We are interested in using a new brain imaging technique (NIRS) to study the brain in children with diabetes who are transitioning to a hybrid closed-loop system.

Who is eligible?

- Ages 7 - 17
- Diagnosed with Type 1 diabetes
- Starting on a hybrid closed-loop system
- Able to travel to Stanford Children's Diabetes Clinics

For participants' rights questions, contact 1-866-680-2906

Contact our study coordinator Dom Mitchell at (650) 498-4976 or domcm@stanford.edu
