

ENVIRONMENTAL HEALTH & SAFETY (EHS) POLICY

Our Commitment

We are committed to continual improvement in our EHS performances.

Our bespoke EHS policy has been tailored to suit WA Transition values that align with our recycling ambitions, wherever possible, for sustainability in all aspects of our operation as considered 'end to end'.

Work, Health and Safety

Senior management is committed to providing and maintaining, as far as is reasonably practicable, a safe and healthy work environment, conducive to high morale and productivity. Employees at all levels in the organisation are expected to support management efforts.

Environment

WA Transition aims to minimise the effect of our business activities (carbon footprint) on the environment in which we operate. We will do this by establishing and maintaining a simple environmental management system focused on continual improvement to identify and monitor environmental impacts.

Our Actions

To meet our EHS commitments, we will set targets, develop, implement and maintain management standards and systems, and comply with relevant industry standards and legal requirements.

We will regularly monitor and report on our progress.

We will engage with our stakeholders to build relationships based on honesty, openness and mutual trust and share responsibility for meeting the goals of our EHS Policy.

We will identify, assess and reduce our EHS risks.

In addition, every effort will be made in the highlighted areas below to ensure the Work, Health, Safety of our workplace and the health of our workforce is maintained.

- a) **Safety Education**
- b) **Accident Prevention**
- c) **Hazard Control**
- d) **Injury Prevention**
- e) **Rehabilitation; Health Preservation and Promotion**

Community

We strive to be valued corporate citizen's in The communities that we operate. We respect the values and cultural heritage of our local people.

Ben Bechelet
Managing Director
