Hardware

Award-winning SupaStuds have a unique, self-cleaning design which enables them to be screwed into a shoe without previously “tapping-out” the hole. This makes them far faster, easier and safer to insert than conventional studs. A high-tech manufacturing process is used to harden SupaStuds, rendering them tougher than tungsten, and this also makes them rust-resistant, prolonging their life.

SupaStuds have been developed in conjunction with, and are endorsed by, top eventers Matt and Marie Ryan. British Team farrier Haydn Price, Olympic Silver medalist Mary King and Show-Jumping Grandmaster David Broome are also supporters. SupaStuds are used by many of the top event riders in the country and have become the studs of choice for thousands of competitors at every level across the board in equestrian sport, from driving to polo, showing to show-jumping.

IMAGE TO COME

SupaStuds *Stud Spanner*

Complete your Supa stud kit with this quality stud spanner.

CODE: SSUPA SPANNER

SupaStuds *Stud Stasha*

The StudStasha is an elasticated fabric wristband (similar in appearance to a tennis wristband) which contains a powerful magnet. This magnet will hold four or more studs securely while you are studding up, so that the studs are always in reach yet keeping both hands free. If you do lose a stud in long grass, the magnet can be used like a metal detector to find it again. The wristband is stretchy enough to fit a bare arm or over heavy clothing. Note: Do not use this product if you have a pacemaker fitted.
