NONPROFIT ENDOWMENT FUND OVERVIEW

Establishing a nonprofit fund at the Greater Washington Community Foundation allows your organization to build an endowment that will ensure support for your operations and programs for decades to come. It is a crucial step toward financial sustainability—the assets are invested to achieve long-term capital growth, and a portion of the fund is distributed annually to your organization.

Partnering with The Community Foundation frees your organization from the burden of investing and administering its endowment, giving you more time to focus on mission critical work. Your organization will benefit from inclusion in a large portfolio with access to experienced investment managers and administration of endowment services. This approach provides an opportunity to safeguard your organization’s assets and build a stable funding stream for the future.

The Community Foundation offers two options for addressing your needs:

1. **Permanent Endowed Fund**: Designed to protect and preserve long-term endowed assets. The principal is permanently held by The Community Foundation, with an annual payout according to our spending policy.

2. **Nonprofit Fund with Withdrawal Option**: Intended to be a long-term fund with the opportunity to access principal when urgently needed. Withdrawal requires review and approval by both the nonprofit organization’s board and The Community Foundation’s Board of Trustees.
