Medtronic 670G Hybrid Closed-Loop Trial

Details:
• 6 month to 1 year long trial using the 670G pump. Subjects will be randomized into using the closed-loop feature for either all 12 months or second 6 months.
• All subjects will be given 670G, as well as BG meter and ketone meter to use during study. Pump and meter supplies will be supplied during study.
• 6-9 visits to Stanford campus during that 12 months

Who’s eligible:
• Ages 7-21. Any A1c. Must not have previously used a closed-loop pump.
• Must currently be using pump.
• If on injections, we can enroll you later this fall.

Compensation for time and travel provided.
How to enroll:
• Email diabetesresearch@stanford.edu and let us know you’d like to enroll.
• Additional contacts: ideent@stanford.edu or kerren@stanford.edu
• Visit https://is.gd/DMdatabase or scan this code to be contacted for future studies
