ARE YOU AN ADULT WITH TYPE 1 DIABETES? WANT TO PARTICIPATE IN RESEARCH?

Optimizing Uptake and Use of CL Automated Insulin Delivery Systems through Virtual Reality

Protocol Director: Diana Naranjo, PhD

We are looking for volunteers to participate in a research study that uses virtual reality to expose people with type 1 diabetes to a closed loop (CL) system that semi-automatically adjusts blood sugars. We hope to learn about how participants overcome challenges to diabetes device use and increase the number of patients using CL systems.

Looking for 18 to 45 year olds diagnosed with Type 1 Diabetes for 1 or more years

Participants must be currently using 1 or more of the following devices:
- Insulin pump
- Continuous glucose monitor
- Closed loop (CL) system

Participation is 1 day for 2 hours

Compensation for time in study
