NO WASTED LIVES

Women must be healthy, nourished, and not discriminated against to make the best decisions. They are key to scale up treatment for children suffering from wasting.

Unequal power relations at the household & community level render women vulnerable to food insecurity.

In nearly two thirds of countries, women are more likely to report food insecurity than men.

In the Sahel region, 1.6 million children were expected to suffer from severe acute malnutrition in 2018.

In sub-Saharan Africa, more than half the female population food insecure at moderate or severe levels.

In Africa and Asia, one in ten mothers is underweight.

Globally 38% of pregnant women are anaemic.
