

Mission Statement

Summit Waterproofing is building its company on the standards of striving to provide the customer with the highest level quality and service. Summit Waterproofing strives everyday to reach the summit of excellence. Our philosophy is to provide the level of quality and service that the customer deserves. We do that by providing unmatched superior skill of workmanship and the technology of tomorrow. We want to not only fix your problems but also recommend a strategy to keep your complete building envelope on the right track to avoid needless replacement of your investment due to nature's elements. We want to keep the owner informed of today's problems and the future problems that will need attention. We accomplish these goals by providing the customer with progress reports and digital pictures to show where work is being done and where other areas of concern may lie.

Summit Waterproofing wants to go to work for you and build a lasting relationship that benefits you the customer.

We use only the best materials to provide you the waterproofing integrity that must be used to protect the building or structure you are maintaining. Nothing is maintenance free in this world, but a good start is a program to keep your investment waterproofed. **Please call us today for your free estimates and assesment of your building or structure.**
