Insulin 100th Birthday Celebration  
Feb 18, 2021  
via Zoom by Registration

8:00 - 8:15 am  Dr. Seung Kim: Professor of Developmental Biology and (by courtesy) of Medicine; Co-Director, JDRF Northern California Center of Excellence; Director, Stanford Diabetes Research Center  
Welcome and Opening Remarks

Session I: Moderated by Dr. Anna Gloyn, Professor of Pediatrics, Stanford University

8:15 - 9:15 am  Dr. David Harlan: William & Doris Krupp Professor of Medicine, Co-Director, UMass Diabetes Center of Excellence, University of Massachusetts Medical School  
“The Noble and often Nobel Role played by Insulin-Related Research Advances”

9:15 - 10:15 am  Professor Dame Frances Ashcroft: GlaxoSmithKline Research Professor, University Laboratory of Physiology, University of Oxford  
“Metabolic regulation of insulin secretion in health and disease”

10:15-10:30 am  Break or more Q&A

Session II: Moderated by Dr. Eric Appel, Assistant Professor of Material Science and Engineering, Stanford University

10:30-11:00 am  Dr. Bruce Buckingham: Professor of Pediatrics, Stanford University  
“Automated insulin delivery – improving control and decreasing the burden of diabetes”

11:00-11:30 am  Dr. Danny Chou: Assistant Professor of Pediatrics, Stanford University  
“Road to Perfect Insulin: 100 years in the making”

11:30-12:00 pm  Dr. Julie Sneddon: Assistant Professor, UCSF School of Medicine, UCSF Diabetes Center  
“TBA”

12:00-12:15 pm  Dr. David Maahs: Professor of Pediatrics; Chief, Division of Endocrinology and Diabetes; Associate Director, Stanford Diabetes Research Center  
Closing Remarks

We gratefully acknowledge the generous grant (P30DK116074) for this conference provided by: National Institutes of Health/National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK)
