

CABLING

Are you ready for new technology?
A healthy cabling network will optimize
your technology investment.

VOICE, DATA, FIBRE OPTIC AND SPECIALTY CABLING

CABCO is Atlantic
Canada's trusted resource
for structured cabling
installation and service
since 1980.

Our experienced technicians
ensure your cabling
infrastructure is properly
installed, terminated,
grounded, bonded, labeled,
tested and certified.

An optimized cabling infrastructure is critical

Whether deploying a Cloud-based solution or upgrading on-premise hardware, cabling infrastructure can make or break your technology investment. Updating and certifying premises cabling will ensure your technology performs at optimum levels.

CABCO recommends the following Cabling Infrastructure Assessments to analyze, plan and certify your next project:

- Voice Readiness Assessment (VRA)
- Wireless Network Assessment (WNA)
- Cloud Readiness Assessment (CRA)

CABCO technicians are Communications Cabling Specialist (CCS) accredited and adhere to the highest job safety standards. This ensures cabling infrastructure is properly installed, terminated, grounded, bonded, labeled, tested and certified.

Cabling expertise from pole top to desktop

- Structured Cabling (Cat5e, Cat6, Cat6A, RG6 Coaxial)
- Fibre Optic Cabling, Splicing and Emergency Repair Service
