

TALKS, WALKS AND GAWKS

NOV 5TH TO 7TH

WITH DR KEN WALKER, MUSEUM VICTORIA

Dr Ken Walker is Senior Curator of Entomology and Arachnology at Museum Victoria. He joins us for this special series of public events. Hear his entertaining insights about the thousands of Australian native bee species, their adaptations and unique relationships with the flowers they rely on.

Dr Walker will also discuss the contribution you can make to spotting and sharing the many plant and animal species of our area, using the BowerBird.org.au website.

So whether you know a lot or a little about the bees, spiders, lizards, birds, plants and much more in our region, be sure to get along to one of Ken's talks, walks and gawks!

*Entry by gold coin donation

RSVP required as seating is limited ... and to ensure we have a cuppa for you!

All **TALKS** will include insights into the wonders of our native Australian bees as well as an introduction to the BowerBird.org.au website features and functions.

Sessions with **WALKS & GAWKS** will include a similar talk, held indoors, and then we'll go for a wander outside with Dr Walker to see what we can see and how we can use BowerBird.org.au to record what we find. Bring a camera along to these sessions if you can, as well as appropriate outdoor wear.
