For someone with food allergies, even the slightest trace can be deadly.
Dear ________________,

Did you know 15 million Americans have food allergies? That number is still shockingly on the rise, with no answer in sight. That’s why research and action have never been so critical.

Food Allergy Research & Education (FARE) works to improve the quality of life and the health of individuals with food allergies, and to provide them hope through the promise of new treatments.

For someone with food allergies, even the slightest trace can be deadly.
