

ENVIRONMENTAL POLICY

WA Transition is committed to a proactive, safe and legal approach to protecting the environment.

Our Company is committed to minimising environmental impacts concerning our environmental performance as an integral part of our business strategy and operating methods. We commit to comply and also exceed all relevant regulatory standards. We will encourage customers; suppliers; sub-contractors and other stakeholders to do the same.

WA Transition is responsible for ensuring that the environmental policy is fully implemented.

However, all employees are made aware that they have a responsibility in their area to ensure that the 'aims and objectives' of WA Transition are met. We will incorporate environmental factors into all our business decisions and we will review this policy and any related business issues at our annual EHS management meetings.

Purpose – Reducing Carbon Footprints:

Prevent pollution, reduce waste and minimise the consumption of resources. Promote 'good practice' concerning recycling activities, incorporating any transport fleet spill management and general housekeeping processes.

With regards to our business operations, all our activities when interfacing with our immediate environmental surrounds, have been duly evaluated and assessed and all 'safe systems of work' have been designed and developed, mindful of associated possible impacts, such as:-

- a) Destruction and damage of flora and fauna
- b) Destruction and damage of trees and other forestry
- c) Destruction, injury or contamination of wildlife
- d) Water pollution - contamination
- e) Air pollution - contamination
- f) Noise pollution- both on site and during normal operations
- g) Power resource management including fossil fuels

Aims & Objectives:

Educate, train and motivate workers to carry out tasks in an environmentally responsible manner, mindful of their activities and subsequent impact on their surrounds. We remain committed to:

ZERO damage to the environment where practicable

As far as reasonably practicable with regards to: -

SCOPE

Energy and Water usage:

- We will seek to reduce the amount of energy used as much as possible.
- Lights and unused electrical equipment will be switched off when not in use.

- Heating and Air Conditioning consumption will be monitored and adjusted where appropriate.
- The energy consumption and efficiency of new products will be considered when purchasing new stock items.
- We will evaluate the environmental impact of any new products we intend to purchase.
- We will favour more environmentally friendly and efficient products wherever possible.
- We will reuse and recycle everything we are able to.

Transportation usage:

- We will reduce the need for business travel, restricting to necessary trips only by the promotion of alternative communications such as e-mail or video/phone conferencing where practical.
- We will work towards 'green' maintenance practices; promoting the use of environmentally friendly products where possible with focus on managing our fleet accordingly.

PAPER usage:

- We promote a paperless office and administration duties use iCloud as their storage solution.

Maintenance; Cleaning and General Waste Management:

- Cleaning materials used will be as environmentally friendly as possible.
- We will manage our waste; including general, recyclable and hazardous waste safely and legally
- We will only use licensed and appropriate organisations to dispose of general waste materials.

Culture:

- We will involve staff in the implementation of this policy, for greater commitment and improved performance.

Recycling Activities:

- All our operational activities are designed around our major focus on our recycling theme for all associated materials whilst conducting our business and undertakings. These commitments are reflected throughout all interfacing daily work practices.
