

SILVERSEA REVEALS *SILVER CLOUD* DESIGN IN NEW RENDERINGS

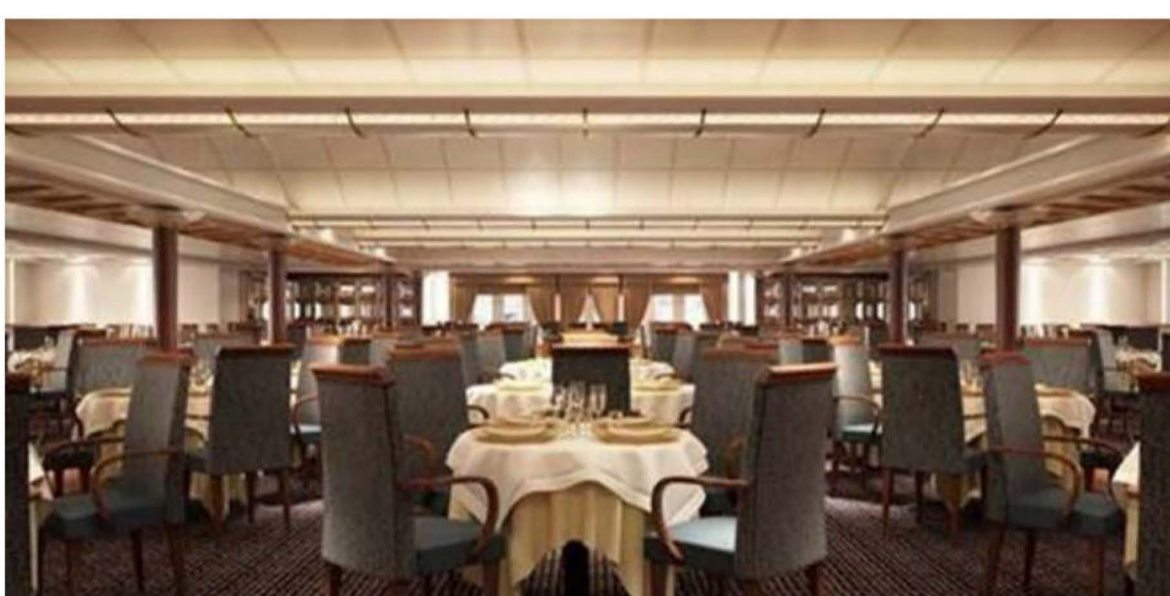

The ship's multi-million dollar refurbishment to set new standards in luxury expedition cruising

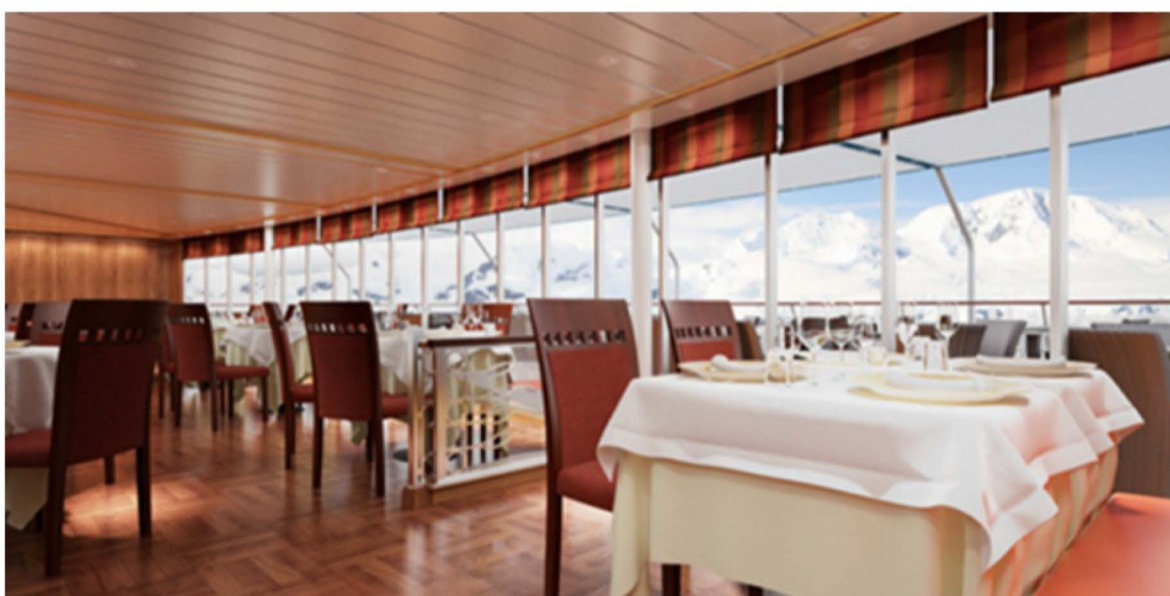

(Miami, FL -- March 22, 2017) Silversea has released a selection of renderings showcasing the beautifully crafted *Silver Cloud* interiors ahead of her conversion into an ice-class expedition ship, which will take place between August and October this year. *Silver Cloud*, which launched the Silversea fleet in 1994, will offer the ultra-luxury distinctions of a classic Silversea ship combined with the strength and manoeuvrability required for expedition cruising.

The new renderings highlight the luxurious design of *Silver Cloud's* public spaces, including La Terrazza, The Restaurant, Observation Lounge, Panorama Lounge, and Venetian Lounge. The extensive refurbishment will include the creation of the Observation lounge; new teak flooring, upholstery and lighting in La Terrazza; and new carpet and upholstery in The Restaurant. *Silver Cloud* will also feature a new gym with Technogym equipment.

In addition to interior updates, the multi-million dollar refurbishment will strengthen *Silver Cloud's* hull, enabling her to explore polar waters. *Silver Cloud's* transition to an ice-class vessel will bring expedition guests the luxury, style and comfort synonymous with Silversea's classic ships. A guest capacity of 260 in non-polar regions and just 200 in polar regions means that guests will enjoy the highest levels of personalized and attentive service on board. The limited capacity in polar regions also means that all guests can disembark at the same time to explore each region.

"As the first ship in our fleet, *Silver Cloud* has a special place in Silversea's history, and we're delighted to reveal further details of her refurbishment. We look forward to welcoming guests aboard to experience *Silver Cloud's* luxurious interiors as well as her incredible itineraries later this year," said Barbara Muckermann, Chief Marketing Officer at Silversea Cruises.

When *Silver Cloud* was launched in 1994 by Antonio Lefebvre, it set a new standard in luxury cruising. His son, Manfredi Lefebvre became chairman of Silversea in 2001 and has since expanded the fleet from four to eight vessels with a ninth currently under construction. The expansion has included the introduction of expedition cruising with the launch of *Silver Explorer* in 2008.

Silver Cloud will also have a team of up to 19 dedicated experts on hand to ensure guests leave with the best experiences from their voyages, whether they be the sights, the sounds, the history or the stories. Daily presentations and lectures by experts in the state-of-the-art theatre will also be streamed live to all suites.
