1" x 2" staggered mesh
2" x 2" straight mesh

*Vertical Use Only

The Mineral Mosaics are metal tiles on a ceramic body. The metals used are Copper and Stainless Steel. These well-known and practical metals can be used to add a design element to any vertical surface, from contemporary to rustic. Mineral is available in two sizes. Due to variation in color and shading, it is important and recommended that a range of this product be viewed before finalizing a purchase. To avoid scratching the metal, it is recommended to use a non-sanded grout and to avoid abrasive cleaners. Additionally, these mosaics should not be cleaned with a cleaner that has acidic content, as the acid may cause a change in the color of the metal. It is not recommended to install these mosaics in areas fully submerged in water, such as fountains or pools.
