SUMMARY

- Here I would bullet point out some key experience you have
- For example:
- 10+ years with html/js/css technologies
- 1+ year with ReactJS etc.
- Etc etc
- (You could always paragraph this but I prefer bullet points)

PROFESSIONAL EXPERIENCE

Company   **MM/YEAR – MM/YEAR**
Position Held
Location (City, State)

Summary of the company you are working at, aka what do they do.

Project XX: I would list out your major projects at each company this way. Where the XX marks I would just list the application name or the project name. I would also describe what the application/software/feature that you wrote 'does'.
- Bullet point out responsibilities
- In depth as possible, I'm seeing companies want the resume to speak for the candidate even before the interview
- More responsibilities
- Etc.
- Technologies Used: Recap all the technologies you are using in your current role

Project XX: Same thing here. Overview of software/what is does.
- Etc
- Etc
- Technologies Used:

More Junior Position Held   MM/YEAR – MM / YEAR
- Bullet point things out here some more

Company   **MM/YEAR – MM/YEAR**
Position Held
Location (City, State)

Again put a summary of what the company does
- You get the drift
- Etc etc etc

TECHNICAL SKILLS

Here is how I would set this section up of something along these lines

Platforms:
Software Tools:
Languages:
Hardware:
Technologies:

CERTIFICATES

EDUCATION
