

**Registration**

**Tracking**

**Monitoring**

**Compliance**

## Session Focus

To protect minors we need ways to register, track and monitor youth affiliated programs in order to verify if there is compliance.

Three options typically emerge when doing this through a patchwork process, homegrown package, or a purchased software package. Each of these three options will be explored for their strengths and challenges. Participants will be encouraged to share and learn from colleagues about their experiences with organization systems in addition to the information provided.

# Registration

Action of collecting or sharing of information (events, people, places, etc.)

# Tracking

Methods of organization & maintaining information.

# Monitoring

Planned evaluation or review over a period of time.

# Compliance

State or fact of requirements where it is assessed if rules or standards are being met.

## Patchwork

Your institution is just getting started or is figuring out the next steps.

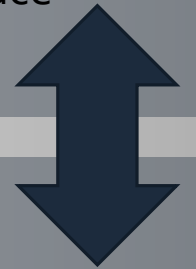

Your institution is trying to establish the steps and start the process of creating a plan while also doing the work.

## Homegrown

Your institution has identified a process, policies, and plan as to how youth protection will work at your school.

You have steps, processes, and procedures in place and refine them.

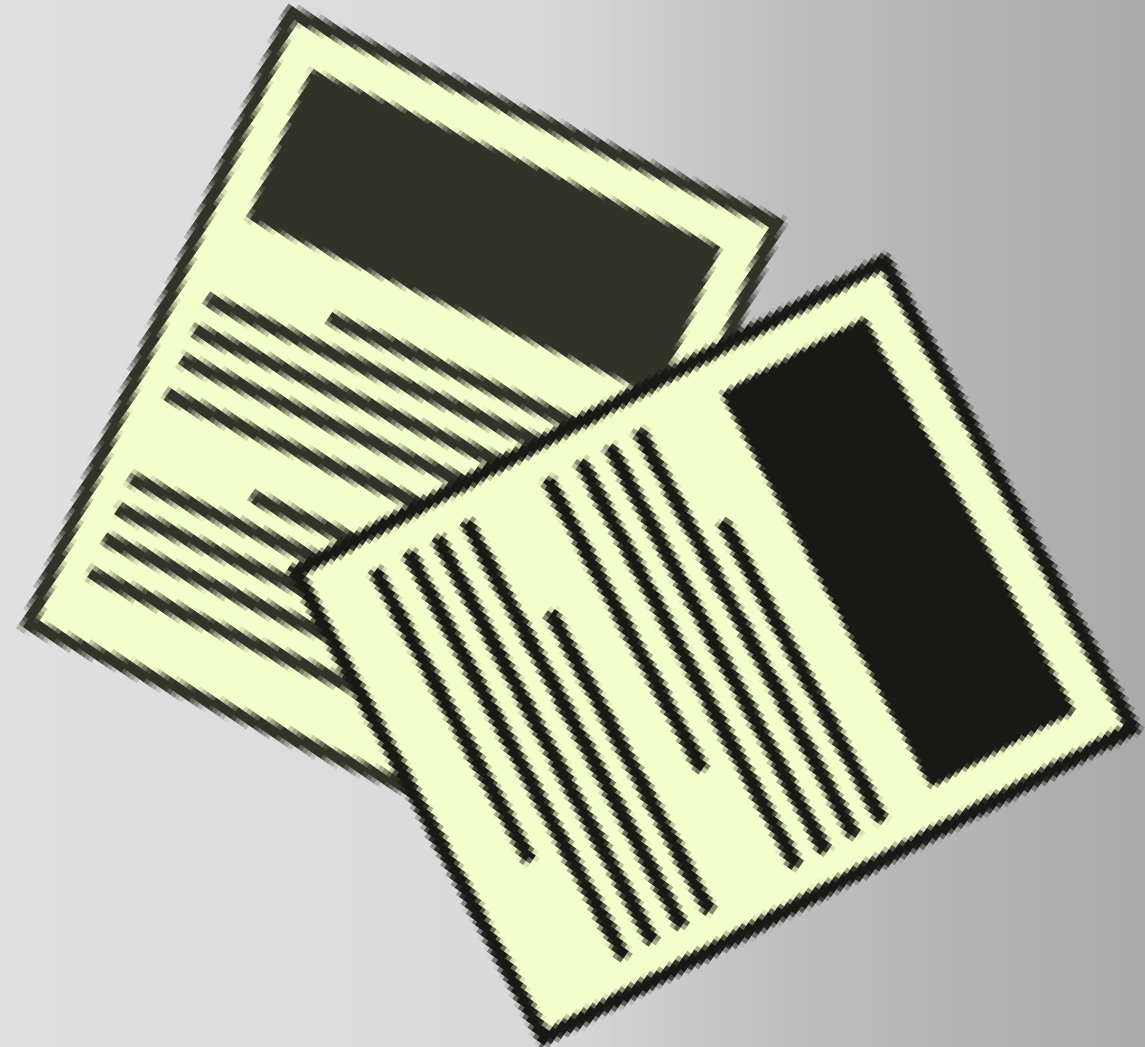

## Software

Your institution has identified the process, policies, and plan as to how youth protection will work at your school.

You have steps, processes, and procedures in place and refine them.

## Take a moment

- Handout
- Registration process
- Tracking process
- Monitoring process
- Compliance process

# Patchwork Package

- Blended Approach
- Manual Collection of Information
- File Storage (online and/or paper)
- Individualized/Customized
