

BUSINESS RECOVERY ENERGY EFFICIENCY FUND

\$24 Million Capital Works Grant program to support the implementation of energy efficiency projects for businesses recovering from the impacts of COVID-19.

Objective of the Business Recovery Energy Efficiency Fund

- Increase energy productivity.
- Reduce energy costs for Victoria's commercial and industrial sector.
- Accelerate the uptake of energy efficiency technologies.

Government Grants Available for:

- Purchase and installation of energy efficiency equipment
- Replacement of emissions-intensive equipment with low-emissions alternatives.
- Purchase and installation of communications and monitoring technology.

Does your business qualify for BREEF Grant ?

- If your business operates in Victoria
- If your business uses more than 40 megawatts (MW) of electricity or over 1 terajoule (TJ) of gas per year; from pre COVID-19 usage.
- If you are planning to undertake an energy efficiency project that contribute to the organisation's business activities
- Purchase and installation of energy efficiency equipment
- Replacement of emissions-intensive equipment with low-emissions alternatives
- Purchase of communications and monitoring technology.

The last date to apply for the BREEF Grant is 31st December 2020
