Los Angeles is known as the world's contemporary Creative Capital. One of every six people in our home city is employed in some sort of artistic field. TAG is celebrating Los Angeles with Art+Video. Selected and member artists will display video art alongside physical art objects in our beautiful and popular South Gallery.

Video art emerged in the 1960's with the growing development of film technologies. Today, fine artists regularly employ video media in a variety of ways. Art+Video invites viewers to make connections between contemporary objects and the screen.
