

Capability Statement

Alacran delivers effective and adaptable solutions to meet our client's strategic goals. Our team of industry-leading executives and staff employ their expertise with cutting-edge methodology and technology in the fields of Project Management, Consulting, Logistics, and IT support.

Project Management

Alacran employs PMP-certified project management professionals with years of civil and military experience in running complex domestic and international projects. Our turnkey solutions will reduce operational stress while maintaining cost effectiveness.

- Project development, implementation and completion
- Planning, scheduling, budget and contract management
- Framework development
- Performing feasibility assessments of high-value initiatives
- Microsoft SharePoint managed client portals

Consulting

From the development of a new initiative to the execution of an existing internal effort, Alacran supports the entire project life cycle.

- Program/Project financial and operational modeling
- Data analysis, risk assessment
- Contract development, implementation and closeout
- Business process analysis

Logistics

Our subject-matter experts in logistics management provide dependable solutions for all supply chain and import/export requirements.

- Import/export, procurement, distribution and supply chain management in austere environments
- Navigation of international trade and export regulations, with expertise in ITAR/EAR compliance
- Freight, shipping and acquisition logistics for energetic material and munitions

Information Technology

Our dedicated IT professionals provide clients with next-generation cyber solutions to meet the needs of a rapidly changing environment.

- Security risk management and compliance
- IT infrastructure, planning and design
- Application services, network operations
- Cloud/data center design and operations
- Enterprise solutions and application modernization
