SCHOOL PROJECTS

School is off to another great start! We continue to grow and expand. It's nice seeing the new students transition so well into the school.

Many great projects are underway for the students. 3/4 grade are working hard on their first book report!

The 5/6 grade class are excited about making their own volcanoes and then erupting them!

The 7/8 class are busy collecting insects which they will pin and label for their bug board for Life Science.

9th graders have done a great job on their speeches which is good practice for the KY Fine Arts Competition in the Spring.

K-2nd grade always seem to be busy working on many craft projects in school!

TEACHER SPOTLIGHT

Mrs. Finley (pictured above with the 5/6 graders) is our fine arts teacher who wears many hats! She loves hands on learning and there is always something creative and fun going on in her classroom that produces many smiles and giggles.

For music the students learn the basics of rhythm, theory, different types of music, and music history. For art the students learn the elements of art, different genres, and creativity. Mrs. Finley also teaches our high school elective of Fine Arts which includes drama, visual art, music, and dance.

On top of all these classes, she also writes and directs our Christmas program - this year we will focus on the wise men.

Most of all, Mrs. Finley loves to tell the students that because we are made in God's image, that gives us the basis for being creative and artistic as God is the ultimate Creator and Artist!

Mrs. Finley's favorite things to do outside of school are disc golf, reading, singing, knitting, hiking, and spending time with her family.

KEY DATES FOR SEPTEMBER

September 2: Labor Day - no school
September 5: monthly tuition due

Pizza lunch is an option for every Friday! Lunch slips will go home over the weekend and will need to be returned on Mondays.
FINANCIAL AID DONATIONS

There is a financial need for our tuition assistance program. We understand the financial burden of having children in Christian education, and we strive to work with families that do require some help. The financial assistance that we can give to families is dependent upon donated funds towards this program. We would love to financially partner with some individuals who have a heart and desire to help these families who desire a solid Christian academic education for their child, but cannot afford the full tuition cost. For more information, please don’t hesitate to reach out to us!

SCIENCE AND THE BIBLE

We are thrilled with our new science equipment this year that was made possible from our fundraiser last year. Our equipment has already been put to good use and we will continue to use the equipment for years to come.

Dr. Rivera, forensic expert at AiG, has given our staff some microscope training on the 2 different types of microscopes we have. One microscope is used for looking at slides and the other microscope can be used by any age to look at objects such as feathers, pond water, etc.

Using this equipment is an excellent way to teach students about observable and repeatable science and that science only works because God is upholding all things and promises to continue to do so.

**Colossians 1:17 "He is before all things, and in Him all things hold together."**

We can also use science and the Bible to help us understand the past. We all have the same evidence, but we use the Bible as the basis of our interpretations in science versus the world using man’s fallible opinion.
