

OMNITECH WARRANTY

Certification – Standards

All Omnitech structures are manufactured to comply with AS 4685 Parts 1-6, 2004 and AS/NZS 4486.1

Accident Policy

Public liability insurance/product liability insurance for up to \$20,000,000.

Warranty

If any defects found on play equipment that are not due to vandalism, negligence, lack of proper maintenance (as per Omnitech Maintenance Manual), accidental damage, abuse, incorrect installation by customer or normal wear and tear, then Omnitech Playgrounds will repair or replace at our discretion the defective part/s at no cost to the customer for the part or parts themselves. Warranty specifically excludes freight costs or installation costs or charges relating to the defective part/s. Warranty does not cover aesthetic issues.

All products are guaranteed against structural or manufacturing defects as follows:

POSTS:

Warranted for 15 years from date of warranty against structural failure due to faulty material or workmanship.

PLASTIC ACCESSORIES:

Warranted for 15 years from date of warranty against structural defects.

MOVING PARTS:

Warranted for 2 years from date of warranty against structural defects.

DECKS AND STATIC METAL PLAY ACTIVITIES:

Warranted for 15 years from date of warranty against structural defects.

SPRINGS:

Warranted for 5 years from date of warranty against breakage.

ROPES:

Warranted for 12 months from date of warranty against structural defects.

Inspection and Maintenance

It is important that all playground and play equipment is maintained and inspected in compliance with the 'Omnitech Maintenance Manual'. The frequency of inspection, and the elements to be inspected is determined by the type of equipment, the surrounding area and local risk factors. An inspection frequency plan should be devised for each individual playground and changed where necessary to cater for; the amount of usage; age of users; amount of vandalism in the area; material used for main structures; age of equipment; type of surfacing used; supervision in the area; and climate condition. Where hazards are identified, corrective action shall be initiated.

In accordance with the Australian/New Zealand Standards and the Omnitech Maintenance manual all items of equipment will require 3 levels of inspection:

Comprehensive Inspection (Post Installation/Annually)

Comprehensive inspections should be carried out at intervals of not greater than 12 months. These inspections should involve checking the overall stability of the equipment, footings, surfacing, structural integrity, corrosion/rotting, etc... It is also important to check the safety of any changes made due to repairs/replaced components.

Operational Inspection (1 to 3 Monthly)

Operational inspection is a more detailed inspection to check the operation and stability of the equipment, especially for any wear (e.g. components where wear could be expected such as bearings and any moving joints). Operational inspections should be carried out every 1 to 3 months.

Routine Visual Inspection (Daily/Weekly)

The routine visual inspection is required to identify obvious hazards that may result from vandalism, use or weather conditions (e.g. damaged parts, broken bottles and loss of soft surfacing). Routine inspections may be necessary each day for loose fill surfacing or for equipment in a playground subject to heavy use or vandalism.

NOTE: This warranty is valid from date of signature by an 'Authorized Representative'. For warranty claims, you may be required to produce this document. The 'Authorized Representative' and distributor of Omnitech playgrounds for: QLD, NSW and NT is Austek Play; SA is Outfront Concepts; ACT is The Playground People.
