

The Cornell Note Taking System

Cue Column 2 ½"	Note-Taking Column 6"
	<ol style="list-style-type: none">1. Record: During the lecture, use the note-taking column to record the lecture using telegraphic sentences.2. Questions: As soon after class as possible, formulate questions based on the notes in the right-hand column. Writing questions helps clarify meanings, reveal relationships, establish continuity, and strengthen memory. Also, the writing of questions sets up a perfect stage for exam-studying later.3. Recite: Cover the note-taking column with a sheet of paper. Then, looking at the questions or cue-words in the cue column only, say aloud, in your own words, the answers to the questions, facts, or ideas indicated by the cue words.4. Reflect: Reflect on the material by asking yourself questions, for examples: “What’s the significance of these facts? What principle are they based on? How can I apply them? How do they fit in with what I already know? What’s beyond them?”5. Review: Spend at least ten minutes every week reviewing all your previous notes. If you do, you’ll retain a great deal for current use, as well as for the exam.

Summary

After class, use this space at the bottom of each page to summarize the notes on that page.
