Set up fee	\$20
Additional pages	\$5 per page

The Fine Print

We normally require 3-5 business days to complete a print order. For rush jobs an additional charge will be added to the price as follows:

20% will be added to the price for following day pickup

25% will be added to the price for same day pickup.

Client Approved test prints are valid for 30 days. After 30 days we cannot guarantee exact copies due to slight variations in the manufacturers products we use (ie papers and inks), a new test print should be made and approved by the client.

If a client does not wish to make a test print before going ahead with a print order they are responsible for the cost of any and all ordered prints produced.

The submission of original works in the form of film, print artwork, electronic files, or other media constitutes an agreement by the client that in the event of loss or damage, The Digital Darkroom's liability is limited to the original cost of raw materials involved.

For the purpose of printing we prefer tif or psd files without layers in an RGB colour space.

For standard service they should be correctly sized by the client prior to submission ideally at 300 dpi or above.

For "Straight Print" service the client is responsible for all imaging adjustments, we do however guarantee a print free of printing defects.
