

# WILD BEES: SUPER-POLLINATORS!

The Fascinating Lives of  
Our Native Bees  
&  
How You Can  
Help Save Them

## *An engaging and informative presentation*

Deborah Perkins is a wildlife ecologist with 25 years of experience and a lifelong commitment to wildlife conservation. Deb's infectious enthusiasm and dynamic speaking style leave people feeling inspired, hopeful, and ready to take action. In this highly engaging talk, topics include:

-  The ecology & behavior of our fascinating native bees
-  Habitat needs and environmental stressors
-  How you can create a high value habitat in your own dooryard, farm, field, or forestland
-  How to boost biodiversity and pollination services
-  How to experience what Deb calls "Zen and the Art of Bee Observation"

*"Deb is a gifted speaker! She is able to share her incredible depth and breadth of scientific knowledge enthusiastically and with a bit of humor, and without overwhelming her audience." – Kathy Banks of Denmark, Maine*

This talk can also be expanded to a workshop. Please see the [website](#) for more information and a list of other offerings.

As the owner of **FIRST LIGHT WILDLIFE HABITATS**, Deb co-creates thriving yard, farm, and forestland habitats with stewards throughout the Northeast.
