

PLEASE PLACE STAMP HERE

Did you know?

Nearly 680,000 voting age citizens are not on the rolls.

That's like ALL of Boston being unable to vote!

Automatic Voter Registration would make sure each of us can make our voices heard.

Dear Legislator,

Please support legislation (H. 2190 and S. 373) to establish automatic voter registration system in Massachusetts. This reform will increase political participation and make voting rolls more accurate and elections more secure. It's a simple change to update and modernize the voter registration process to remove bureaucracy and unnecessary paperwork. It could even save the state money. Up to 680,000 eligible citizens would be registered.

AK, IL, VT, RI, CO, CT, OR, CA, CO, GA, and WV have already adopted this reform, and MA should become state #11. At a time when anti-voter restrictions are being passed in many states across the country, Massachusetts should lead the way towards engaging eligible voters in the political process. We also need to do what we can for election security and this bill does both.

Please support HD. 2190 and S.373 and do everything you can to support its passage!

Thank you,

Dear Legislator,
