Take note! Path Pal Karen Kemp returns to BPWA
Some 20 years after serving on the first Path Wanderers board, Karen Kemp has returned to help reboot the lovely notecards that she designed for us then, featuring her original watercolors of Berkeley paths.

“It was probably Jacque [Ensign] who said, “We should do some notecards,”” Kemp recalls of the BPWA founder. “It’s still a dear project. I’m really happy that the Path Wanderers reached out to me and wanted to republish them. It’s been a long time.”

The sets of 4 notecards — which are now available for purchase at berkeleypaths.org — feature Rose Walk, Billy Jean Walk, Fountain Walk, and La Vereda Steps.

Kemp’s path to designing the notecards — and our famous map — started when she was a teenager growing up in Walnut Creek, where she loved to wander the foothills of Mt. Diablo and had heard that there were paths in the Berkeley Hills. Later in the 1990s, in her thirties and living in Emeryville, she discovered the “Very Best of Berkeley” map at the Berkeley Chamber of Commerce, a cartoon map that included some paths.

“The idea of public pathways fascinates me,” she says. “It’s great to be outdoors in the middle of nowhere with a lot of spectacular views and things to look at.” Read more

Know your Zone and potential evacuation routes

By Chris Cullander

During an emergency, Zonehaven — Alameda County's new evacuation software — uses information about the incident, its location, local weather, traffic flows, and other information to create an evacuation guide based on preset Zones in the community. It then sends zone-specific alerts via smartphone, computer, or tablet.

These evacuation Zones have now been published at community.zonehaven.com, so now is a good time for folks to figure out which Zone they are in by entering your address at the Zonehaven website, and to think about how to evacuate if needs be.

If there's not enough advance notice to drive out quickly and safely, emergency responders urge residents not to jam roads with cars and to instead walk out with their go-bags — possibly using the pathways as shortcuts. AC Alert is designed to suggest the best evacuation routes (for details, see this article), but consider having a copy of our Berkeley paths map with potential routes highlighted in your go-bag as well.
