© 2018 Friant Division of the Central Valley Project
San Joaquin Valley
AT-A-GLANCE

**THE FRIANT DIVISION**

- Constructed in the mid-20th century as a conjunctive use strategy to manage groundwater and subsidence in irrigated lands along the San Joaquin Valley’s eastside.
- Supplied by San Joaquin River water stored behind Friant Dam at Millerton Lake northeast of Fresno.
- The Bureau of Reclamation acquired water rights for the Friant Division in 1939 through purchase and exchange agreements with original San Joaquin River water rights holders (Exchange Contractors). Under the exchange, Reclamation delivers Delta water to the Exchange Contractors, allowing the Friant Division access to the San Joaquin’s most reliable supply. Friant contractors pay for the operation and maintenance of all facilities used to provide Central Valley Project water to the Exchange Contractors.
- The 152-mile Friant-Kern Canal and 36-mile Madera Canal serve more than 15,000 individual farms cultivating more than 1 million acres—a quarter of the Valley’s agricultural land.
- Five counties served by the Friant Division are among the nation’s most productive and account for more than half California’s 2015 crop values.
- FWAs fifteen-member districts account for 78% of irrigated lands and 64% of Federal water supply contracts in the Friant Division.
- Approximately 2.2 million acre-feet of water is contracted to 32 agencies, districts and municipalities within the Friant Division. The City of Fresno and several other cities and towns along the eastern rim of the San Joaquin Valley count on Friant supplies as a significant or primary water source.
- The delivery of CVP water was a stabilizing force for regional groundwater, allowing for recharge during wetter periods and reliable extraction during droughts.

- RESTORING FRIANT-KERN CANAL AND MADERA CANAL CONVEYANCE CAPACITY
- ADDRESSING ALL ISSUES OR PROBLEMS ARISING ON THE CANAL
- IMPLEMENTING CANAL IMPROVEMENTS, INCLUDING CAPACITY CORRECTION AND REVERSE FLOW PUMP-BACK CAPABILITY
- SUPPORTING NEW STORAGE, SUCH AS AT TEMPERANCE FLAT
- INTEGRATING NEW RESOURCES
- SATISFYING A 25-YEAR CONTRACT WITH RECLAMATION TO PERFORM ALL OPERATION, MAINTENANCE, AND REPAIRS ON THE CANAL
- DELIVERING WATER TO ALL CONTRACTORS ON THE FRIANT-KERN CANAL
- REPAIRING AND REPLACING PANELS, STRUCTURES, AND OTHER WATER DELIVERY AND CONTROL FEATURES
- CONTROLLING AND REMOVAL OF AQUATIC WEEDS
- CLEARING DEBRIS TO ALLOW PROPER CONVEYANCE
- ADDRESSING ALL ISSUES OR PROBLEMS ARISING ON THE CANAL
- IMPLEMENTING CANAL IMPROVEMENTS, INCLUDING CAPACITY CORRECTION AND REVERSE FLOW PUMP-BACK CAPABILITY

**2017 STRATEGIC PLAN GOALS**

1. **Water Supply Management**
2. **Good Internal and External Governance**
3. **Outreach and Engagement**

**ABOUT FRIANT WATER AUTHORITY**

The Friant Water Authority (FWA) is a public agency established in 2004 under California’s Joint Powers Agreement Act to represent its member agencies in federal and state policy, regulatory and political matters that affect water supplies within Friant Division of the Central Valley Project (CVP). FWA is additionally responsible for all operation, maintenance and repair functions for the Friant-Kern Canal and other associated works of the Friant Division under contract with the Bureau of Reclamation (Reclamation). FWA is the successor to the Friant Water Users Authority, which held contracts for OMR on the canal beginning in 1986.

**FRIANT DIVISION WATER SUPPLY PROTECTION**

- Protecting reliable delivery of water under the San Joaquin River Exchange Contract
- Implementing the San Joaquin River Restoration Settlement
- Participating in other state and federal activities that may affect water supply, including WaterFix, Coordinated Long-Term Operations of the CVP/SWP the Sustainable Groundwater Management Act, and State Water Resources Control Board proceedings

**REGIONAL INFRASTRUCTURE IMPROVEMENT**

- Satisfying a 25-year contract with Reclamation to perform all operation, maintenance, and repairs on the canal
- Delivering water to all contractors on the Friant-Kern Canal
- Repairing and replacing panels, structures, and other water delivery and control features
- Control and removal of aquatic weeds
- Clearing debris to allow proper conveyance
- Addressing all issues or problems arising on the canal
- Implementing canal improvements, including capacity correction and reverse flow pump-back capability

**MAXIMIZING AVAILABLE RESOURCES**

- Developing a Sustainability Plan for the entire Friant Division
- Funding modernized snow observation and water supply assessment tools
- Facilitating water exchanges between Friant districts and other water users
- Supporting new storage, such as at Temperance Flat
- Restoring Friant-Kern Canal and Madera Canal conveyance capacity

**FRIANT-KERN CANAL OPERATION & MAINTENANCE**

- Satisfying a 25-year contract with Reclamation to perform all operation, maintenance, and repairs on the canal
- Delivering water to all contractors on the Friant-Kern Canal
- Repairing and replacing panels, structures, and other water delivery and control features
- Control and removal of aquatic weeds
- Clearing debris to allow proper conveyance
- Addressing all issues or problems arising on the canal
- Implementing canal improvements, including capacity correction and reverse flow pump-back capability

*California Agricultural Statistics Review, 2015-2016, California Department of Food and Agriculture.*
CVP WATER DELIVERIES TO THE FRIANT DIVISION KEPT REGIONAL GROUNDWATER STABLE THROUGH MULTIPLE CYCLES OF DROUGHT

Deliveries to the CVP Friant Division began upon the completion of the Friant-Kern and Madera canals in 1951. The delivery of CVP water was a stabilizing force for regional groundwater, allowing for recharge during wetter periods and reliable extraction during droughts.

PERIODS OF DROUGHT
