wiped clean.

Available Colors: Black

ANGIO MITT MODEL: [ANGIOMIT]

Our Angio Mitt is part of a wide selection of radiation shielding accessories. The angio mitt is a flexible mitt used to shield the hand, thus reducing exposure under direct x-ray. This mit can be used on either the right or left hand and is mainly used in positioning.

Available Colors: Refer to pages 32-35

SLIT MITT MODEL: [SLITMIT]

Our slit mitt is part of a wide selection of radiation shielding accessories. This flexible glove has a lead protective sheet for the top part of your hand and a slit on the bottom to allow for gripping.

Available Colors: Refer to pages 32-35

BARRIERS

DRAPES AND SHIELDS

Protech manufactures a comprehensive line of x-ray protective barriers, windows, and other leaded shield products. From fully custom lead doors to unique windows and overhead barriers, Protech has the expertise to meet your needs.

Many of the mobile barriers on the market were dated. They also greatly restricted viewing due to large opaque panels. Protech Medical pioneered a new method of producing barriers. First, instead of glass, we used lightweight acrylic. We then made sure that the barrier was composed mostly of acrylic as opposed to a panel. This new, clean looking design is lightweight and provides an excellent field of vision.

In line with our commitment to quality, all Protech barriers are produced in the USA. We are now growing our line to also include glass for those in need of additional radiation protection.

- The base features .50mm Pb lead sheeting

ACRYLIC BARRIER

MODEL: [MB-FULL/HALF]

Diagnostic x-ray procedures frequently require working personnel to remain in the examination room where they are subject to exposure from secondary radiation. The clear leaded acrylic barrier can provide total-body x-ray shielding during extended procedures. Our clear acrylic barrier provides 0.50mm LE protection and rests on an opaque lower panel with an equivalent 0.50mm LE. Smooth-rolling casters give the barrier great mobility. The acrylic lead barrier is shipped unassembled but can be easily assembled using a screwdriver and wrench. For heavy duty radiation protection barriers please see our lead glass barriers.

— MADE OF LEAD-FREE BISMUTH —

GLASS BARRIER OPTIONS ALSO AVAILABLE
- MODEL: MB-FULL-GL / MB-HALF-GL

STANDARD LEAD GLASS

ADJUSTABLE BARRIER

MODEL: [MB-ADJ]

Our adjustable mobile radiation barrier provides maximum shielding from x-ray exposure. Ideal for patient & personnel radiation protection our lead shield is easy to maneuver, and much lighter than the full & half acrylic barriers. This enables greater mobility while maintaining a solid construction with high quality, durable wheel casters.

PORTA SHIELD

MODEL: [MB-PORTA]

The graduated porta shield is a mobile-adjustable lead shield that provides a variety of different adjustable heights blended with a lightweight design. The pentagon shaped wheels provide stability and portability while maintaining a clean design. The shield is attached by velcro which enables easy removal for cleaning.

GRADUATED PORTA SHIELD

MODEL: [MB-PORTA-GRAD]

The graduated porta shield is similar to the porta shield but differentiates itself with its individual lead flaps. The flaps provide excellent versatility and usage. They are attached by velcro which enable easy removal for cleaning.

SURGICAL BARRIER

MODEL: [MB-SURGERY]

The surgical barrier moves with you. It is designed to provide you with maximum protection during procedures requiring fluoroscopy and other sources of x-ray.

Double-Sided

SINGLE/DOUBLE SIDED DRAPES

The single sided table drape uses velcro to adhere to the side of your imaging table. The double sided drape features a saddlebag design for a secure fit to any style imaging table. They provide protection against scatter radiation for your lower body and are specially designed to not obstruct positioning of the C-arm. Each drape attaches to the top by velcro allowing for easy cleaning and adjustability.

DISPOSABLES

Protech is proud to offer a comprehensive line of disposable products that protect doctors and technicians alike from the harmful effects of exposure to radiation while reducing the occurrence of biological contamination.

ScatterGuard, a Protech brand, is comprised of disposable Smart Caps (head protection), disposable thyroid collar covers, and disposable ScatterGuard Drapes as well as CT eye and thyroid shields. With complete protection from head to toe, ScatterGuard's broad range of disposable products provides specialized protection with convenience.

ScatterGuard products are available in three lead equivalences: 0.125, 0.25, and 0.375mm LE. Protection requirements are dependent on the intensity of the beam and cumulative exposure to x-ray. Protech recommends that the base level of protection, 0.125mm LE, be used in all procedures using x-ray or fluoroscopy with additional protection (0.25 & 0.375) being used in cases of prolonged exposure or higher dosage potential.

CT THYROID SHIELD

MODEL: [SG-SHLD-THY]

The thyroid, aside from your eyes, is one of the most radiosensitive areas on your body. ScatterGuard's disposable CT thyroid shield is essential for protection against exposure to radiation and provides significant dose reduction.

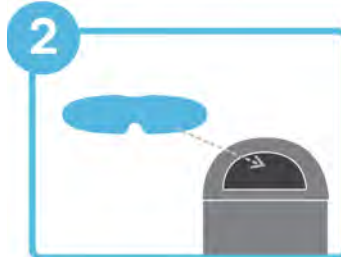

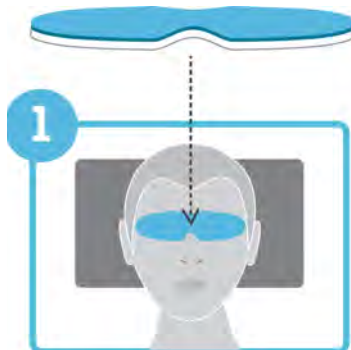

CT EYE SHIELD

MODEL: [PG-SHLD-EYE]

Head CT and general x-ray examinations can result in significant exposure to the lens of the eye. According to the International Commission of Radiological Protection, the estimated threshold for detectable opacities in the eye's lens from a single brief exposure to be 0.5 – 2Gy and the threshold for visual impairment to be 5Gy.

ScatterGuard's CT eye shield provides essential protection of your eye while minimizing artifacting. Made from environmentally friendly lead-free materials, the disposable, single-use eye shield may be disposed of through normal waste procedures.
