In 2017, No Wasted Lives and The Council of Research & Technical Advice on Acute Malnutrition (CORTASAM) launched a research prioritisation exercise. These survey results were used to form a *Research Agenda for Acute Malnutrition* that outlines 7 priority research areas where further research and evidence generation are critically needed. Alongside this, a call for Expressions of Interest (EoI) was opened to accelerate research activities linked to the Research Agenda. This summarises the EoIs submitted through this process.
